# FOLLOW THESE STEPS TO FIND YOUR LIBELIUM SOLUTION

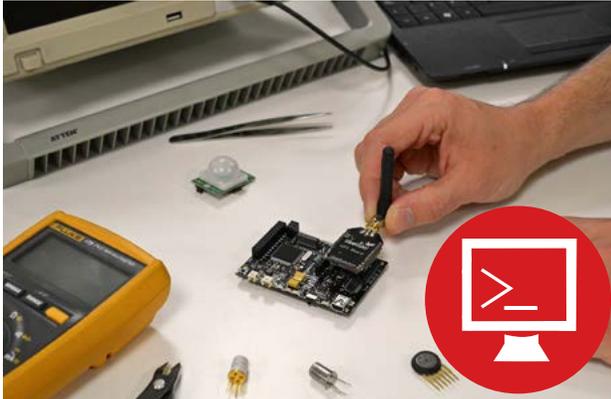

-  Try our technology for IoT  
Out-of-the-Box IoT Vertical Kits
-  Ready to install solution  
Wasmote Plug & Sense!
-  Research and development  
Wasmote OEM

-  1° Customize your device  
**Sensors + Connectivity + Power Options**
- +
-  2° Decide the way to access the data  
**Extracting the Data**
- +
-  3° Choose Support & Training options  
**Support Section**

-  Ref. Make note  
Product reference
-  Complete the  
Order Form
-  @ Send to your  
Sales Agent

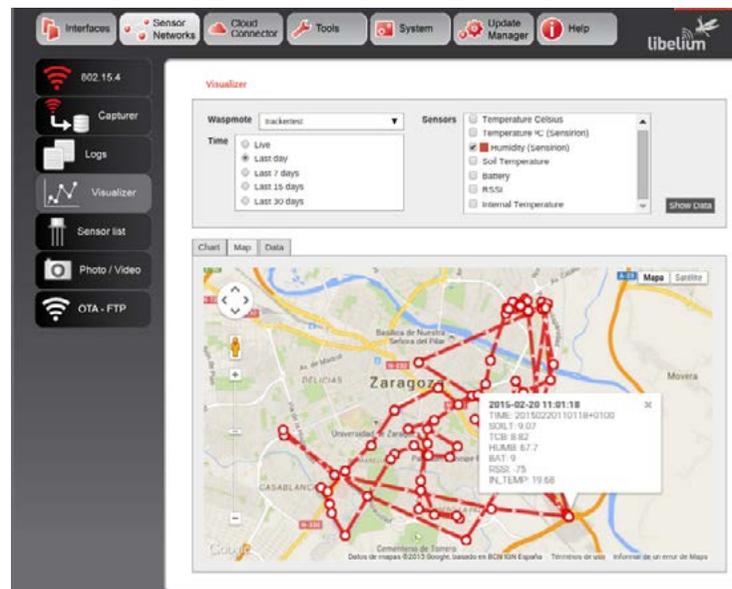

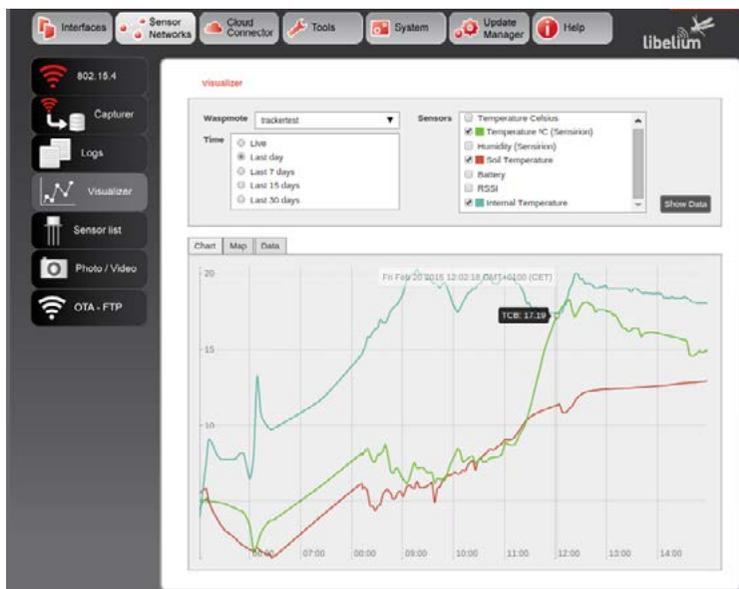

## WHAT ARE YOU LOOKING FOR?

|                 |  |  |   |
|-----------------|--|--|---|
| You are         | <h3>Testing IoT Market!</h3>     | <h3>Looking for a ready to install solution</h3>    | <h3>Doing research and development</h3>     |
| You need to     | <ul style="list-style-type: none"> <li>• Decide quickly the components to test</li> <li>• Use your time to check if technology meets your requirements, not programming</li> <li>• Maximize your budget: test the market with the minimum risk</li> </ul>                                      | <ul style="list-style-type: none"> <li>• Reduce your time to market.</li> <li>• Save in development costs</li> <li>• Focus on the solution</li> </ul>  | <ul style="list-style-type: none"> <li>• Get the maximum flexibility in programming</li> <li>• Use your extra time to save on support options</li> </ul>  |
| The best option | <h3>Out-of-the-Box IoT Vertical Kits</h3> <ul style="list-style-type: none"> <li>• Out-of-the-Box working demos</li> <li>• Data visualization tool</li> <li>• Includes online consultancy bonus</li> </ul>  | <h3>Waspnote Plug &amp; Sense!</h3> <ul style="list-style-type: none"> <li>• Encapsulated and robust solution ready to install outdoors</li> <li>• Factory programmed and configured devices</li> <li>• Customized online support</li> </ul>  | <h3>Waspnote OEM</h3> <ul style="list-style-type: none"> <li>• Select the components one by one to test at the laboratory</li> <li>• Free support through our forums and documentation</li> <li>• Join our Free Overview Webinars to get quick insights about our technology</li> </ul>  |

## Technology to get new customers

If you are exploring IoT possibilities with a pilot project, setting up a demo to engage with potential customers or just comparing technology options, time is the most important factor.

We have created five different IoT Vertical Kits addressing the most dynamic IoT verticals and one evaluator kit to ensure you get started in as fast as possible. The vertical kits are factory programmed with basic codes, include a visualization plugin in Meshlium<sup>1</sup> and 2 hours of technical consultancy so that you can have a working demo just by powering on the devices.

1.- Visualization plugin only available in IoT Vertical Kits and Solution Kits with Meshlium. The service is valid for Libelium standard sensors..

## Smart Cities IoT Vertical Kit

Application examples:

| Application      | Description  | Sensors   |
|------------------|--|---|
| Noise Urban Maps | Sound monitoring in bar areas and centric zones in real time | Noise / Soun Level (LeqA in dBA)                                |
| Smart Lighting   | Intelligent and weather adaptive lighting in street lights   | Luminosity (luxes accuracy)                                     |
| Air Quality      | Control of the pollution levels                              | CO, NO <sub>2</sub> , O <sub>3</sub>                            |
| Weather Control  | Monitor atmospheric conditions                               | Humidity, luminosity (Luxes), temperature, atmospheric pressure |

