

FEATURES
56W Four Channels Output With Dimming
LSWCD056Q SERIES

- High Efficiency (up to 86%)
- Four Channels Output
- Build-in Active PFC (Typical 0.99)
- Dimming Function
- Safety approval pending

| Others | MTBF | 470,000 hours | | | | |
| | Life Time | 85,000 hours | | | | |
| | Dimensions | (L*W*H) 9.53*1.61*1.17 inches 242*41*29.8 mm | | | | |
| | Weight | 455g | | | | |

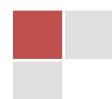

NOTE:

1. All specifications are typical at 25°C unless otherwise stated.
2. The "Efficiency" & "PF" values are measured at full load, after the unit is thermally stabilized, otherwise they will be lower about 1%
3. The "Ripple & Noise" values are measured by 20MHz bandwidth oscilloscope and the output paralleled a 0.1uF ceramic capacitor and 10uF electrolytic capacitor.

Dimming Function

Mode 1: 1-10Vdc Input on Dimming Control

Mode 2: External Resistor on Dimming Control
Note:

1. If the dimming function is not used, short 10V output pin (yellow) and 1-10V input pin (purple).
2. Io is actual output current and Ir is rated current without dimming control.
3. In order for the driver to operate properly, the load voltage must be maintained above the minimum voltage threshold, proximally 50% of the max output voltage for any given mode.
4. The dimming connector can operate under 1V, the output current can maintain about 10% Ir when dimming signal is between 0-1 V. LED's might flicker, It is strongly recommended to keep dimming voltage above 1V.
5. Do not connect the dimming GND to the output. Otherwise, the Led driver will not work normally.
