3-12V universal power supply to power many small electrical devices incl. changeable input plugs

The APS 1000 gives you the option to operate a variety of small electronic devices, such as handheld computers, digital cameras, measuring devices, MP3 players, CD players, etc. For best compatibility with many devices, a seven-part plug set is included. The usual jacks and barrel connectors contained therein ensure ideal contact. No matter which device should be operated.

The output voltage can be set through a rotary switch on the back of the power supply. The APS 1000 is short-circuit proof and voltage-stabilized. Suitable for consumers up to max. 1000mA, 12W.
