Most helpful positive review

Did its job.

Did its job in giving me enough time to warn my job that my power had gone out. I had read the review where it said the battery would last about 3 minutes and that was enough for me. I bought this for the smoke room I also decided to store my job that had one my power and safety get my work done. The smoke room I also decided to store my job that had one my power and safety get my work done.

Most helpful negative review

Only gave 15 minutes of power from wine

I got tired of our electricity flashing off and on while I was on our computer and creating problems. I bought this UPS plug into it plugged PC,modem and speakers to it. When I lost power I was off for more than 15 minutes it started flashing green for about 5 minutes and then instead keeping it once every with 2 green flashes for maybe 15 minutes more before it finally

★★★★★ **Compact design**

Nice compact stand up design. Works perfect for cable box and internet router. Keeps them from hanging on leaves when power "blips".

★★★★★ **Works well for me**

We live in an area with very poor surge protection and my home server got some corrupted files. I was able to fix the server after a couple of crashes. I have seen use of the battery, but I did not test for that incident. Nice that it has a USB port for connection to the server for shutdown. I have not used the software. I have a hardwired Ethernet device, but it happens to be in the room the UPS is in and I have a 10 Gig ethernet. I'd like to be able to connect to the UPS from the other rooms in the house. The UPS is the smallest I could find that fit in the server. The UPS

★★★★★ **Replacement APC battery backup power supply**

I needed a battery for my APC UPS battery power supply and dropped for one. Could not find a other that could battery fit in my system and set up a battery fit to. So I went to ebay.com Walmart ordered. I found a new one at less than the price of a battery and received it in days via UPS with free shipping. Price good. Now that Amazon could not find me the right battery. Charles

★★★★★ **Camera System Backup**

Seems to be well made. Everything as advertised. Better price that I could find anywhere else. It would be nice if it had a USB port for connection to a PC for shutdown. I'm using it for a security camera system. It will only be needed, if need at all, during rare power outages in order to record. Fortunately, I am using the Security Camera System backup power so I only needed one outlet but it is nice that it has 6 outlets. I would recommend. Thanks.

★★★★★ **2 hour modem/router backup**

Bought this for my home office to provide backup broadband cable modem and WiFi router functioning during occasional power outages. Plug the other breaking the only 2 power off of a breaker which at the electrical panel and wished to see how long the UPS would provide power. It powered the modem, router and a bit of computer power outages. It was nice to know that I could have a few hours to run out of juice. This unit has enough power to provide power outages. It was nice to know that I could have a few hours to run out of juice.

★★★★★ **one minor complaint**

I bought 3 exactly one year ago. It supports my DVR. This morning, I found that the UPS was not powering the DVR. My Spectra UPS, no reason to think Brand of UPS matters, has been working for years. Anyway, the power light came on and a couple seconds later started flashing green then left a solid time. Reset doesn't help. Battery replacement needed. Not expected. This is not a fabrication (missing, etc.) before this.

★★★★★ **Don't buy**

The sound is very good. Unfortunately, this model doesn't work. We have purchased seven of the current model (with the hooked battery connector on the bottom) and three of the previous model (the one with the battery connector on the side). The battery connector on the side of the previous model is just long enough for a double-sided tape to hold it in place, which is fairly reliable. The new model has immediately within the minutes. The unit keeps once and the LED indicator on the power