List of items included in the Smart Cities IoT Vertical Kit:

| Item   | Ref.          | Quantity |
|--|---------------|----------|
| Plug & Sense! Smart Cities 802.15.4<br><i>(EU version is provided for the European kit)</i>  | SCPB-802      | 1        |
| Plug & Sense! SEP 802.15.4<br><i>(EU version is provided for the European kit)</i>   | SEPB-802      | 1        |
| Noise Level sensor probe   | NLS           | 1        |
| Luminosity (luxes accuracy)  | 9325-P        | 1        |
| Temperature, Humidity and Pressure Sensor Probe  | 9370-P        | 1        |
| Carbon Monoxide (CO) for low concentrations Sensor Probe (Calibrated)*   | 9371-LC-P     | 1        |
| Nitric Dioxide high accuracy (NO <sub>2</sub> ) Sensor Probe (Calibrated)*   | 9376-HA-P     | 1        |
| Ozone (O <sub>3</sub> ) Sensor Probe (Calibrated)*   | 9374-P        | 1        |
| External solar panel (power accessory for Plug & Sense!)   | PAPS-ESP      | 2        |
| Outdoors USB cable   | 256369        | 2        |
| International adapter  | 10280         | 3        |
| Meshlium 4G 802.15.4 AP<br><i>(EU/BR, US or AU versions are provided, depending on kit)</i><br><i>(EU/BR and US versions feature a GPS receiver)</i> | M4G-802       | 1        |
| Technical consultancy 2 hrs  | TC-2          | 1        |
| P&S! Programming Service (kit of Marketplace)  | PROG-Mktplace | 1        |
| Meshlium visualization interface   | MVIS          | 1        |

| Ref / Total Price | SCIVK-EU/  | 5,400 € |
|-------------------|------------|---------|
|                   | SCIVK-USA/ | 5,400 € |
|                   | SCIVK-BR/  | 5,400 € |
|                   | SCIVK-AU/  | 5,400 € |

Includes Meshlium Sensor Visualizer interface – 100 times free access limit. After 100 log-ins a license fee can be acquired to keep on using it.  
We do not provide these codes, the nodes are already programmed in Libelium. Do not overwrite the code.  
\*Calibrated gas sensors are manufactured once the order has been placed to ensure maximum durability of the calibration feature. Manufacturing process and delivery may take from 4 to 6 weeks. Lifetime of calibrated gas sensors is 6 months working at maximum accuracy. We strongly encourage our customers to buy extra gas sensor probes to replace the original ones after that time to ensure maximum accuracy and performance.

We provide prices in USD to US customers. Please submit your RFQ, and we will provide you with the USD prices.

## Smart Agriculture IoT Vertical Kit

Application examples:

| Application             | Description  | Sensors   |
|-------------------------|--|---|
| Wine Quality Enhancing  | Monitoring soil moisture in vineyards to control the amount of sugar in grapes and grapevine health                        | Soil moisture, soil temperature, humidity, leaf wetness, atmospheric pressure |
| Greenhouses             | Control micro-climate conditions to maximize the production of fruits and vegetables                                       | Soil moisture, soil temperature, humidity, leaf wetness, atmospheric pressure |
| Golf Courses Irrigation | Selective irrigation in dry zones to reduce the water resources required in the green                                      | Soil moisture (3 levels of depth)   |
| Compost                 | Control of humidity and temperature levels in alfalfa, hay, straw, etc. to prevent fungus and other microbial contaminants | Humidity, soil moisture, soil temperature                                     |

## Smart Agriculture Xtreme IoT Vertical Kits

Application examples:

| Application            | Description  | Sensors  |
|------------------------|--|--|
| Wine Quality Enhancing | Monitoring soil moisture and temperature, humidity and leaf wetness sensors, allows to control the grapevine health and grape quality, as well as to control micro-climate conditions to maximize the production | Ambient parameters (weather conditions, radiation...), soil moisture, conductivity and temperature, leaf wetness |
| Greenhouses            | Production of 4th generation of crops: baby leaves, strawberries, tomatoes...  | Radiation, air temperature and humidity, leaf wetness, soil moisture, conductivity and temperature               |
| Parks and Gardens      | Controlling the irrigation system and the usage of water resources   | Soil moisture, conductivity and temperature  |
| Fruit Production       | Improving crops production and reducing pests: olive, orchards, bananas...   | Ambient parameters (weather conditions, radiation...), soil moisture, conductivity and temperature, leaf wetness |

Includes Meshlium Sensor Visualizer interface – 100 times free access limit. After 100 log-ins a license fee can be acquired to keep on using it.  
We do not provide these codes, the nodes are already programmed in Libelium. Do not overwrite the code.  
\*Calibrated gas sensors are manufactured once the order has been placed to ensure maximum durability of the calibration feature. Manufacturing process and delivery may take from 4 to 6 weeks. Lifetime of calibrated gas sensors is 6 months working at maximum accuracy. We strongly encourage our customers to buy extra gas sensor probes to replace the original ones after that time to ensure maximum accuracy and performance.

## Smart Water IoT Vertical Kit

Application examples:

| Application                            | Description  | Sensors                             |
|--|--|-------------------------------------|
| Water treatment plants                 | Monitor the quality of water in treatment plants   | pH, ORP, DO, Conductivity, Salinity |
| Water quality monitoring in irrigation | Tanks and lakes can be monitored to ensure the quality in irrigation for Agriculture         | pH, ORP, DO                         |
| Fishfarmings                           | The efficiency in fishfarming production can be increased by monitoring the quality of water | pH, ORP, DO, Conductivity, Salinity |
| Chemical leakages                      | Detect leakages and wastes of factories in rivers. Extreme pH values signal chemical spills. | pH, DO                              |
| Swimming pool remote measurement       | Control remotely the swimming pool conditions  | pH, ORP                             |

## Smart Industrial Protocols IoT Vertical Kit

Application examples:

| Application   | Description  |
|---|--|
| Connect any sensor to an existing industrial bus (RS-485 in this kit) | Plug & Sense! can be configured to work as a node in the network, inserting sensor data into the industrial bus already present  |
| Add wireless connectivity to wired buses                              | Plug & Sense! can be configured to read the information coming from the bus and send it to Meshlium using any of the wireless radio modules available (802.15.4 in this kit)   |
| Connect industrial devices to the Cloud                               | Plug & Sense! can be configured to read the information coming from the bus and send it directly to the Cloud using 4G or WiFi radio modules (not present in this kit). Additionally, Meshlium offers different cloud connectors that flow data directly to cloud platforms. |

Ref / Total Price

SIPIVK-EU – 3,250 €

SIPIVK-US – 3,250 €

SIPIVK-BR – 3,250 €

SIPIVK-AU – 3,250 €

*This kit does NOT include any programming service because the software cannot be standardized: each code will depend much on the chosen industrial device. That means the user will need to implement the code for the Plug & Sense! units.*

*Includes Meshlium Sensor Visualizer interface – 100 times free access limit. After 100 log-ins a license fee can be acquired to keep on using it. Meshlium Visualizer will show sensor data only if the codes create data frames as specified in the Technical Guides.*

## Evaluator Kit

This kit is designed to compare different radio technologies or create customized demos. It contains the most demanded products in our catalogue, so that you do not need to spend lots of time configuring your order. Four different versions are available for the markets of Europe, US&Canada, Brazil and Australia.

To ensure you start testing the products as soon as possible, we include 1 attendee place at Libelium Basic Training Course where you will learn from installing the IDE to program Waspote (more info about training courses on section [Support](#)).

Finally, we also include a 3-hour package of online technical consultancy, to solve quickly any doubt you may have when getting your hands on Waspote. Both training courses and consultancy hours are driven by Libelium R&D engineers.

## MySignals SW and HW Complete Kits (eHealth Medical Development Platform): new version

MySignals is a development platform for medical devices and eHealth applications. You can use MySignals to develop your eHealth web, Android or iOS applications or even to add your own sensors to build new medical devices.

MySignals Kits include more than 17 sensors which can be used to monitor biometric signals; now they can be plugged on-the-fly. All the data gathered by MySignals is encrypted and sent via secure HTTPS to the user's private account at Libelium Cloud through WiFi or Bluetooth. The data can be displayed on the node's TFT screen or on a tablet or smartphone with Android or iPhone apps. Developers may use their own Cloud too to store the information.

Libelium offers an API's for developers to access the information. The API Cloud allows to access to the user's private account and get the information previously stored, to be displayed on a third party platform (data can also be stored in a third party Cloud).

