

## SmartOnline 277/480V 3-Phase Wye 80kVA Modular 3-Phase UPS System, On-line Double-Conversion UPS for North America

MODEL NUMBER: SU80KTV

### **Description**

Tripp Lite's SU80KTV (80kVA) SmartOnline Modular 3-Phase Intelligent, True On-Line UPS System provides 100% system availability with N+1 modular architecture and 1+1 parallel capability. In an N+1 configuration, the SU80KTV features four self-contained, redundant 20kVA power modules that can be hot-swapped (with the load powered) if maintenance is required. Connect two SU80KTV models in parallel (1+1 configuration) to provide fail-safe redundancy (two 80kVA models supporting a 80kVA load) or to increase capacity (two 80kVA models supporting a 160kVA load).

The SU80KTV provides mission-critical equipment with the highest level of power protection available. Large capacity 80,000VA/64,000W UPS continually converts incoming AC power into filtered DC power, and then resynthesizes it back into AC power with a pure sine wave. Perfectly regulated, continuous sine wave output with zero transfer time offers compatibility with all equipment types. The SU80KTV's high input power factor, advanced IGBT inverter technology and Digital Signal Processor (DSP) technology create less than 3% input Total Harmonic Distortion (THDi). With SU80KTV's low THDi, generators run cooler and last longer, allowing managers to save installation costs by installing a generator with a capacity equal to their equipment load (a 1:1 ratio). Extremely efficient operation (up to 96%) saves money by lowering electricity consumption. Hardwire input and output connections. The SU80KTV features 277/480VAC, 3-phase, 4-wire (plus ground), wye input and output. It also features a wide input voltage correction range (218-348/378-603VAC at full load). Frequency is 50 or 60 Hz (auto-selectable). The SU80KTV features a single small-footprint tower power module. A stand-alone hardwired external battery module (Model or BP480V40C with matching battery cabinets, available separately) is required for operation and to provide battery backup support. Additional external BP480V40C battery modules can be connected for extended runtime. Other battery cabinets for extended runtime solutions also available; contact Tripp Lite for more information. A manual bypass breaker as well as an automatic bypass function ensure 100% availability of connected equipment by safely passing through AC power if the UPS requires maintenance. A built-in RS-232 communication port works with PowerAlert Software, available via free

### **Highlights**

- 80,000 VA (80kVA) tower UPS with 4 hot-swappable power modules
- N+1 redundant modular architecture helps ensure 100% availability
- 1+1 parallel capability allows for system redundancy or increased capacity
- Low THDi saves installation costs by allowing 1:1 generator sizing
- 3-phase hardwire (277/480VAC) input/output. Wide input voltage correction range (218-348/378-603VAC at full load)
- On-line, double-conversion operation with zero transfer time; IGBT technology; extremely efficient operation (up to 96%)
- Runtime is expandable via external battery cabinet options

#### **Package Includes**

- SU80KTV UPS System
- Serial cable
- Parallel cable (for 1+1 operation)
- Instruction manual and startup checklist
- Warranty information

download, to provide shutdown commands and condition reporting. Compatible with Tripp Lite UPS management card options. Front panel combination LCD/LED display alerts users to a variety of UPS operational modes and conditions. The LCD display includes a real-time event log screen with up to 500 events listed. A dynamic battery management screen optimizes battery function to lengthen service life and allows cold restart of UPS during a prolonged blackout to utilize its batteries for periodic system access or data retrieval. An Emergency Power Off button turns UPS output OFF and disables Bypass output. Built-in Emergency Power Off (EPO) dry-contact interface supports remote emergency shutdown in large facilities. A start-up service program is recommended to enhance the reliability of the installation.

#### **Features**

- N+1 configuration: four self-contained, redundant 20kVA power modules can be hot-swapped (with the load powered) if maintenance is required
- 1+1 configuration: connect two SU80KTV models in parallel to provide fail-safe redundancy or to increase capacity
- High input power factor, advanced IGBT inverter technology and Digital Signal Processor (DSP) technology create low input Total Harmonic Distortion (THDi)
- Extremely efficient operation (up to 96%) saves money by lowering electricity consumption
- True on-line, double conversion UPS with IGBT technology provides pure, sine wave AC output at all times
- Maintains continuous operation through blackouts, voltage fluctuations and surges with zero transfer time
- Removes harmonic distortion, electrical impulses, frequency variations and other hard-to-solve power problems
- 80,000VA/64,000W power capacity with 3-phase, hardwire 277/480VAC input/output connections
- Features a wide input voltage correction range (218-348/378-603VAC at full load)
- Precision +/-1% output voltage regulation
- A stand-alone hardwired external battery module (Model BP480V40C, available separately from Tripp Lite) is required for operation and to provide battery backup support. Additional external battery modules can be connected for extended runtime.
- Front panel combination LCD/LED display includes a real-time event log screen with up to 500 events listed
- Dynamic battery management screen optimizes battery function to lengthen service life and allows cold restart of UPS
- Serial port enables data-saving unattended shutdown when used with Tripp Lite's PowerAlert software, available via FREE download from <a href="mailto:tripplite.eaton.com/products/power-alert">tripplite.eaton.com/products/power-alert</a>
- Compatible with Tripp Lite UPS management card options TLNETCARD, WEBCARDLX, SNMPWEBCARD, MODBUSCARD and RELAYIOCARD
- Emergency Power Off button turns UPS output OFF and disables Bypass output
- Built-in Emergency Power Off (EPO) dry-contact interface supports remote emergency shutdown in large facilities
- Start-up service program is recommended to enhance the reliability of the installation

