#### **Edison Power Distribution Blocks**

#### **Short-Circuit Current Rated Power Distribution Blocks**

We offer distinctly different styles of short-circuit current rated Power Distribution Blocks and Terminal Blocks to match different application needs.

- Enclosed style or Open style
- UL1953 Listed power distribution blocks or UL1059 Recognized terminal blocks, that have different minimum spacing requirements.

The table below can assist in the selection of the correct series for your application requirements.

#### Why are these important?

Assembly short-circuit current ratings (SCCRs) are now required in the 2005 NEC® and UL508A Listed industrial control panels.

Marking the SCCR on:

- Industrial Control Panels (NEC® 409.110)
- Industrial Machinery Electrical Panels (NEC® 670.3(A))
- HVAC equipment (NEC® 440.4(B)

The above sections are now required by the National Electrical Code. Power Distribution Blocks or Terminal Blocks not marked with an SCCR are typically one of the weakest links and may limit an assembly to no more than 10 kA SCCR per Table SB4.1 UL508A. The EPDB series and HPB series Power Distribution Blocks have increased spacing required where used in feeder circuits in equipment listed to UL508A. The PB series UL1059 Terminal Blocks must be evaluated for proper spacing. Also, for building wiring systems, the EPDB series and HPB series power distribution blocks can be used to meet the 2005 NEC® requirements in section 376.56(B) for power distribution blocks in wireways.

	Edison Power Distribution Blocks Selection Guide*											
Series	UL	HIAN 1 3   PANDIC		HVAC UL 1995	Wireways NEC® 376.56(B) (Requires UL 1953)

PB	UL 1059 Recognized Terminal Blocks	No****	Yes	No****	Yes	No****	Yes	No				

<sup>†</sup> IP-20 finger-safe under specific conditions.

<sup>\*\*\*\*\*</sup>Exception: Yes, if single pole units installed with proper spacings.

Minimum Space Requirements for Equipment									
UL Standard	Pai	etween Live ts of e Polarity	Spacing Between Live Parts and Grounded Parts or Enclosures,						
	Through Air @ 600V	Over Surface @ 600V	Through Air and Over Surface @ 600V						
508A Feeder Circuits, Table 10.2	1"	2"	1"						
508A Branch Circuits, Table 10.1	3/8"	1/2"	1/2"						
UL 1995 HVAC	3/8"	1/2"	1/2"						

Note: Refer to specific UL standards for complete spacing details.

www.automationdirect.com

<sup>\*</sup>Refer to specific UL standards and NEC sections for a complete application guide.

<sup>\*\*</sup>When protected by proper fuse class with maximum ampere rating specified or smaller.

This does not apply to PB40, PB51 and PB71 series.

<sup>\*\*\*</sup>See Minimum Space Requirements for Equipment table below.

<sup>\*\*\*\*</sup>Optional covers are available. They are not IP-20 rated, but do provide additional protection against direct contact with Live Parts.

## **EPDB Series Edison Finger-Safe Power Distribution Blocks**

### Finger-safe distribution blocks

Use Finger-safe Power Distribution Blocks to manage your power distribution needs, from splitting primary power circuits into a variety of branch circuits to providing a fixed junction tap-off point. The modular design allows the end user to select and configure the number of poles required by each application. These blocks are engineered to allow copper and aluminium conductors and maintain an SCCR rating of 200kA. These features make these blocks the perfect solution to today's power circuit wiring requirements.

#### **Features**

- Fully enclosed block for touch-safe isolation of live parts
- IP20 rating under specific conditions
- Integrated DIN-rail or direct panel mounting. (Panel mount only for EPDB306 and EPDB702)
- Captive termination screws cannot be lost
- Used in UL508A panels for both feeder and branch circuit applications
- Suitable for both factory and field wiring
- Tin-plated aluminum connectors suitable for copper and aluminum conductors

#### **Ratings**

- Ampere ratings from 175 Amps to 760
- 600 VAC or VDC
- Short Circuit Current Rating (SCCR) 200kA with proper fusing
- Flammability: UL 94V0

#### **Agency Approvals**

- UL 1953 Listed File E256146, Guide QPQS
- CSA Certified Class 6228-01, File 700490
- CE component IEC 60947-7-1
- IEC-60529, IP20 (Finger-Safe) See table for specific conditions.

	Finger-safe Power Distribution Blocks Selection Table											
Series	Part Number	Amps	Description	SCCR Rtg	Qty	Weight	Price	Drawing Link				
	EPDB101	175 max	1 pole distribution block, 1 in/1 out	200 kA	1	3.4 oz.	\$20.50	PDF				
	EPDB104	175 max	1 pole distribution block, 1 in/4 out	200 kA	1	4.2 oz.	\$30.50	<u>PDF</u>				
Finger-safe	EPDB301	310 max	1 pole distribution block, 1 in/1 out	200 kA	1	8.1 oz.	\$48.00	<u>PDF</u>				
(EPDB)	EPDB306	380 max	1 pole distribution block, 1 in/6 out	200 kA	1	9.1 oz.	\$70.00	<u>PDF</u>				
	EPDB512	570 max	1 pole distribution block, 2 in/12 out	200 kA	1	12.5 oz.	\$78.00	<u>PDF</u>				
	EPDB702	760 max	1 pole distribution block, 2 in/2 out	200 kA	1	16.4 oz.	\$127.00	PDF				
Accessory	DN-EB35*	_	End bracket	_	50	1.87 lb.	\$67.00	N/A				

\*Note: DIN-rail anchors are required on block or blocks. Anchors must be used to prevent damage to the plastic housing when tightening terminals.

Finger-safe Power Distribution Block General Specifications								
Wire Type	75°C*, Cu/Al							
Voltage	600 VAC or VDC maximum (UL 1953), 690 VAC/VDC (IEC)							
Operating Temperature	-10°C to 60°C [14°F to 140°F]							
Storage Temperature	-20°C to 60°C [-4°F to 140°F]							
Mounting	35mm DIN rail (DN-R35S1) or surface mount.							

\*Note: Amp Rating is based on NEC table 310.16 for 75°C wire.