More info at :

MySignals SW Complete Kit includes:

- MySignals SW (new version)
- Snore Sensor [PRO]
- Patient Position Sensor [PRO]
- ECG Sensor [PRO]
- EMG Sensor [PRO]
- GSR Sensor [PRO]
- Airflow (Breathing) Sensor [PRO]
- Body Temperature Sensor [PRO]
- Spirometer Sensor [PRO]
- Glucometer Sensor [PRO]
- Blood Pressure Sensor (Sphygmomanometer) [PRO]
- SPO2 Sensor [PRO] (Basic User Cloud plan)

There are plans for regular users and for developers depending on what usage you want to give to MySignals.

## User Cloud Plans

The user plans are meant to be used to test the performance of MySignals. These are the best plans if you want to try in a quick and easy way the MySignals Kit including all the sensors on different users as each one can have its own profile. All the data is sent to the Libelium Cloud, so users do not need to set up their own servers.

|  | Basic                                | PRO                                 | Elite  |

## Developer Cloud Plans

The developers plans are the best option for users who want to store the data gathered by MySignals in their own servers. This type of plans allow to use the Cloud API to read the information from the Libelium Cloud and write it in their own Cloud platforms.

|   | Basic                                | PRO                                 | Elite  |

# Wasmote Plug & Sense!: technology ready to install

Wasmote Plug & Sense! is the the best option to use in commercial deployments. It has been designed with a robust waterproof enclosure that simplifies installation and maintenance process. Moreover, you can order them factory-programmed saving you development costs and time. The result is a ready to install and easy to deploy sensor device that reduces time to market in any application. You can focus on your customer and forget about the sensing part. Besides, the platform is market-ready because it is certified for the main regions in the world.

|                   |   |
|-------------------|---|
| Any scenario      | <ul style="list-style-type: none"> <li>• 120+ sensors available, up to 6 sensors per sensor device</li> <li>• Communication: 802.15.4, 868 MHz, 900 MHz, WiFi, 4G, Sigfox and LoRaWAN</li> <li>• Industrial protocols: RS-485, Modbus, CAN Bus</li> <li>• GPS receiver</li> </ul> |
| For real projects | <ul style="list-style-type: none"> <li>• Robust waterproof IP65 enclosure</li> <li>• Solar powered, external panel option</li> </ul>  |
| Fast installation | <ul style="list-style-type: none"> <li>• Factory-programmed and configured</li> <li>• Special holders and brackets to install in street lights and building fronts</li> <li>• On / Off external button</li> <li>• External socket for SIM card</li> </ul>                         |
| Easy maintenance  | <ul style="list-style-type: none"> <li>• Remote firmware upgrades of multiple nodes at once (OTAP)</li> <li>• Replace or add a sensor probe in seconds</li> <li>• External, contactless device-reset with magnet</li> </ul>   |
| Fully certified   | <ul style="list-style-type: none"> <li>• CE (Europe)</li> <li>• FCC (US)</li> <li>• IC (Canada)</li> <li>• ANATEL (Brazil)</li> <li>• RCM (Australia)</li> <li>• PTCRB (cellular certification for US)</li> <li>• AT&amp;T (cellular certification for US)</li> </ul>             |

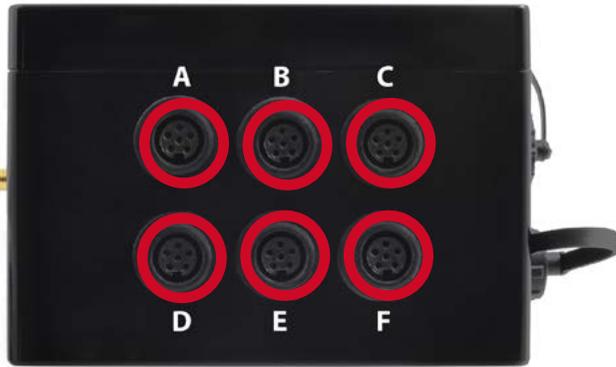

## Configuring your Plug & Sense! device

You can customize any Wasmote Plug & Sense! model by choosing the radio, power option, sensors and optional accessories. Any Plug & Sense! always comes with a rechargeable 6600 mA·h battery included.

Since each sensor has different power requirements and dedicated circuitry, sensor probes can be attached only to certain sockets (named A - F in the figure). There is a sensors table in all the models explaining all the possible connections between sensor probes and sockets.

Each socket supports **one sensor at the same time**

Each socket supports one sensor at the same time

| Sensor          | Sockets |   |   |   |   |   |
|-----------------|---------|---|---|---|---|---|
|                 | A       | B | C | D | E | F |
| Temperature     | ✓       |   |   |   |   |   |
| Humidity        |         | ✓ |   |   |   |   |
| CO <sub>2</sub> |         |   | ✓ |   |   |   |
| NO <sub>2</sub> |         |   |   | ✓ |   |   |
| O <sub>2</sub>  |         |   |   |   | ✓ |   |
| CO              | ✓       |   |   |   |   | ✓ |

In this example the CO Sensor can be connected to the socket A or F indistinctly

|--|--|--|--|---|--|

## Smart Agriculture

This model allows the deployment of any Precision Agriculture application. Due to the complexity of some sensors, there are two versions: Smart Agriculture and Smart Agriculture-PRO.

| Communication options                        | Ref.         | Price |
|--|--------------|-------|
| Plug & Sense! SA 802.15.4 EU                 | SAB-802-EU   | 570 € |
| Plug & Sense! SA 802.15.4                    | SAB-802      | 570 € |
| Plug & Sense! SA WiFi                        | SAB-W        | 570 € |

An accessory composed of a mounting bracket and a leveling plate is advised for the Solar radiation (PAR) and Ultraviolet sensor probes (check delivery time with your sales agent):

| Item                             | Ref. | Price |
|----------------------------------|------|-------|
| Solar Sensors Mounting Accessory | SSMA | 85 €  |

## Smart Agriculture Xtreme

This Plug & Sense! is an evolution of our Agriculture line with a new selection of high-end professional sensors. There are sensors for atmospheric and soil monitoring and plants health. Up to 32 sensors can be connected.

## Smart Environment PRO

This model model has been created as an evolution of Smart Environment. It enables the user to implement pollution, air quality, industrial, environmental or farming projects with high requirements in terms of high accuracy, reliability and measurement range as the sensors come calibrated from factory.

\* Each Smart Water node includes a Soil/Water temperature probe in the price.

\*\* The sensor is sold calibrated from factory. It must be purchased with its corresponding Plug & Sense! Smart Water node; available on demand.

For Smart Water sensors, it is highly recommended to purchase calibration solutions to calculate accurate measurement. One kit is enough for several sensor units.

## Smart Water Xtreme

This model was created as an evolution of Smart Water and integrates high-end sensors, calibrated in factory, with enhanced accuracy and performance. Their reduced recalibration requirements and robust design enlarge maintenance periods, making it more affordable to deploy remote Smart Water applications.

| Nitrate sensor for Manta probe*                                  |         |   |   |   |   |   | 72474   | 1,350 € |
| Chloride sensor for Manta probe*                                 |         |   |   |   |   |   | 72475   | 1,350 € |

| Sensor                          | Sockets |   |   |   |   |   | Ref.  | Price   |
|---------------------------------|---------|---|---|---|---|---|-------|---------|
|                                 | A       | B | C | D | E | F |       |         |
| Sodium sensor for Manta probe*  |         |   |   |   |   |   | 72476 | 1,350 € |
| Calcium sensor for Manta probe* |         |   |   |   |   |   | 72477 | 1,350 € |

\* These sensor probes need the Manta+ 40 probe. Available on demand. Check compatibility and leadtime with your Sales agent.

\*\* The sensor is sold calibrated from factory. It must be purchased with its corresponding Plug & Sense! Smart Water node; available on demand.