# **Specifications**

OVERVIEW	
UPC Code	037332142405
UPS Type	On-Line

INPUT		
Input Phase	3-Phase	
Rated input current (Maximum Load)	97A (per phase, online)	
Nominal Input Voltage(s) Supported	277/480V 3-PH Wye	
UPS Input Connection Type	Hardwire	
UPS Input Connection Description	277/480V (3-Phase, 4 Wire, wye)	
ОИТРИТ		
Output Capacity (VA)	80000	
Output Capacity (kVA)	80	
Output Capacity (Watts)	64000	
Output Capacity (kW)	64	
Power Factor	0.8	
Crest Factor	3:1	
Frequency Compatibility	50 / 60 Hz	
Output Voltage Regulation (Line Mode)	+/-1%	
Output Voltage Regulation (Battery Mode)	+/-1%	
Output AC Waveform (AC Mode)	Sine wave	
Output AC Waveform (Battery Mode)	Pure Sine wave	
Nominal Output Voltage(s) Supported	277/480V 3-PH Wye	
Output Receptacles	Hardwire	
Individually Controllable Load Banks	No	
BATTERY		
Expandable Runtime	Yes	
Expandable Runtime Description	External battery pack wiring is contractor supplied	
External Battery Pack Compatibility	BP480V200; BP480V300; BP480V400; <a class="productLink" href="//tripplite.eaton.com/External-Battery-Pack-for-select-Tripp-Lite-3-Phase-UPS-Systems~BP480V40C">BP480V40C</a> ; <a class="productLink" href="//tripplite.eaton.com/External-Battery-Pack-3-Phase-UPS-Systems~BP480V500">BP480V500</a>	
DC System Voltage (VDC)	+/- 240VDC	
Battery Recharge Rate (Included Batteries)	2 - 4 hours from 10% to 90%	
Battery Replacement Description	Hot-swappable, replaceable batteries	
VOLTAGE REGULATION		
Voltage Regulation Description	Online, double-conversion power conditioning	

Overvoltage Correction	Maintains continuous operation without using battery power during overvoltages to 348/603 (3-Phase, 4-Wire, wye)
Undervoltage Correction	Maintains continuous operation without using battery power during brownout / undervoltage conditions to 218/378 (3-Phase, 4-Wire, wye)
USER INTERFACE, ALERTS & CON	ITROLS
Switches	ON button turns UPS's inverter ON. OFF button turns UPS's inverter OFF. LCD Display Control Buttons browses through and selects items displayed on LCD screen. Emergency Power Off button turns UPS output OFF and disables Bypass output. Manual Bypass breaker bypasses the UPS's inverter during maintenance.
Alarm Cancel Operation	Power-fail alarm can be silenced using alarm-cancel switch
Audible Alarm	Alarms warn against a variety of operational conditions: low-battery, overload, shutdown, bypass and more
LED Indicators	4-LED Display: Displays normal AC input, on battery power, bypass input and fault conditions
SURGE / NOISE SUPPRESSION	
EMI / RFI AC Noise Suppression	Yes
AC Suppression Joule Rating	4675
AC Suppression Response Time	Instantaneous
PHYSICAL	
Primary Form Factor	Tower
Cooling Method	Fans
Installation Form Factors Supported with Included Accessories	Tower
Primary UPS Depth (mm)	1,041
Primary UPS Height (mm)	1,699
Primary UPS Width (mm)	521
Shipping Dimensions (hwd / in.)	76.25 x 28.50 x 45.50
Shipping Dimensions (hwd / cm)	193.68 x 72.39 x 115.57
Shipping Weight (lbs.)	1286.00
Shipping Weight (kg)	583.32
UPS Housing Material	Steel
UPS Power Module Dimensions (hwd, cm)	169.93 x 52.07 x 104.14
UPS Power Module Dimensions (hwd, in.)	66.9 x 20.5 x 41
UPS Power Module Weight (kg)	501.22
UPS Power Module Weight (lbs.)	1105
ENVIRONMENTAL	
Operating Temperature Range	+32 to +104 degrees Fahrenheit / 0 to +40 degrees Celsius
Storage Temperature Range	+5 to +122 degrees Fahrenheit / -15 to +50 degrees Celsius
Relative Humidity	0 to 90%, non-condensing
