

Plug-In Outlet Center Units for Use in Healthcare

The healthcare environment offers unique challenges for powering equipment in patient care areas. The medical equipment used in emergency rooms and surgical suites is constantly changing based on the needs of the patient. ULM Series of Medical Grade Plug-in Outlet Center Units (PIOCs) offer medical professionals quick and flexible power delivery in these demanding patient care environments.

For those areas of your healthcare facility that are not used for patient care, such as Admissions, Human Resources, Purchasing, etc., we offer ULBH Series Special Use PIOCs.

The ULM and ULBH Series offer both flexibility and durability to keep your power infrastructure healthy and strong. So remember C2G when you are seeking innovative solutions to your ever changing power infrastructure needs.

16311 Medical Grade Plug-In Outlet Center Unit.

FEATURES & BENEFITS

ULM Series Plug-In Outlet Center Units Feature:

- **Safety Certified by TUV Rheinland.** Complies with UL60601-1, the Standard for Medical Electrical Equipment. Can be used in patient care areas in compliance with Article 517 of the National Electrical Code (NEC). Allows for maximum flexibility when powering patient care equipment.
- **Redundant bonding of the enclosure as required by UL60601-1.** Assures an ultra reliable grounding path is provided. Proper grounding of medical equipment is essential for patient well-being.
- **Rugged aluminum housing.** Withstands the rigors of the healthcare environment assuring a long service life.
- **Pass & Seymour® Hospital Grade Receptacles.** Superior quality receptacles are used to ensure reliable connections and long life.
- **15A configuration.** Provides more than adequate capacity for non patient care areas.
- **IV Pole Mounting Bracket available.** Allows for easy mounting and dismounting to 1" diameter IV poles. Mounts and dismounts much faster than typical thumb screw brackets, increasing productivity during cleaning cycles.

ULBH Series Plug-In Outlet Center Units Feature:

- **Safety Certified by UL.** Complies with UL1363, the Standard for Relocatable Power Taps. Provides full protection for staff personnel, while affording maximum flexibility.
- **Rugged aluminum housing.** Withstands the rigors of the healthcare environment assuring a long service life.
- **Pass & Seymour® Hospital Grade Receptacles.** Superior quality receptacles are used to ensure reliable connections and long life.
- **15A configuration.** Provides more than adequate capacity for non patient care areas.