For Smart Water Xtreme sensors, it is highly recommended to purchase calibration solutions to calculate accurate measurements. One kit is enough for several sensor units. Some sensors need storage solutions too. Also, we provide an accessory for protecting a sensor mechanically; from aquatic fauna, for instance:

| Accessory                                | Ref.  | Price |
|--|-------|-------|
| Conductivity Calibration Kit, K=0.1      | 9339  | 28 €  |
| Conductivity Calibration Kit, K=1        | 9340  | 28 €  |
| Conductivity Calibration Kit, K=10       | 9341  | 28 €  |
| DO Calibration Solution                  | 9342  | 42 €  |
| pH Calibration Kit                       | 9343  | 63 €  |
| ORP Calibration Solution                 | 9344  | 42 €  |
| Turbidity calibration solution, 4000 NTU | 72465 | 55 €  |
| Storage solution for PHEHT probe         | 72464 | 20 €  |
| Sensor protection accessory              | 9493  | 300 € |

For those users interested in measuring directly inside pipes, there are pipe segments with a protected measurement point. As an optional accessory for this sensor, Libelium offers pipe mounting adapters which can be connected to those special pipe segments:

| Mounting accessory   | Ref.  | Price   |
|--|-------|---------|
| PVC pipe mounting accessory for OPTOD sensor probe         | 72454 | 310 €   |
| PVC pipe mounting accessory for PHEHT sensor probe         | 72455 | 315 €   |
| PVC pipe mounting accessory for C4E or sensor NTU probes   | 72456 | 240 €   |
| PVC pipe mounting accessory for CTZN sensor probe          | 72457 | 220 €   |
| PVC pipe mounting accessory for MES5 sensor probe          | 72458 | 340 €   |
| Steel pipe mounting accessory for OPTOD sensor probe       | 72459 | 710 €   |
| Steel pipe mounting accessory for PHEHT sensor probe       | 72460 | 740 €   |
| Steel pipe mounting accessory for C4E or NTU sensor probes | 72461 | 1,050 € |
| Steel pipe mounting accessory for CTZN sensor probe        | 72462 | 1,050 € |

## Smart Water Ions

The Smart Water Ions models specialize in the measurement of ions concentration for drinking water quality control, agriculture water monitoring, swimming pools or waste water treatment. Due to the existence of 3 types for the reference probe and 2 types of sensor probes ("normal" and PRO), there are 3 variants.

*1: Calibrated gas sensors are manufactured once the order has been placed to ensure maximum durability of the calibration feature. Manufacturing process and delivery may take from 4 to 6 weeks. Lifetime of calibrated gas sensors is 6 months working at maximum accuracy. We strongly encourage our customers to buy extra gas sensor probes to replace the original ones after that time to ensure maximum accuracy and performance.*

*\*: This sensor includes all the needed accessories (sensor, windshield, enclosure, cables, mounting kit, roof, etc).*

*\*\*.: Due to high power requirements, these sensors cannot work at the same time in the same Plug & Sense!.*

## Smart Parking

This model allows to detect free parking spots. It is designed to be screwed on the surface of parking slots and to detect the arrival and departure of vehicles with an electromagnetic field sensor. It includes a robust polyamide enclosure for a fast and easy surface installation.

This node comes with 2 radios, Sigfox and LoRaWAN, which benefit from all the LPWAN characteristics. The device is easily configured from a PC and can even be reconfigured with the Remote Manager, from the cloud. This model comes with a non-rechargeable battery of 10.4 Ah.

*Looking for a working and programmed demo with this product?*

**Try our out-of-the-box IoT Vertical kits!**

1.- Any Smart Parking bundle includes 'n' nodes. Each node includes, among others, PCB, battery, 2 antennas, enclosure, rubber isolators, 4 private ground screws and 4 ground screw anchors.

2.- The Sigfox radio of this version is also valid for countries in RC4 like Australia, New Zealand, Singapore, Taiwan, Hong Kong, Colombia, Argentina, Costa Rica, Thailand or Chile. The LoRaWAN radio of this version is valid for Australia.

3.- The LoRaWAN radio of this version is valid for India. The Sigfox radio of this version is disabled (no Sigfox network in India yet).

4.- The Sigfox radio of this version is also valid for countries in RC4 like Australia, New Zealand, Singapore, Taiwan, Hong Kong, Colombia, Argentina, Costa Rica, Thailand or Chile. The LoRaWAN radio of this version is valid for AS-923 countries (ASIA-PAC, LATAM, AU).

5.- The Smart Parking Installation Kit includes a magnet for contactless reset, a private screw key, a USB Programmer and a miniUSB cable. This Installation Kits not included in Smart Parking bundle, so remember to order at least one.

## Smart Security

This model is designed to allow the detection of different events like movement, presence or water levels. Besides, a relay system allows this model to interact with external electrical machines.

## 4-20 mA (Current Loop)

The applications for this Plug & Sense! model are focused on adding wireless connectivity to 4-20 mA devices and connecting them to the Cloud.

## Smartphone detection for traffic congestion and pedestrian counting

This application is performed with Meshlium and it is the only one that does not allow to attach any sensor. Meshlium can detect any smartphone in the area by measuring WiFi and Bluetooth activity. This way, pedestrian and traffic congestion can be determined in real time. Meshlium is also the Internet Gateway for Wasmote Plug & Sense! For more information about Meshlium models and prices [see Meshlium section](#).

## Power options

One of the following options is necessary for each Plug & Sense! unit.

| Power options  | Smart Environment PRO | Smart Agriculture | Smart Water | Smart Water Ions | Smart Cities PRO | Smart Parking <sup>(3)</sup> | Smart Security | 4-20 mA | Radiation Control | Ambient Control | Ref.          | Price |
|--|-----------------------|-------------------|-------------|------------------|------------------|------------------------------|----------------|---------|-------------------|-----------------|---------------|-------|
| External solar panel 7V - 500mA (power accessory for Plug & Sense!)                          | ✓                     | ✓                 | ✓           | ✓                | ✓                | X                            | ✓              | ✓       | ✓                 | ✓               | PAPS-ESP      | 42 €  |

## Industrial Protocols for Plug & Sense!

Plug & Sense! can incorporate an Industrial Protocol module as a secondary communication option. This feature opens a wide variety of applications for industrial sensing and automation, military, automobile, vehicle tracking or remote factory management. You can add the following accessories to your Plug & Sense! units:

| Accessories                        | Smart Env. PRO | Smart Agric. | Smart Water | Smart Water Ions | Smart Cities PRO | Smart Parking | Smart Security | 4-20 mA | Radiation Control | Ambient Control | Ref.         | Price |
|------------------------------------|----------------|--------------|-------------|------------------|------------------|---------------|----------------|---------|-------------------|-----------------|--------------|-------|
| RS-485 / Modbus Module             | ✓              | ✓            | ✗           | ✗                | ✓                | ✗             | ✓              | ✓       | ✓                 | ✓               | RS-485-PS    | 120 € |
| RS-485 / Modbus Module (4G models) | ✓              | ✓            | ✗           | ✗                | ✓                | ✗             | ✓              | ✓       | ✓                 | ✓               | RS-485-PS-4G | 90 €  |
| CAN Bus Module                     | ✓              | ✓            | ✗           | ✗                | ✓                | ✗             | ✓              | ✓       | ✓                 | ✓               | CAN-PS       | 110 € |
| CAN Bus Module (4G models)         | ✓              | ✓            | ✗           | ✗                | ✓                | ✗             | ✓              | ✓       | ✓                 | ✓               | CAN-PS-4G    | 85 €  |

*Note: These accessories need special Plug & Sense! versions (called "Industrial Protocols ready"). Just remember to indicate to your sales agent the Plug & Sense! units where you want to use the Industrial modules.*

In the case you chose any of the above options, you will need one or more of these accessories to connect your industrial devices to Plug & Sense!:

| Sensor             | Ref.   | Price |
|--------------------|--------|-------|
| Terminal box probe | 9270-P | 30 €  |
| DB9 probe          | DB9-P  | 25 €  |

## Accessories

The following items are optional. Feel free to choose!

| Accessories                                 | Ambient Control | Smart Cities PRO | Smart Parking    | Smart Environment PRO | Smart Agriculture | Smart Security | Smart Water      | Smart Water Ions | 4-20 mA | Radiation Control | Ref.   | Price |

1.- You can add a GPS receiver to your Plug & Sense! units. That is great for locating each node and tracking applications. The GPS accessory needs special Plug & Sense! versions (called "GPS-ready"). Just remember to indicate to your sales agent the Plug & Sense! units where you want to have a GPS.

