PLATINUM EFFICIENCY, FULLY MODULAR AND VIRTUALLY SILENT

CORSAIR HX series power supplies give you extremely tight voltage regulation, quiet operation, Platinum-certified efficiency, and a fully modular cable set. Built with all Japanese 105°C capacitors, they're a great choice for high performance PCs where reliability is essential.

80 PLUS PLATINUM

QUIET, EFFICIENT OPERATION

80 PLUS Platinum efficiency reduces operating cost and excess heat, and Zero RPM fan mode ensures virtual silence at low and medium loads.

100% JAPANESE 105°C CAPACITORS

Premium internal components ensure solid power delivery and long term reliability.

CORSAIR GUARANTEE 10 YEARS

TEN YEAR WARRANTY

Your guarantee of reliable operation that will last across several system builds.

ZERO RPM FAN MODE

Since the fan doesn't turn on until it's needed, you'll enjoy virtually silent operation at low and medium loads.

ULTRA LOW NOISE

POWER IN YOUR HANDS

Toggle single +12V rail or multi +12V rail mode. In the "SINGLE" position, the full output capability of the power supply's +12V rail is available to any and all connectors, while in the "MULTIPLE" position, each individual connector has Over-Current Protection so no more than 40A of current can be delivered on any given cable.

EASY INSTALLATION

The fully modular DC cables make builds and upgrades easy, with clean, great-looking results.
