## ■ Technical Data

Frequency	50/60Hz
Input voltage	100-240Vac(nom); 90-264Vac(max)
Input Current	0.75A max. 220Vac/60Hz max. load
Inrush Current	50A max@120Vac, 100A max@230Vac
Efficiency	85% Efficiency level VI
Line Regulation	±1%
Load Regulation	±5% Note 2
Ripple and noise	1% Note 1
Over Voltage Protection	When the output voltage reaches the threshold point the power supply will latch and shutdown. The product needs to recycle the AC input to release the latch status. Range 59V-68Vdc
Short Circuit Protection	Output short to GND terminal will not be damaged. The power supply will auto-recover when the load short condition is removed. Short resistance <0.1ohm.
Over Power Protection	When max load exceeds 110%-160% the power supply will enter recovery mode automatically.
Input Protection	Fuse protection
Operation temperature	0 °C to + 40°C