2.- Extension cords are compliant with most sensor probes (not compliant for example with I2C probes or other digital probes). One extension cord per sensor required.

3.- In Smart Water or Smart Water Ions, extension cords are only compliant with the Soil/Water temperature probe.

4.- A single magnet can be used for many motes. It is highly recommended.

5.- The magnet is EXTREMELY recommended for Smart Parking.

Now that you have configured your hardware, go to **Data** section to decide how to connect to the Cloud.

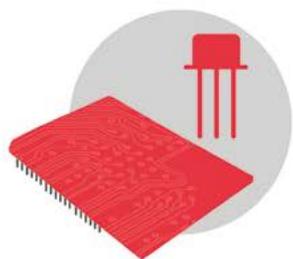

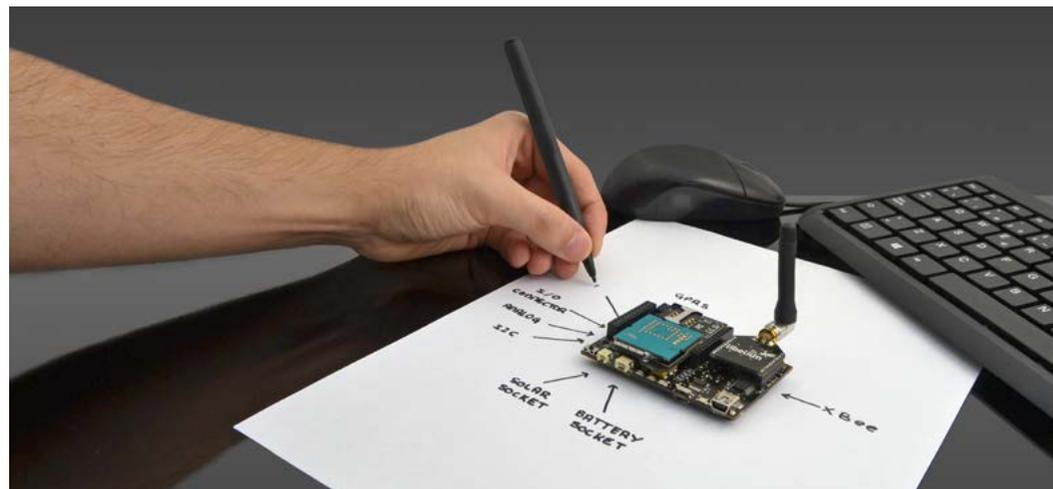

We provide prices in USD to US customers. Please submit your RFQ, and we will provide you with the USD prices.

# Wasmote OEM: technology for developers

Wasmote OEM is the best option to research and develop. With a good C++ programming level, you can explore multiple possibilities with its Open Source API, 400+ online code examples and documentation.

Since it has no enclosure, you can try all kind of different hardware combinations, it is more handy to work with it at your lab table and you can use that extra money in getting more sensors and communication modules.

For configuring your hardware you will have to choose:

Board + Sensors

+

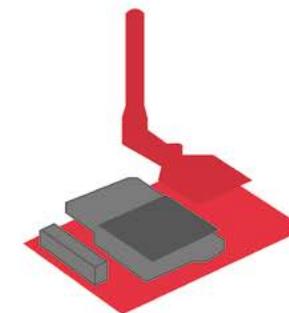

Communication Protocol

=

Your Custom Device

## Sensors

To make the deployment of IoT sensor networks easier, we have created 10 sensor boards to integrate more than 110 different sensors.

lons). It is not valid for the single or PRO type sensors.

9. This reference probe is **mandatory** for any ion sensor of the PRO type. It is not valid for the single or double type sensors.

1. For doors and windows.

2. VOC sensors are connected to the same socket, thus, it is not possible to have them working within the same board at the same time, but they are interchangeable.

3. Calibrated gas sensors are manufactured once the order has been placed to ensure maximum durability of the calibration feature. Manufacturing process and delivery may take from 4 to 6 weeks. Lifetime of calibrated gas sensors is 6 months working at maximum accuracy. We strongly encourage our customers to buy extra gas sensors to replace the original ones after that time to ensure maximum accuracy and performance.

4. Each Smart Water or Smart Water ions board includes a Soil/Water temperature sensor.

5. In each agriculture board, 3 soil moistures can be connected in order to measure the parameter in different depth levels.

6. This pack comprises the turbidity sensor and calibration kits. Sensor is calibrated in factory. Pack available on demand.

7. This reference probe is **mandatory** for ion sensors like Fluoride (F<sup>-</sup>), Fluoroborate (BF<sub>4</sub><sup>-</sup>), Nitrate (NO<sub>3</sub><sup>-</sup>) and pH (for Smart Water Ions). It is not valid for the double or PRO type sensors.

8. This reference probe is **mandatory** for ion sensors like Bromide (Br<sup>-</sup>), Chloride (Cl<sup>-</sup>), Cupric (Cu<sup>2+</sup>), Iodide (I<sup>-</sup>), Silver (Ag<sup>+</sup>) and pH (for Smart Water

An accessory composed of a mounting bracket and a leveling plate is advised for the Solar radiation (PAR) and Ultraviolet sensor probes (check delivery time with your sales agent):

| Item                             | Ref. | Price |
|----------------------------------|------|-------|
| Solar Sensors Mounting Accessory | SSMA | 85 €  |

For Smart Water and for Smart Water Ions sensors it is highly recommended to purchase calibration solutions to calculate accurate measurement.

One kit is enough for several sensor units:

| Calibration Kit   | Ref. | Price |
|---|------|-------|
| Conductivity Calibration Kit, K=0.1   | 9339 | 28 €  |
| Conductivity Calibration Kit, K=1   | 9340 | 28 €  |
| Conductivity Calibration Kit, K=10  | 9341 | 28 €  |
| DO Calibration Solution   | 9342 | 42 €  |
| Dissolved Oxygen Maintenance Kit  | 9450 | 144 € |
| pH Calibration Kit  | 9343 | 63 €  |
| ORP Calibration Solution  | 9344 | 42 €  |
| Turbidity Calibration Kit (low)   | TCL  | 144 € |
| Turbidity Calibration Kit (high)  | TCH  | 186 € |
| Reference Sensor Probe [PRO] Maintenance Solution   | 9449 | 119 € |
| Multi-Ions Calibration Kit (Ammonium, Calcium, Chloride, Magnesium, Nitrate, Potassium, Sodium) | 9445 | 144 € |

| Calibration Kit              | Ref. | Price |
|------------------------------|------|-------|
| Bromide Calibration Kit      | 9388 | 119 € |
| Calcium Calibration Kit      | 9366 | 119 € |
| Chloride Calibration Kit     | 9389 | 119 € |
| Cupric Calibration Kit       | 9390 | 119 € |
| Fluoride Calibration Kit     | 9367 | 119 € |
| Fluoroborate Calibration Kit | 9368 | 119 € |
| Iodide Calibration Kit       | 9391 | 119 € |
| Lithium Calibration Kit      | 9446 | 144 € |
| Nitrate Calibration Kit      | 9369 | 119 € |
| Nitrite Calibration Kit      | 9447 | 144 € |
| Perchlorate Calibration Kit  | 9448 | 114 € |
| Silver Calibration Kit       | 9392 | 119 € |

## Configuring your Wasmotes: Connectivity

Wasmote model is determined by the selected communication radio. Each Wasmote model can have different types of antenna: 2dBi or 5dBi for 2.4 GHz models and 4.5dBi for the rest of frequencies.

