

Features

No revision without agency approval.

To view or download the latest technical information about this product, including specifications, dimensions, accessories, and wiring, go to www.bannerengineering.com.

- Designed for use with approved amplifiers and intrinsically safe barriers in explosive environments
- NAMUR compliant sensor with the rugged design and exceptional optical performance of Q45 series sensors
- Output passes ≤ 1.2 mA in the "dark" condition and ≥ 2.1 mA in the "light" condition
- Internal multi-turn SENSITIVITY (Gain) control accessible beneath hinged, o-ring sealed top cover
- Models are available with an integral cable or a quick-disconnect connector
- Supply voltage: 5 to 15 V DC

WARNING:

- **Do not use this device for personnel protection**
- Using this device for personnel protection could result in serious injury or death.
- This device does not include the self-checking redundant circuitry necessary to allow its use in personnel safety applications. A device failure or malfunction can cause either an energized (on) or de-energized (off) output condition.

Q45AD9 NAMUR Models

Standard 2 m (6.5 ft) cable models are listed. To order the 9 m (30 ft) cable model, add suffix "W/30" to the cabled model number (Q459E W/30). Models with a QD connector require a mating cable (see Accessories list).

Opposed Models - Emitter (E) and Receiver (R)

Models	Cable	Performance	Output Type
Q459E	2 m (6.5 ft)	880 nm, infrared Range: 6 meters (20 feet)	Constant current ≤ 1.2 mA dark ≥ 2.1 mA light
Q459EQ	4-pin M12 QD		
Q45AD9R	2 m (6.5 ft)		
Q45AD9RQ	4-pin M12 QD		

Retroreflective Models

Retroreflective range is specified using one model BRT-3 P retroreflector (3-inch diameter). Actual sensing range may be more or less than specified, depending upon the efficiency and reflective area of the retroreflector(s) in use.

Non-Polarized Models	Cable	Performance	Output Type
Q45AD9LV	2 m (6.5 ft)	680 nm, visible red Range: 9 m (30 ft)	Constant Current ≤ 1.2 mA dark ≥ 2.1 mA light
Q45AD9LVQ	4-pin M12 QD		
Polarized Models	Cable	Performance	Output Type
Q45AD9LP	2 m (6.5 ft)	680 nm, visible red Range: 6 m (20 ft)	Constant Current ≤ 1.2 mA dark ≥ 2.1 mA light
Q45AD9LPQ	4-pin M12 QD		

Diffuse Models

Performance curves are based on a 90% reflectance white test card.

Short Range Models	Cable	Performance	Output Type
Q45AD9D	2 m (6.5 ft)	880 nm, infrared Range: 300 mm (12 in)	Constant Current ≤ 1.2 mA dark ≥ 2.1 mA light
Q45AD9DQ	4-pin M12 QD		

Long Range Models	Cable	Performance	Output Type
Q45AD9DL	2 m (6.5 ft)	880 nm, infrared Range: 1 m (40 in)	Constant Current ≤ 1.2 mA dark ≥ 2.1 mA light
Q45AD9DLQ	4-pin M12 QD		

Convergent Models

Convergent mode models operate at 680 nm, visible red. Performance curves are based on a 90% reflectance white test card.

Models	Cable	Focus	Output Type
Q45AD9CV	2 m (6.5 ft)	38 mm (1.5 in) Spot size at focus: 1.3 mm (0.05 in)	Constant Current ≤ 1.2 mA dark ≥ 2.1 mA light
Q45AD9CVQ	4-pin M12 QD		
Q45AD9CV4	2 m (6.5 ft)	100 mm (4 in) Spot size at focus: 1.5 mm (0.06 in)	Constant Current ≤ 1.2 mA dark ≥ 2.1 mA light
Q45AD9CV4Q	4-pin M12 QD		

Plastic Fiber Optic Models

Performance curves are based on a 90% reflectance white test card.

Models	Cable	Performance	Output Type
Q45AD9FP	2 m (6.5 ft)	660 nm, visible red Range: varies by sensing mode and fiber optics used	Constant Current ≤ 1.2 mA dark ≥ 2.1 mA light
Q45AD9FPQ	4-pin M12 QD		

Glass Fiber Optic Models

Performance curves are based on a 90% reflectance white test card.

