

WLS28-2 IR LED Strip Light

Datasheet

Banner's WLS28-2 IR LED Strip Lights have sturdy aluminum housings, shatterproof windows, and impressive environmental ratings, making them a cost-effective night vision camera or machine vision light to improve and enhance contrast in IR applications.

- Low-profile, space-saving design
- Rugged, water-resistant IP69K option
- Available in four lengths from 285 mm to 1130 mm (11.22 in to 3.7 ft)
- Lensed models or choice of clear or diffuse window
- Daisy chain power to multiple lights
- Optional snap clips for easy installation and repositioning
- Capability to dim lights using the wiring pinout (Hi/Lo/Off)
- Optional switch is now Hi/Lo/Off
- Automatic temperature protection built into the unit. Above 50 °C, the light dims to manage heat and protect product lifetime
- PWM models can be used for strobed operation

Note: When cascading lights, a model with an ON/OFF switch can be used to control the lights cascaded off the switched model.

Stand-Alone Light—cable

First Light in a Cascade—cable

Stand-Alone Light or End Light in a Cascade—QD

First or Middle of a Cascade—QD

Banner's WLS28-2 IR LED Strip Light has a sturdy aluminum housing and is encased in a shatterproof, UV-stabilized, copolyester shell, making it ideal for harsh indoor and outdoor applications.

Stand-alone models have a male quick disconnect (QD) at one end for power connection and no connections at opposite end. A stand-alone model may be used as the last in the cascade series.

Cascade models have a male quick disconnect (QD) at one end for power connection, and a female QD at the opposite end for connecting to other lights in the cascade. A double-ended accessory cordset must be used between each pair of lights in a cascade.

Application Note

When connecting cascadable lights in series at 100% intensity, it is important not to exceed maximum current limitations:

Maximum length of light at 12 V dc: 1.4 m (4.6 ft)
Maximum length of light at 24 V dc: 3.0 m (9.8 ft)
Maximum length of light at 30 V dc: 3.1 m (10.2 ft)

At 50% intensity, double the lengths.