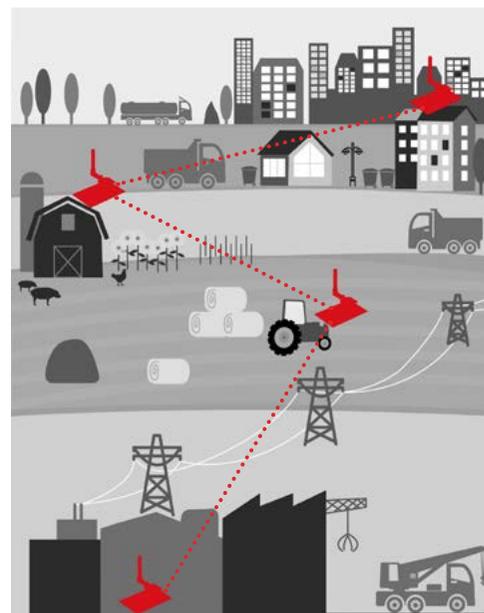

WiFi  
Bluetooth  
Bluetooth Low Energy

~ 0-300 m

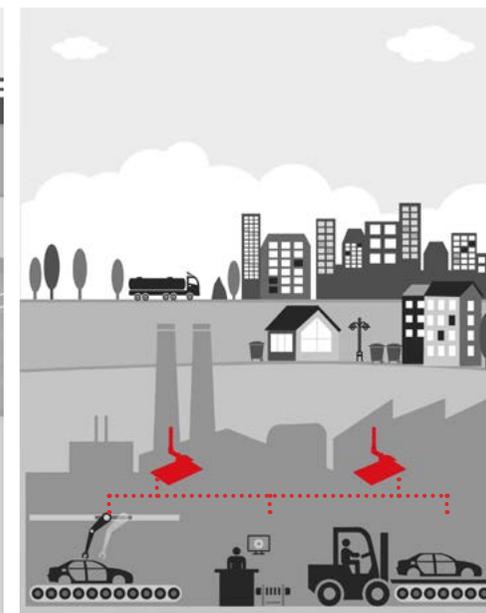

4G - NB-IoT - Cat-M - 3G - GPRS - Sigfox -  
LoRaWAN

Typical carrier range

802.15.4  
Digimesh  
ZigBee-PRO  
868 MHz  
900 MHz  
LoRa

~ 7-22+ Km

RS-485  
4-20 mA  
CAN Bus  
Modbus

~ 0-200 m

## Industrial Protocols

Wasmote can integrate communication modules for the most common wired communication protocols: RS-485, CAN Bus and Modbus. These are widely used standards in the industrial and automation market for connecting devices and sensors, not in a wireless way but with cables. The user can interface Wasmote ecosystem with these protocols.

Wasmote allows to perform three main applications:

1. Connect any sensor to an existing industrial bus.
2. Add wireless connectivity to wired buses.
3. Connect to the Cloud industrial devices.

### Wasmote price chart depending on model:

| Model                               | Ref.   | Price |
|-------------------------------------|--------|-------|
| Wasmote RS-485 / Modbus + DB9 cable | WA-485 | 210 € |
| Wasmote CAN Bus + DB9 cable         | WA-CAN | 222 € |

Wasmote RS-232 Serial / Modbus

## Expansion Radio Board

The Expansion Board allows to connect two radios at the same time. This means a lot of different combinations are possible using any of the radios available for Waspnote: 802.15.4, ZigBee, DigiMesh, 868 MHz, 900 MHz, LoRa, WiFi, GPRS, 3G, NB-IoT, Cat-M, 4G, Sigfox, LoRaWAN, Bluetooth Pro, Bluetooth Low Energy and RFID/NFC. Besides, the Expansion Radio Board can be utilized to connect the Industrial Protocols modules.

Applications:

- Multifrequency Sensor Networks: (2.4GHz – 868/900MHz, LoRa)
- Sigfox - ZigBee hybrid networks
- NFC (RFID) applications with GPRS
- LoRaWAN - WiFi hybrid networks
- Industrial Protocols – wireless hybrid networks

## Extracting the data

The last point for configuring a sensor network is to decide the way to access the data. There are 3 alternatives:

### Meshlium

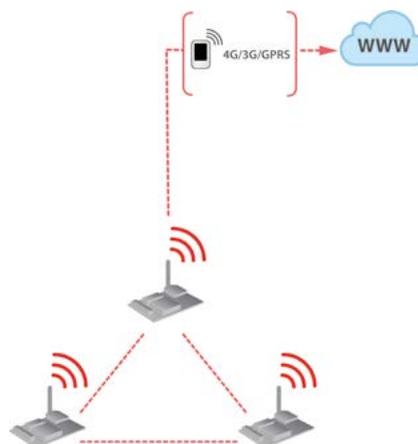

This is the most recommended option for outdoor networks since it is encased in a rugged, waterproof enclosure which protects it from the harshest conditions. It can receive, parse and store frames in its local database. Meshlium can also forward sensor data directly to the Internet via Ethernet or GPRS/3G/4G protocols, depending on the connectivity options available in the area.

### Waspnote GPRS / 3G / NB-IoT / Cat-M / 4G / Sigfox / LoRaWAN

GPRS, 3G, NB-IoT, Cat-M or 4G can be used in networks placed in difficult access locations, when using a single point of data collection alone or in combination with the other two options, using the cellular radio only to send SMS alert messages.

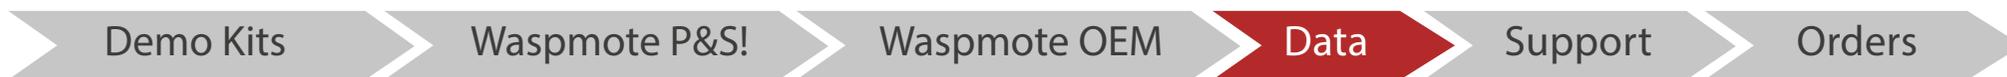

Sigfox and LoRaWAN are special cases of cellular communications: LPWAN (Low Power, Wide Area Network). They are indicated for many applications (Smart Cities, Smart Parking, security, etc). Nodes send data directly to the back-end with low power consumption and cheap fees.

### Waspnote Gateway

Connected by USB to a computer. This is recommended for applications of few nodes that are indoors or for testing while configuring the network. The Waspnote Gateway is also used to send commands to the sensor network, thus at least one unit should be purchased with the first kit of Waspnotes.