Models	Cable	Performance	Output Type
Q45AD9F	2 m (6.5 ft)	880 nm, infrared Range: varies by sensing mode and fiber optics used	Constant Current ≤ 1.2 mA dark ≥ 2.1 mA light
Q45AD9FQ	4-pin M12 QD		

Models	Cable	Performance	Output Type
Q45AD9FV	2 m (6.5 ft)	650 nm, visible red Range: varies by sensing mode and fiber optics used	Constant Current ≤ 1.2 mA dark ≥ 2.1 mA light
Q45AD9FVQ	4-pin M12 QD		

Q45AD9 NAMUR Sensor Overview

The Q45AD9 Series NAMUR Sensor is a rugged, self-contained two-wire sensor designed for use with certified intrinsically safe switching amplifiers and barriers (Approved Apparatus) with intrinsically safe circuits.

The Q45AD9 Series NAMUR sensor is designed in accordance with DIN 19234 (IEC/EN 60947-5-6) for operation via two-wire connection to an Approved Apparatus controlled by the variable internal resistance of the sensor.

The sensor varies the impedance across the sensor output, which passes 1 mA or less in the "dark" condition and 2 mA or more in the "light" condition. A highly visible red LED indicator is located beneath a raised transparent dome on top of the sensor.

- SIGNAL—LED lights red when the sensor sees its modulated light source
- POWER (Emitters only)—LED lights red when 5 to 15 V dc power is applied

Multi-turn sensitivity control on top of sensor, beneath a transparent cover, allows precise sensitivity setting (turn clockwise to increase gain).

Models are available with either a 2 m (6.5 ft) or 9 m (30 ft) long attached PVC-covered cable, or a 4-pin M12/Euro-style quick disconnect (QD) connector. Quick disconnect models (with Q in the model number suffix) use MQD9-4.. mating cable (either straight or right angle connector; see ["Accessories" on page 9](#)). Contact Banner Engineering for the availability of sensor models with 9 m (30 ft) long attached cable.

Installation Instructions

Q45AD9 Ex/HazLoc Applications

WARNING:

- **Explosive Atmospheres/Hazardous Locations**
- It is the user's responsibility to ensure that all local, state, and national laws, rules, codes, or regulations relating to the installation and use of this device in any particular application are satisfied. This device must be installed by a Qualified Person⁽¹⁾, in accordance with this document and applicable regulations.

WARNING:

- **Explosion Hazard**
- Do not disconnect equipment unless the power has been switched off or the area is known to be non-hazardous.

CAUTION:

- **Electrostatic Discharge (ESD) Special Conditions for Safe Use**
- Parts of the enclosure are non-conducting and can generate an ignition-capable level of ESD.
- Clean the equipment with only a damp cloth.

General Notes and Conditions for Use:

- See Specifications and Wiring Diagrams for important information concerning entity parameters, permissible locations, electrical connections and certifications.
- In addition to the warning above concerning user responsibility, the installation must comply with the following:
 - All installations must comply with all manufacturer's instructions.
 - U.S. Installations: The relevant requirements of the National Electrical Code® (ANSI/NFPA-70 (NEC®) and when appropriate ANSI/ISA-RP12.06.01 Installation of Intrinsically Safe Systems for Hazardous (Classified) Locations.
 - Canadian Installations: The relevant requirements of the Canadian Electrical Code (CSA C22.1).
 - ATEX and IECEx Installations: The relevant requirements of EN IEC 60079-14 and applicable National regulations.
 - For quick disconnect (QD) models only: Use Banner **MQD9-4##** cordsets (see "[Quick-Disconnect \(QD\) Cables](#)" on page 9), or suitable M12 quick disconnect cordsets with threaded retaining nut (see "[Q45AD9 Specifications](#)" on page 4). The cordset must be securely fastened using the M12x1 QD retaining nut to prevent disconnection. Maximum connector torque: 6 ft-lbs.
- Do not attempt any repairs to this device; it contains no field-replaceable parts or components. Tampering and/or replacement with non-factory components may adversely affect the safe use of the system.
- Approved Apparatus entity parameters must meet the following requirements:
 - $V_{oc} \text{ or } V_t \leq V_{max}$
 - $C_a \geq C_i + C_{cable}$
 - $I_{sc} \text{ or } I_t \leq I_{max}$
 - $L_a \geq L_i + L_{cable}$
- Sensor Entity Parameters:
 - $V_{max} (U_i) \leq 15 \text{ V dc}$
 - $I_{max} (I_i) \leq 60 \text{ mA}$
 - $P_i \leq 225 \text{ mW}$
 - $C_i = 0.3 \text{ }\mu\text{F}$
 - $L_i = 0 \text{ mH}$
- Cable Entity Parameters (if unknown):
 - $C_{cable} = 60 \text{ pF/ft}$
 - $L_{cable} = 0.2 \text{ }\mu\text{H/ft}$
- The ambient operating temperature range of the Sensors is $-40 \text{ }^\circ\text{C}$ to $+70 \text{ }^\circ\text{C}$ ($-40 \text{ }^\circ\text{F}$ to $+158 \text{ }^\circ\text{F}$).
- For U.S. installations, Class II and III, Division 2 applies only to model numbers ending in a Q suffix.
- For intrinsically safe installations, sensors must be used with certified intrinsically safe switching amplifiers and barriers (Approved Apparatus) with intrinsically safe circuits that limit supply voltage and current in the event of failures.
- Associated Apparatus is not required for installation of the devices within a Division 2 hazardous (classified) location when installed per the National Electrical Code. The maximum voltage for Division 2 installation is 15 V DC. In Division 2 installations (without Associated Apparatus), observe Explosion Hazard warning at the beginning of this section.
- Associated Apparatus is not required for installation of the devices within a Division 2 hazardous (classified) location when installed in, or through the wall of a suitable enclosure with provision for connection of rigid metal conduit per the Canadian Electrical Code, as acceptable to the local inspection authority having jurisdiction. The maximum rating for Division 2 installation is 15V dc, 60 mA. In Division 2 installations (without Associated Apparatus), observe Explosion Hazard warning at the beginning of this section.

⁽¹⁾ A Qualified Person is a person who, by possession of a recognized degree or certificate of professional training, or who, by extensive knowledge, training and experience, has successfully demonstrated the ability to solve problems relating to the subject matter and work.

- Maximum non-hazardous area voltage that the Approved Apparatus (intrinsically safe circuit) is connected to must not exceed 250 V.
- Intrinsic safety ground, if required for the Associated Apparatus, shall be less than 1 ohm.

Q45AD9 Wiring Connections

Q45AD9 Series NUMAR sensors are intrinsically safe **ONLY** when used with certified intrinsically safe switching amplifiers and barriers (Approved Apparatus) with intrinsically safe circuits. Banner does not manufacture such devices; however, our applications engineers can refer you to suppliers of certified devices that will interface with Banner sensors.

The user is responsible for proper installation and maintenance of this equipment and must conform with the certification requirements relating to barriers and to maximum allowable capacitance and inductance of the field wiring. If in doubt about these requirements, our applications engineers can refer you to the appropriate authority.

Hydrocarbon Leak Detectors and Water Leak Detection (FM7745 Approval)

Models: **Q45AD9F(Q)** and **BTxxSM900** Glass Fiber

Performance is compliant as a Hydrocarbon Leak Detector and as a Water Leak Detector when used with BTxxxSM900 glass fiber optic accessory.

Application Notes:

- The installation must comply with all installation instructions contained in this document.
- The liquid to be detected must have an index of refraction different from that of air (i.e., typically not clear or colorless).
- The liquid to be detected must be non-viscous (so that it does not cling to the probe tip) for the optical principle of the probe to function correctly.
- The probe must be mounted a minimum of 50 mm (2 in) from a light-colored (e.g., white) or shiny (e.g., stainless steel) background to prevent false proxing in the presence of the fluid.
- The Q45AD9F(Q) gain adjustment must be used to set the excess gain to an acceptable level to ensure that the amount of internal probe reflection will reliably drop below the threshold level when fluid is present.
- When the sensor is configured correctly, the liquid contacting the tip causes the Q45 LED light to scatter into the liquid. This allows sensor to detect the liquid and cause a "dark" condition.
- Scheduled maintenance must include inspecting and cleaning the probe tip to prevent contamination (e.g. dust) from building up on the probe tip. If any damage to the probe tip or the fiber optic cable is found, the damaged item must be immediately replaced.

Q45AD9 Specifications

Supply Voltage and Current

5 to 15 V DC; Supply voltage is provided by the amplifier to which the sensor is connected.

