

SMTAS Series.....

POWER SUPPLY DATA

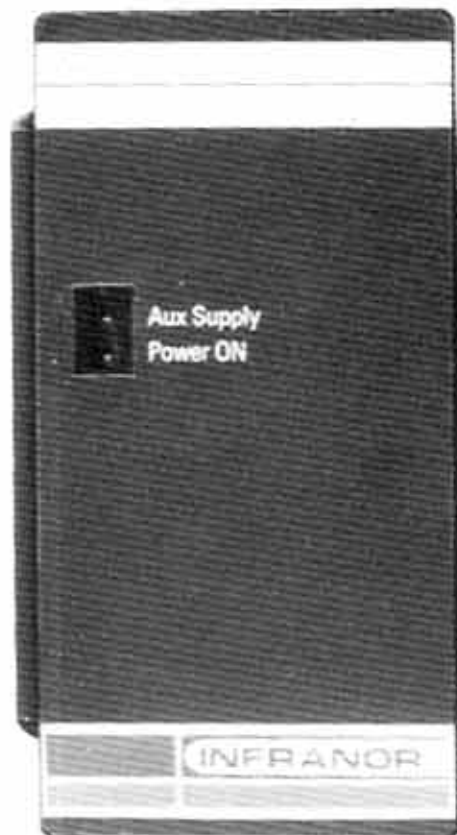

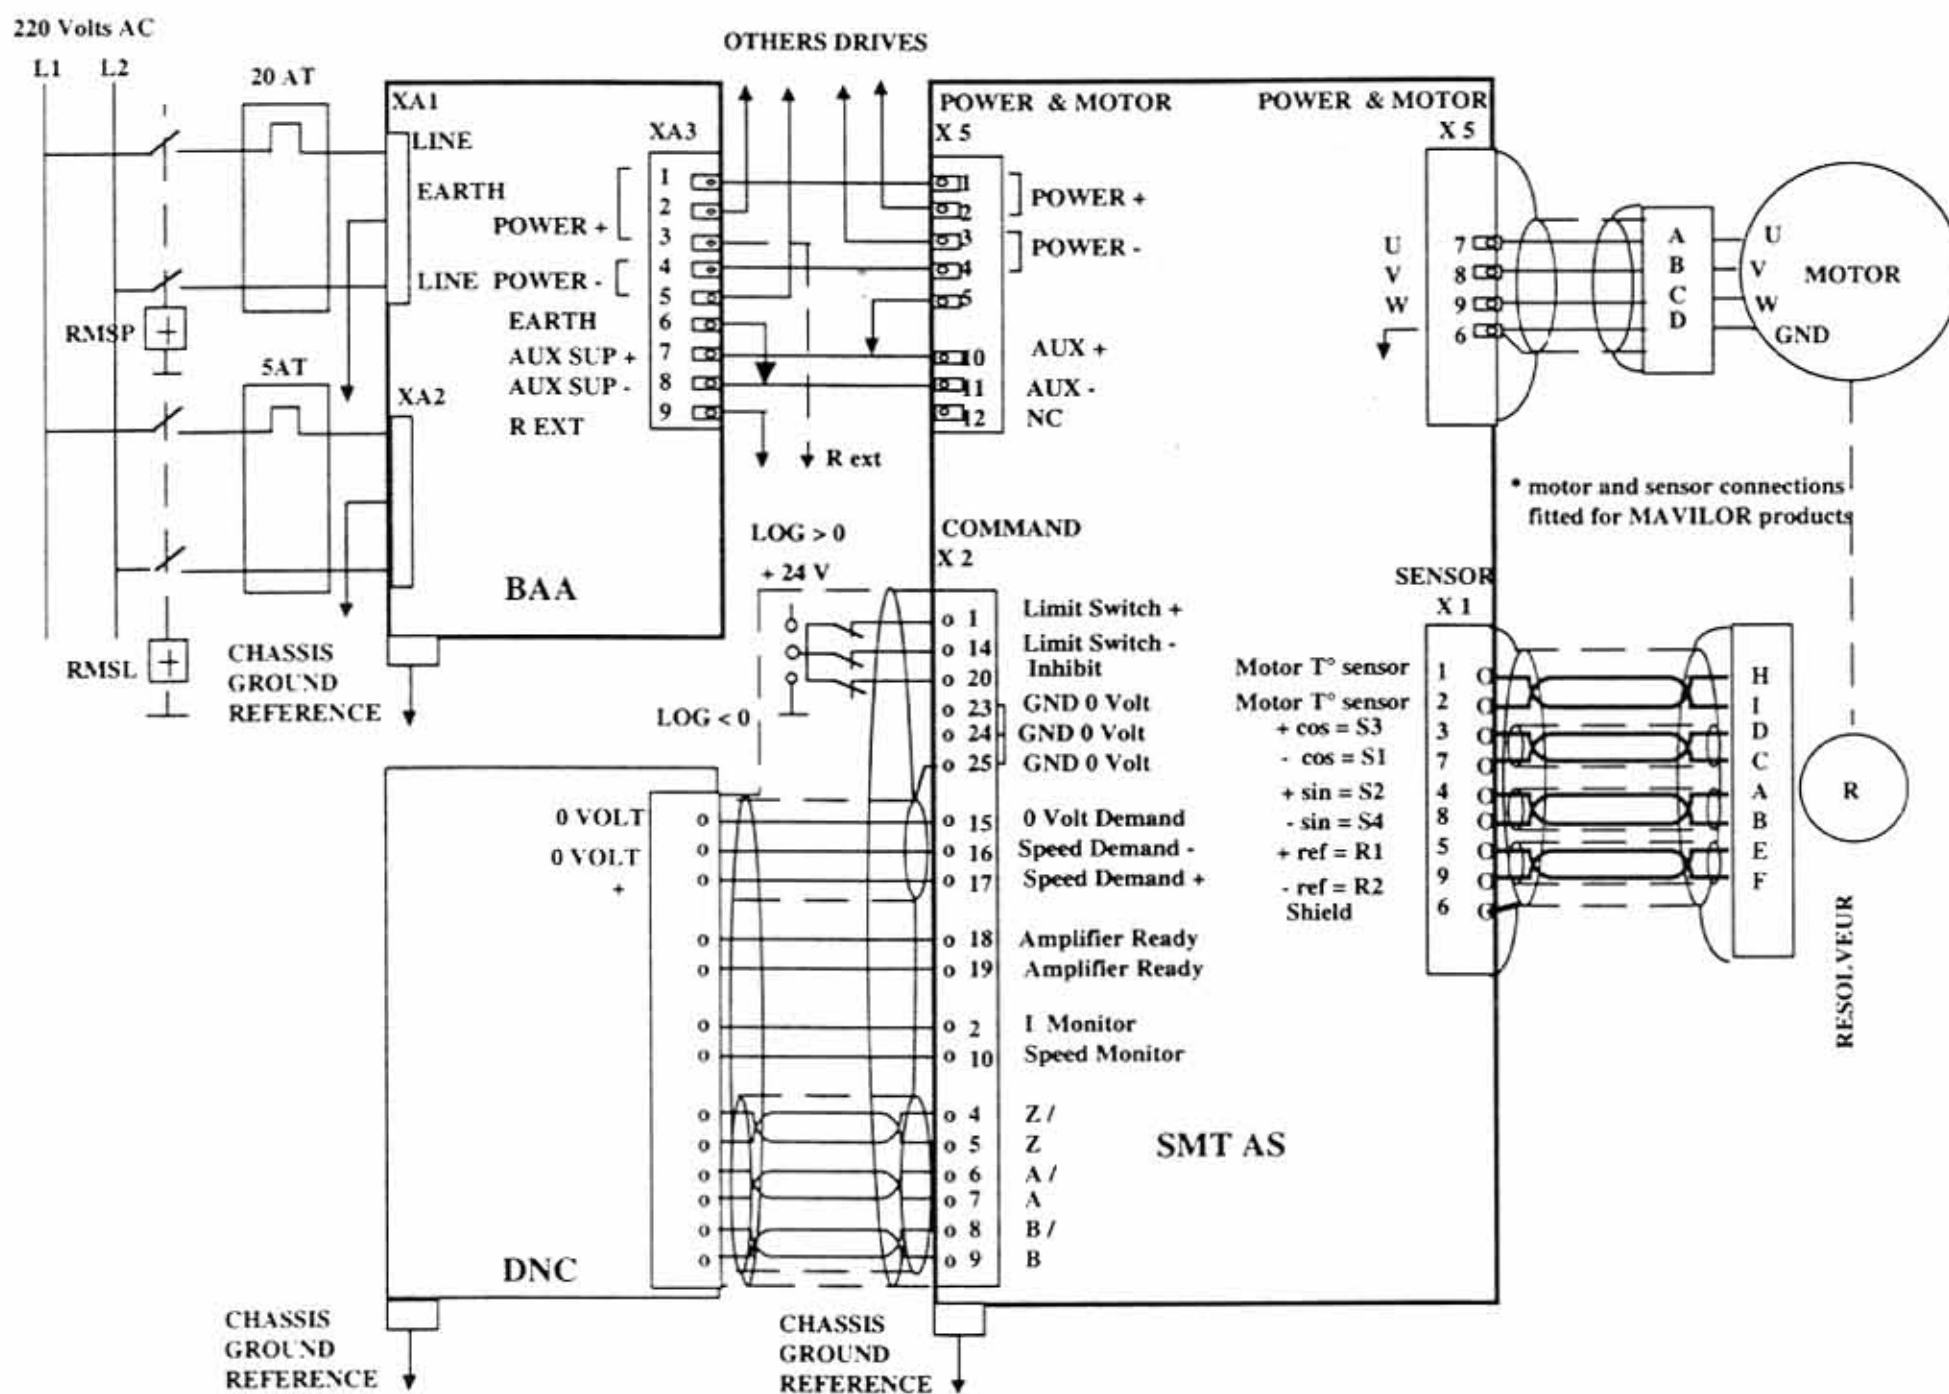

BAA 220 M - I			
TYPE	VAC	I Max (DC)	I Nom (DC)
BAA-220 M-20 A	220	40	20