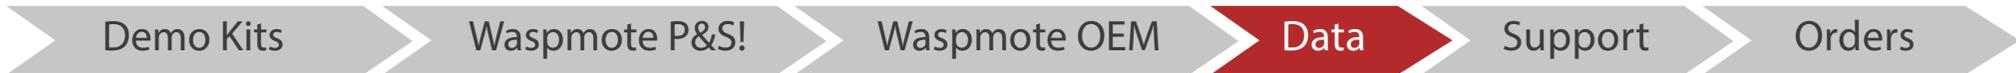

## Meshlium

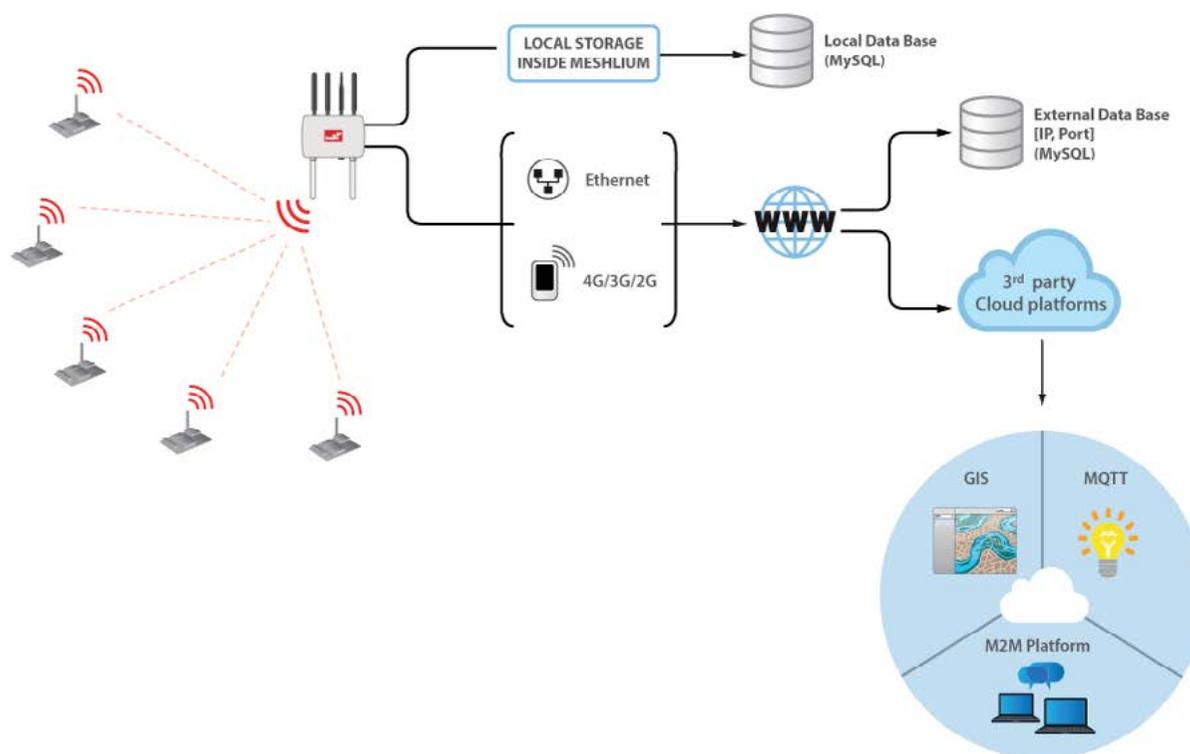

Meshlium is the best Internet Gateway for Wasp mote. It is a Linux-based router, totally modular and specially designed for harsh conditions without compromising flexibility in the installation. Meshlium can directly send sensor data from Wasp mote to many 3rd party Cloud platforms.

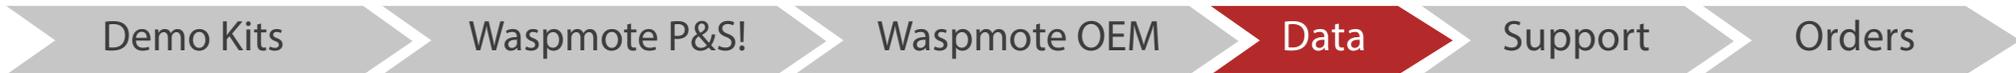

|                    |  |
|--------------------|--|
| Any scenario       | <ul style="list-style-type: none"> <li>• Communication: <ul style="list-style-type: none"> <li>- Wasp mote → Meshlium: 802.15.4, 868/900MHz</li> <li>- Meshlium → Internet: Ethernet and 4G/3G/GPRS</li> </ul> </li> <li>• WiFi and Bluetooth interface detection to detect smartphones (traffic congestion applications)</li> <li>• GPS receiver</li> </ul> |
| Fast configuration | <ul style="list-style-type: none"> <li>• GUI to configure in a visual and easy way (includes factory presets to make installation even faster)</li> <li>• Integrated with 3rd party Cloud platforms, required agents installed by default in all Meshliums</li> </ul>  |
| Easy installation  | <ul style="list-style-type: none"> <li>• Special holders and brackets to install in street lights and building fronts</li> <li>• Elbow connectors included in all models to place antennas horizontally</li> <li>• External socket for SIM card</li> </ul>   |
| Easy maintenance   | <ul style="list-style-type: none"> <li>• Get the latest software version with just one click</li> <li>• Robust waterproof IP65 enclosure</li> <li>• Notifications buzzer</li> </ul>  |
| Fully certified    | <ul style="list-style-type: none"> <li>• CE (Europe)</li> <li>• FCC (US)</li> <li>• IC (Canada)</li> <li>• ANATEL (Brazil)</li> <li>• RCM (Australia)</li> <li>• PTCRB (cellular certification for US)</li> <li>• AT&amp;T (cellular certification for US)</li> </ul>  |

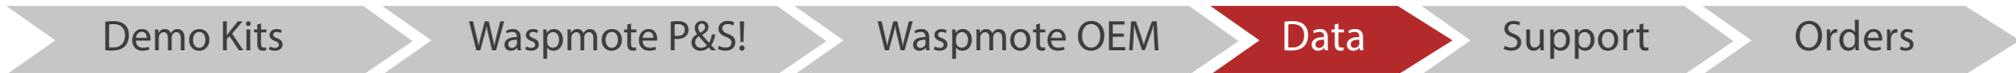

Libelium has partnered with the best Cloud software solution providers to offer you all the necessary components to deploy Internet of Things (IoT), machine-to-machine (M2M) or Smart Cities projects with minimum time to market. Meshlium is able to send data to the Cloud in a transparent way:

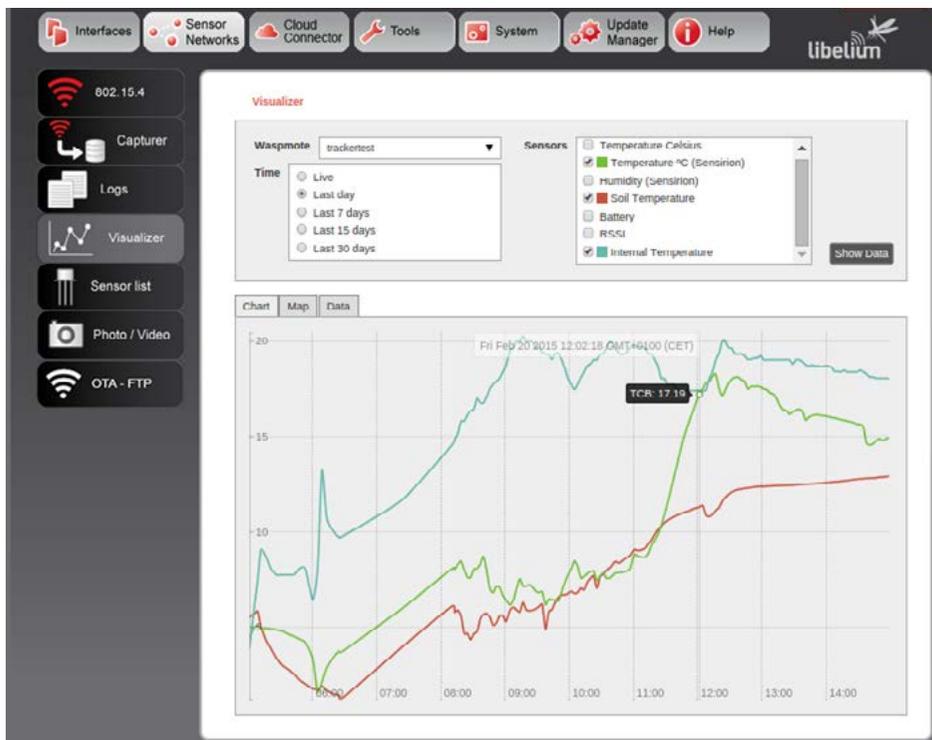

Meshlium includes internal software units called "Cloud Connectors" that allow the information gathered to be easily sent to any of the next Cloud Platforms. Note that data can be also stored in the internal database of Meshlium or even sent to any other Cloud Platform (for more info about how being part of the official Cloud Connectors Program go to <http://www.libelium.com/products/meshlium/wsn/>).

