

Overview

Setting new standards for reliable power distribution and metering

HPE G2 Switched PDUs are designed to work precisely with HPE Infrastructure and Compute solutions, providing a highly accurate (billing grade accuracy) power distribution and metering solution with outlet-level switching for your IT racks. Designed for use with HPE Standard, Advanced, and Enterprise racks (and compatible with other industry-standard server racks), HPE G2 Switched PDUs guarantee a compatible fit and reliable operation backed by a 3 year warranty. HPE G2 Switched PDUs are also rated for operating temperatures up to 60°C, adding an increased level of operational reliability for power distribution in your IT racks.

A major concern for IT administrators and facility managers is their ability to quickly diagnose and service power related problems in their IT racks. The HPE G2 PDU portfolio addresses this problem by, first, offering a range of models and mounting options that promote flexible power configuration in IT racks. Vertical, Horizontal, and True OU mounting, give you the flexibility to efficiently utilize rack space while placing access to power where you need it most in the rack. Serviceability is further enhanced with features such as color-coded outlets and low-profile form factors, allowing for simple and quick access to IT equipment and power cables in the rear of the rack.

HPE G2 Switched PDU features are also directly focused on other pain points in the data center. 1Gb Ethernet alleviates the need to maintain older switch solutions that have been traditionally required for PDU network connectivity. Support for up to eight sensors per PDU provides a cost-effective and exhaustive solution for monitoring the environmental elements (temperature, humidity, and leakage) in both the front and rear of the rack.

HPE IEC Locking Power Cords are a new supported option available for most HPE G2 PDUs. The IEC Locking Power Cords provide secure cable retention to both the PDU and target device, protecting against vibration during shipping and ensuring that cables are not dislodged during a service event. HPE's IEC Locking Power Cords provide a safe and secure solution against the common issues that lead to power-related downtime.

Why HPE Switched PDUs?

- HPE Foundation Care services purchased for server and storage products, such as extended warranties and premium support services, extend to our PDU products free of charge when purchased together.
- HPE guarantees 100% compatibility between its Rack and Power Infrastructure products and its industry-standard compute, storage, and networking solutions, backed with a 3-year warranty for all G2 Metered PDU models.
- HPE offers multiple Metered PDU form factors that promote efficient use of space in the rack and provide flexibility in how each PDU can be mounted and configured with cables.

Models

100-120V Input, Single Phase, North America/Japan

HPE G2 Switched 1.9kVA/IEC C20 Detachable 16A/120V Outlets (8) 5-20R/1U Horizontal NA/JP PDU	P9S07A
HPE G2 Switched 1.9kVA/IEC C20 Detachable 16A/120V Outlets (12) 5-20R/Vertical NA/JP PDU	P9S08A
HPE G2 Switched 2.8kVA/L5-30P 24A/120V Outlets (18) 5-20R/Vertical NA/JP PDU	P9S09A
HPE G2 Switched 2.8kVA/L5-30P 24A/120V Outlets (16) 5-20R/2U Horizontal NA/JP PDU	P9S10A

NOTE: Models P9S07A and P9S08A include a C19 to NEMA 5-15 detachable input power cord.

100-240V Input, Single Phase, Worldwide

HPE G2 Switched 3.6kVA/IEC C20 Detachable 16A/100-240V Outlets (8) C13/1U Horizontal WW PDU	P9S11A
HPE G2 Switched 3.6kVA/IEC C20 Detachable 16A/100-240V Outlets (12) C13, (4) C19/Vertical WW PDU	P9S12A

NOTE: Worldwide models do not include an input power cord. Please go to the Related Options section and select the appropriate input power cord for your geographic location.

200-208V Input, Single Phase, North America/Japan

HPE G2 Switched 4.9kVA/L6-30P 24A/208V Outlets (12) C13, (4) C19/2U Horizontal NA/JP PDU	P9S13A
HPE G2 Switched 4.9kVA/L6-30P 24A/208V Outlets (20) C13, (4) C19/Vertical NA/JP PDU	P9S14A

220-240V Input, Single Phase, International

HPE G2 Switched 7.3kVA/60309 3-Wire 32A/230V Outlets (12) C13, (4) C19/2U Horizontal INTL PDU	P9S16A
HPE G2 Switched 7.3kVA/60309 3-Wire 32A/230V Outlets (20) C13, (4) C19/Vertical INTL PDU	P9S17A

