

▶ 3A, 7A and 12A switching regulators

Power-One SIS series

- ▶ Thru-hole mount configuration
- ▶ Single outputs, 3A, 7A and 12A versions
- ▶ Efficiency in excess of 93%
- ▶ Output over-current protection
- ▶ Remote On/Off for system sequencing
- ▶ Output voltage trim

▶ SPECIFICATIONS

INPUT

Input voltage:	See product selector table
Turn-on input voltage:	4.3Vdc for 5Vdc nominal input 10.4Vdc for 12Vdc nominal input
Under voltage lockout:	4.19Vdc for 5Vdc nominal input 8.2Vdc for 12Vdc nominal input
Turn-on time:	15ms maximum into 100% resistive load
Inrush current:	0.04A ² s
External capacitor, required:	4.7μF for 3A versions 100μF for 7A and 12A versions

OUTPUT

Output setpoint accuracy:	±1.5% V _{out}
Line regulation:	1% V _{out}
Load regulation:	0.5% V _{out}
Total output regulation:	3% V _{out} , all load, input voltage and temperature conditions

Dynamic regulation:	50-25-50 lout load change Peak deviation: $\pm 50\text{mV}$ pk-pk Settling time: $30\mu\text{s}$ nominal
Admissible load capacitance:	1000 μF : 3A versions 2000 μF : 7A and 12A versions
Output current limit:	115 to 150% of lout
Switching frequency:	300kHz nominal, V series 200kHz nominal, X series
Temperature coefficient:	0.01%/°C
Trim range:	90 to 110% Vout
External capacitor required:	4.7 μF , 3A versions 100 μF , 7A versions 220 μF , 12A versions
On/Off control voltage:	5.5Vdc referenced to ground

ENVIRONMENTAL AND MECHANICAL

Operating temperature range:	-40* to +55°C * A ceramic input capacitor for operation down to -40°C of the following value is needed 4.7 μF : 3A versions 100 μF : 7A versions 220 μF : 12A versions
Storage temperature range:	-40 to +125°C
Shock 3-axis:	50g minimum, half-sine wave
Sinusoidal vibration:	1, GR-63-Core, section 5.A.2
MTBF:	5.4 million hours, per Bell core TR-NWT-000332
Size:	63.5 x 14.0 x 10.4mm vertical mounting 63.5 x 15.0 x 14.0mm horizontal mounting
Connections:	Pin outs All models