Adjustments

Multi-turn sensitivity control on top of sensor, beneath a transparent o-ring sealed cover, allows precise sensitivity setting (turn clockwise to increase gain).

Output

Constant current output: ≤ 1.2 mA in the "dark" condition and ≥ 2.1 mA in the "light" condition

Output Response Time

Opposed mode receiver: 2 milliseconds on/0.4 milliseconds off. All others 5 milliseconds on/off (does not include amplifier response)

Construction

Molded thermoplastic polyester housing, o-ring sealed transparent Lexan® top cover, molded acrylic lenses, and stainless steel hardware. Q45s are designed to withstand 1200 psi washdown. The base of cabled models has a 1/2-inch NPS integral internal conduit thread. ⁽¹⁾

Environmental Rating

Banner tested to NEMA 6P, IEC IP67

Application Note

Special Conditions for Safe Use: Parts of the enclosure are non-conducting and may generate an ignition-capable level of ESD. Cleaning of the equipment must be done only with a damp cloth.

⁽¹⁾ Lexan® is a registered trademark of General Electric Co.

Indicators

Indicator LEDs are highly visible, located beneath a raised transparent dome on top of the sensor.

POWER (red) LED (emitters only) lights whenever 5 to 15 V DC power is applied

SIGNAL (red) LED lights whenever the sensor sees its modulated light source

Operating Conditions

Temperature: -40 °C to +70 °C (-40 °F to +158 °F)

Maximum relative humidity: 90% at 50 °C (non-condensing)

Connections

PVC-jacketed 2 m (6.5 ft) or 9 m (30 ft) cables, or 4-pin M12 quick-disconnect (QD) fitting are available. QD cables are ordered separately. See "[Quick-Disconnect \(QD\) Cables](#)" on page 9.

Connecting 4-pin M12 QD Cordsets (see "[Quick-Disconnect \(QD\) Cables](#)" on page 9): Female single-ended Multiconductor cable (at minimum): UL Style 2517, 24 AWG wire, rated ≥ 80 °C; M12 QD connector: per IEC 61076-2-101, must have threaded M12 × 1 retaining nut.

Banner Engineering Corp Limited Warranty

Banner Engineering Corp. warrants its products to be free from defects in material and workmanship for one year following the date of shipment. Banner Engineering Corp. will repair or replace, free of charge, any product of its manufacture which, at the time it is returned to the factory, is found to have been defective during the warranty period. This warranty does not cover damage or liability for misuse, abuse, or the improper application or installation of the Banner product.

THIS LIMITED WARRANTY IS EXCLUSIVE AND IN LIEU OF ALL OTHER WARRANTIES WHETHER EXPRESS OR IMPLIED (INCLUDING, WITHOUT LIMITATION, ANY WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE), AND WHETHER ARISING UNDER COURSE OF PERFORMANCE, COURSE OF DEALING OR TRADE USAGE.

This Warranty is exclusive and limited to repair or, at the discretion of Banner Engineering Corp., replacement. **IN NO EVENT SHALL BANNER ENGINEERING CORP. BE LIABLE TO BUYER OR ANY OTHER PERSON OR ENTITY FOR ANY EXTRA COSTS, EXPENSES, LOSSES, LOSS OF PROFITS, OR ANY INCIDENTAL, CONSEQUENTIAL OR SPECIAL DAMAGES RESULTING FROM ANY PRODUCT DEFECT OR FROM THE USE OR INABILITY TO USE THE PRODUCT, WHETHER ARISING IN CONTRACT OR WARRANTY, STATUTE, TORT, STRICT LIABILITY, NEGLIGENCE, OR OTHERWISE.**

Banner Engineering Corp. reserves the right to change, modify or improve the design of the product without assuming any obligations or liabilities relating to any product previously manufactured by Banner Engineering Corp. Any misuse, abuse, or improper application or installation of this product or use of the product for personal protection applications when the product is identified as not intended for such purposes will void the product warranty. Any modifications to this product without prior express approval by Banner Engineering Corp will void the product warranties. All specifications published in this document are subject to change; Banner reserves the right to modify product specifications or update documentation at any time. Specifications and product information in English supersede that which is provided in any other language. For the most recent version of any documentation, refer to: www.bannerengineering.com.
