

FA/FU Series - Fiber optic sensors

Sensors

FA/FU Series

Fiber optic sensors

Carlo Gavazzi offers complete fiber optic sensor range that includes the amplifier, myriads of different fiber units, namely the plastic, glass, array, fork, side beam and many other specific usage fiber units as well as different lenses.

The plastic fiber units come with the over-molding protection for better fiber curvature and bending. Available in different diameters, they can detect objects as small as $\varnothing 0.03$. Moreover, the glass fiber is protected by a stainless steel sheath that can be used in applications with high temperatures up to 250° Celcius.

Coupled together with the robust and user friendly fiber optic amplifier, many applications requiring precision detection can now be satisfied.

Complete fiber optic sensor range

Robust and user-friendly amplifier

The multifunction amplifier can be easily configured and comes with two displays, adjustable signal threshold, response time, time delay, NO/NC output and many other features.

Large variety of types

Many different types of fiber units to choose from to satisfy different application needs, for instance plastic, glass, array, fork, side-beam and tube.

Different sensing ranges and detectable object size

By using different fiber units and adjusting the fiber amplifier, different sensing distances and detection of the smallest detectable object can be achieved. Objects as small as $\varnothing 0.03$ can be detected.

Different fiber unit head size and orientation for different mounting needs

Different head sizes, M6, M4 and M3 with straight or angled version to cater for different mounting needs.

Optional sleeve for more convenient mounting at space-restricted applications.

Overmoulding protection

The fiber units are designed with overmoulding protection for better fiber-curvature and bending protection.

High operating temperature

Equipped with a stainless steel sheath, the glass fiber units can operate in temperatures of up to 250° Celcius, and the plastic fiber units can operate in temperatures of up to 70° Celcius.

Approvals

CE (EN60947-5-2)
cULus (UL508)

Applications

Semiconductor

- Detecting PCB boards
- Detecting tiny electronic components

Material handling

- Detecting items on the conveyor
- Detecting items in the feeder bowl

Packaging & wrapping

- Detecting bottles and caps
- Detecting boxes

Textile

- Detecting thread in textile machines

Paper mill and printing

- Detecting paper thickness
- Paper alignment in the printing machine

FA/FU Series

Fiber optic sensors

FA1 – Fiber optic amplifier

Robust, flexible and user-friendly fiber optic amplifier. Comes with a 2 x 4 digits LED display to show the signal level and threshold.

FA1 is equipped with a 3-way adjustment switch to adjust sensitivity, different response time and time delay functions.

The sensor output is either NPN or PNP and can be selected to be light ON or dark ON.

Features

- 2 x 4 digits displays for threshold and signal level
- Easy adjustment via a 3-way adjustment switch
- Adjustable response time: 200, 500, 1000 and 5000 μ s
- ON, OFF, ON one shot, OFF one shot delay timer
- 100mA NPN or PNP output
- Light ON or dark ON output

Technical data

Operating voltage	12 - 24 VDC
Operating frequency	Max. 2.5 kHz
Response time	Selectable 200, 500, 1000, 5000 μ s
Output	100 mA, NPN or PNP, Light ON/dark ON selectable
Light source	Red LED 660 nm
Operating temperature	0 to +60°C
Housing material	ABS
Connection cable	PVC, black 2m, 3 wires
Degree of protection	IP40
Protection	Short circuit, reverse polarity, transients
Dimension	10 x 33 x 80 mm
Approvals	 

Type selection

NPN Light ON or dark ON swicthing	PNP Light ON or dark ON swicthing
FA1-N	FA1-P

FUR-FUT - Fiber optic units

The plastic fiber units come with overmoulding protection for better fiber-unit curvature and bending protection.

Many varieties to choose from to suit different application needs

Plastic fiber unit

Angled plastic fiber unit

Glass fiber unit

note*: Due to design and engineering limitations, not every model of array fiber unit comes with the overmoulding protection. Please refer to the dimensional drawings.

FUR – Tube26-20

Based on the theory of refraction, this fiber unit can easily be fixed on a tube to detect the liquid level inside the tube.

The fiber unit is light-weight, easy to install and can be attached at a tube from Ø6 to 26mm with a tubewall thickness less than 3mm.

*opaque white liquid is excluded