BAA-220 M-20*	220	40	20

*Without auxiliary supply

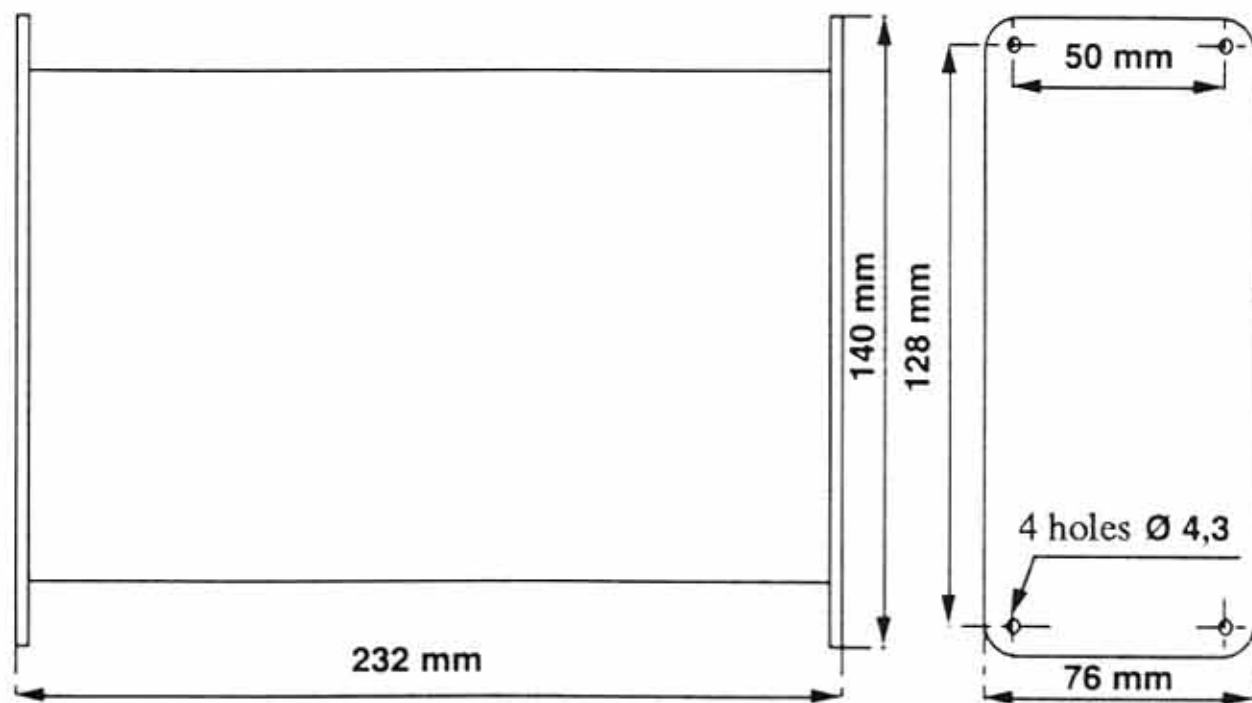

BAA Series Power Supply

Power supply module BAA is constructed in the same format as the SMTA amplifiers, and, when supplied directly from 220 VAC single phase, provides output power at 310 VDC, 40A peak / 20A continuous current. Auxiliary voltage is also available where logic supply must be independent of main power.