Key Features

Power Metering and Management	<ul style="list-style-type: none"> All G2 HPE Switched PDUs meet IEC 62053-21, Class 1 standards for $\pm 1\%$ or better accuracy in power metering of: <ul style="list-style-type: none"> Amperage Voltage Wattage Kilowatts per hour OLED display provides local monitoring and alert indications Remote PDU management and power monitoring supported through integrated web-based user interface, CLI, and third-party software applications supporting SNMP
Compatibility	<ul style="list-style-type: none"> Designed specifically for use with HPE rack enclosures, but compatible with most 3rd party IT racks Integrated web-based user interface compatible with IPv4/IPv6 and SNMPv1/SNMPv3
Usability	<ul style="list-style-type: none"> Range of mounting options including vertical, 1U/2U horizontal, and True OU (between the RETMA rails) Low-profile PDU form factors ensure integrity of rear-rack keep-out zone for IT maintenance Color-coded receptacles to easily distinguish between the different load segments/phases Integrated cord retention on all IEC C19 and C13 receptacles (does not require any additional brackets) Local and remote firmware updates
Security	<ul style="list-style-type: none"> Outlet-level on/off power switching that can be accessed locally and remotely Local and LDAP security with multiple access levels Support for HTTP, HTTPS, SSH protocols Configurable alarm thresholds for both power and environmental monitoring Optional dual-locking power cords securing both power connections
<p>HPE G2 Switched PDUs support multiple features that are unique to HPE and help to provide the best user experience. Information on these features is summarized below with additional information found online in HPE G2 Metered PDU User's Guide.</p>	
Rated for High Operating Temperatures	<p>Increasing IT densities and escalating operating costs have created a need for rack infrastructure that can operate reliably at higher operating temperatures. HPE G2 PDUs have been designed with high temperature-rated premium components and construction that support increased reliability levels at elevated temperatures. HPE G2 PDUs are rated for operation in temperatures up to 60°C (or 140°F) in the rear of the rack.</p>
IEC Locking Power Cords	<p>HPE G2 PDU models support optional IEC Locking Power Cords with an integrated locking technology on both ends of the cable. HPE Locking Power Cord are available for both C13/14 and C19/20 power receptacles in multiple cable length options, and can be purchased in single or six-pack kits. One IEC Locking Power Cord has been included with each PDU model that supports either a C13 and/or C19 outlet.</p>
Color-Coded Outlets	<p>All HPE G2 PDU models now include color-coded outlets which are highly visible from the rear of the rack. The color-coding helps to easily and clearly identify outlets to simplify cabling and power phase balancing when configuring your IT equipment.</p>
1Gb Ethernet Support	<p>HPE is the first IT solutions company to standardize on 1Gb Ethernet for PDU network connectivity. This eliminates the need to maintain older switching solutions needed for the 10/100 connectivity provided by most other PDU manufacturers.</p>
Environmental Sensors	<p>HPE G2 Switched PDU models include two environmental sensor ports (can be upgraded to six ports with the addition of up to two G2 PDU Sensor Port Hubs) that can monitor and record up to eight sensor measurements. Multiple sensor options are available providing the ability to monitor temperature, humidity, water leakage, and intrusion for each rack. Please review the Related Options section for a list of the options available.</p>

Key Features

Flexible Mounting

Most vertical HPE G2 PDU models support mounting on the back and both sides of the PDU using a button and keyhole mounting system for easy drop-in installation. This provides a flexible mounting capability that allows power cables to be configured toward the front, middle, or rear of the rack, allowing users to customize their cable management strategy specifically for each rack.

True OU Mounting

HPE Horizontal PDUs have a unique design specifically for data center customers who want to maximize space efficiencies in the rack. All HPE 1U Horizontal PDUs can be installed in any U position in your rack or can be installed in the OU space between the RETMA rails on HPE Advanced and Enterprise Series racks (see figure below).

HPE PDU Extension Bar Options

HPE PDU extension bar options help expand the availability of power in the rear of the rack. Each extension bar includes a locking input power cord that connects to the PDU and supports HPE's new IEC Locking Power Cords for C13/C14 and C19/C20 outlets. HPE PDU extension bars can be added to Horizontal and Vertical PDU models, with available C19 outlets, to add additional power outlets and expand access to power in the back of the rack when needed. Extension Bars mount directly to the frame of the rack in multiple locations allowing you the flexibility of placing access to power where it is needed most (see figure above). Multiple extension bar options are available to help you customize the outlet configurations you require extension bars are also compatible with previous generation PDU models that offer C20 outlets (locking feature only supported on new G2 PDU models). See the Related Options section for more information on G2 Extension Bar models.

3-Year Warranty

HPE G2 Switched PDU models are supported with a 3-year warranty. Additionally, the HPE Foundation Care Extension program provides additional support and services for your PDU models when purchased with HPE servers, storage, and networking solutions at no additional charge.

Additional information regarding worldwide limited warranty and technical support is available at:

<http://h17007.www1.hpe.com/us/en/enterprise/servers/warranty/index.aspx#.V-10xE3rvbq>

HPE Mounting Brackets	HPE Vertical PDU 10K G2 Mounting Kit	H6L32A
	NOTE: This kit allows for vertical HPE G2 PDU models to be mounted in HPE 10000 G2 series racks and in the HPE Standard Series rack.	

Environmental Sensors	HPE G2 Metered PDUs include 2 physical sensor ports and can monitor and record up to eight sensor measurements. Data collected by each sensor can be viewed and managed through the integrated graphical user interface (GUI), or by third-party applications that communicate through SNMP or through a Redfish supported API. Consult the HPE G2 Metered PDU User Guide for more information on use with third-party software applications.	
	HPE G2 PDU Environmental Temperature Sensor	P9T00A
	NOTE: Requires one input port and monitor/records one sensor measurement.	
	HPE G2 PDU Environmental Temperature and Humidity Sensor	P9T01A
	NOTE: Requires one input port and monitors/records two sensor measurements.	
	HPE G2 PDU Environmental 3-Temperature and 1-Humidity Sensor	P9T02A
	NOTE: Requires one input port and monitors/records four sensor measurements.	
	HPE G2 PDU Open/Close Door Sensor	P9T03A
	NOTE: Requires two input ports and monitors/records two sensor measurements.	
	HPE G2 PDU Leak Detection Sensor	P9T04A
	NOTE: Requires one input port and monitors/records one sensor measurement. Kit covers up to six linear meters and can be expanded to cover up to thirty linear meters with the addition of up to four HPE G2 PDU Leak Detection Sensor Extension Kits (P9T08A).	
	HPE G2 PDU Sensor Port Hub	P9T07A
	NOTE: This is an adapter that expands a single physical sensor port into three physical sensor ports.	
	HPE G2 PDU Leak Detection Sensor Extension Kit	P9T08A
	NOTE: Leak Detection Sensor (P9T04A) must be purchased separately to use in conjunction with this kit. Up to four Extension Kits can be added to a single Leak Detection Sensor to cover up to a maximum of thirty linear meters.
