

Conductive Sensors Level Hanging Probes Types VH3, VH4

CARLO GAVAZZI

- Electrodes for swimming pools, wells and reservoirs
- VH3: Resistant to high levels of chlorine and salt water with a high level of salinity
- VH4: Simple and easy to install level probes for general use. With double screw terminal for secure cable connection
- Can be used outdoors under sunlight
- Without (VH4) or with (VH3) 6m UV resistant PVC cable.
- Snap-on bracket for easy and secure installation

Product Description

VH3 is a level hanging probe specifically designed to be used in swimming pools and resists high chlorine and high salinity sea water. It is also suitable to be used in wells, reservoirs and tanks. VH4 is a simple and easy to

install level probe for general use. VH3-4-MB1 Snap-on brackets for easy and secure installation. For use with the level amplifier CLD/CLP series.

Tightening torque	VH3-4-MB1	min/max 0.4Nm/0.8Nm DIN85 M4 Pan head screw	Vibration		10-150 Hz, 1mm/7.5 g IEC 60068-2-6)
Recommended VH4 cable cross section		Min. 1 x 0.75 mm ² , Max. 1 x 2.5 mm ²	Rough handling		2 x 1 m & 100 x 0.5 m (IEC 60068-2-31)
Outer diameter		Max. Ø 4 mm	Shock		11 ms x 30 g (IEC 60068-2-27)
			Approvals		CE marking: EN 60947-1 RoHS

Dimensions

Installation Hints

Step 1
Align the probe to the positioning pin of the bracket. Clamp the probe firmly in place.

Step 2
A misalignment of the pin and the blind hole prevents proper installation of the probe.

Step 3
Once the probe is snapped into the bracket, you can secure it with a cable tie around the recess on the rear of the bracket.

Relief of the cable strain

The cable should not be pulled