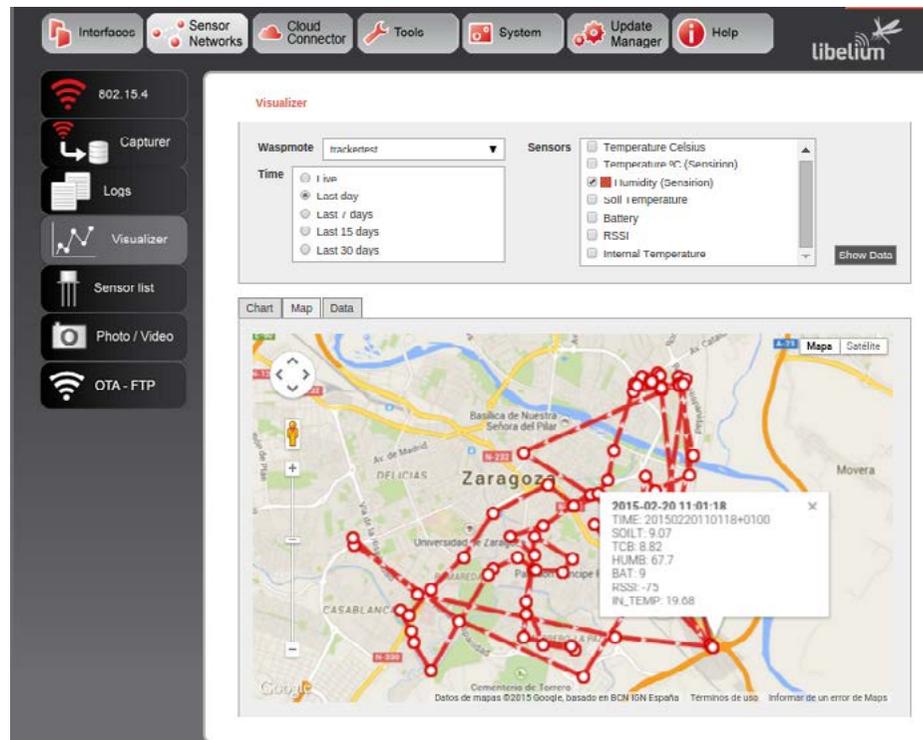

## Meshlium Visualizer

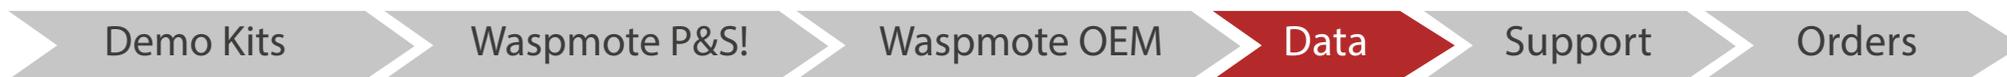

This software feature allows to plot beautiful graphs with Meshlium. Meshlium Visualizer is only included in IoT Vertical Kits and Solution Kits with Meshlium. The service is valid for Libelium standard sensors.

The following accessory is optional.

| Item  | Ref.  | Price |
|---|-------|-------|
| International adapter *                     | 10280 | 8 €   |
| Directional Antennas for Meshlium Scanner** | MDA   | 150 € |

\* Plug adapter for the mains electricity in countries like USA, UK, Australia, Canada, China, Japan, Singapore or Hong Kong. Highly recommended for powering Meshlium.

\*\* This is a kit of 2 outdoors directional antennas (14 dB) for WiFi and Bluetooth, mounting kits, 3 m cables and adapters. The kit is specially indicated for Vehicle Detection applications because it enlarges the range area.

Directional antenna for Meshlium Scanner

We provide prices in USD to US customers. Please submit your RFQ, and we will provide you with the USD prices.

\* This radio includes a GPS receiver.

\*\*Does NOT include Sigfox connectivity, the user must hire this service directly from Sigfox. Check network availability in your country.

Libelium offers Sigfox radios with 1-year license in the Sigfox IoT Starter Kit. Contact our [Sales Team](#) for more info.

## LoRaWAN base stations

Libelium distributes base stations for LoRaWAN networks. They are manufactured by the company MultiTech. All of them have LoRaWAN and Ethernet connection; some feature 4G connectivity too. These base stations are ready to work outdoors (IP67 grade), and come with lightning arrestor and grounding protection, PoE powering system, a mounting kit and all needed cables and antennas. They run the AEP operating system (enhanced closed-source Linux distro).

There are EU, US and AU versions, and some of them come pre-configured for some LoRaWAN cloud servers:

| Model   | User Zone | Operating system | Pre-configured for LoRaWAN servers             | 4G connectivity? | Ref.                 | Price   |
|---|-----------|------------------|--|------------------|----------------------|---------|
| Multitech Conduit LoRaWAN Base Station, 4G, AEP, EU version (embedded Network Server) | EU        | AEP              | No, but has an embedded LoRaWAN Network Server | ✓                | MLRWBS-4G-AEP-ENS-EU | 1,400 € |
| Multitech Conduit LoRaWAN Base Station, 4G, AEP, US version (embedded Network Server) | US        | AEP              | No, but has an embedded LoRaWAN Network Server | ✓                | MLRWBS-4G-AEP-ENS-US | 1,400 € |
| Multitech Conduit LoRaWAN Base Station, AEP, AU version (embedded Network Server)     | AU        | AEP              | No, but has an embedded LoRaWAN Network Server | ✗                | MLRWBS-AEP-ENS-AU    | 1,200 € |
| Multitech Conduit LoRaWAN Base Station, 4G, AEP, EU version (configured for Lorient)  | EU        | AEP              | Yes, Lorient                                   | ✓                | MLRWBS-4G-AEP-L-EU   | 1,400 € |
| Multitech Conduit LoRaWAN Base Station, 4G, AEP, US version (configured for Lorient)  | US        | AEP              | Yes, Lorient                                   | ✓                | MLRWBS-4G-AEP-L-US   | 1,400 € |
| Multitech Conduit LoRaWAN Base Station, AEP, AU version (configured for Lorient)      | AU        | AEP              | Yes, Lorient                                   | ✗                | MLRWBS-AEP-L-AU      | 1,200 € |

## Getting support

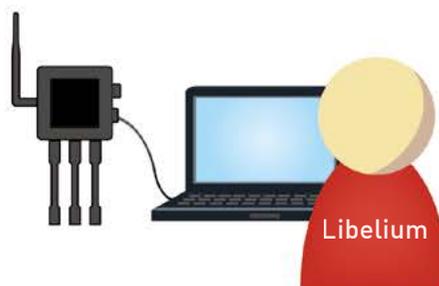

### Waspnote Plug & Sense! devices factory-programmed

If you want to save time and development costs you do not need to program anything, we can ask you about the requirements and ship your devices factory-programmed and ready to plug and sense.

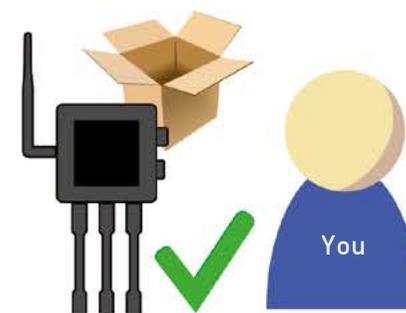

|   |          |               |
|---|----------|---------------|
| Plug & Sense! Programming Service (includes the creation of up to 3 different binaries and the upload of them into 5 Plug & Sense! nodes) | PROG     | 600 €         |
| Additional Nodes Upload Service   | PROG-UPL | 24 € per node |

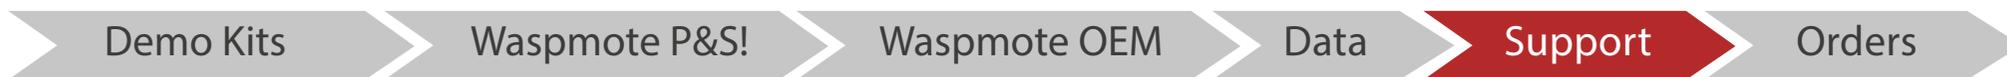

Fill the features of code in the form

We program your devices

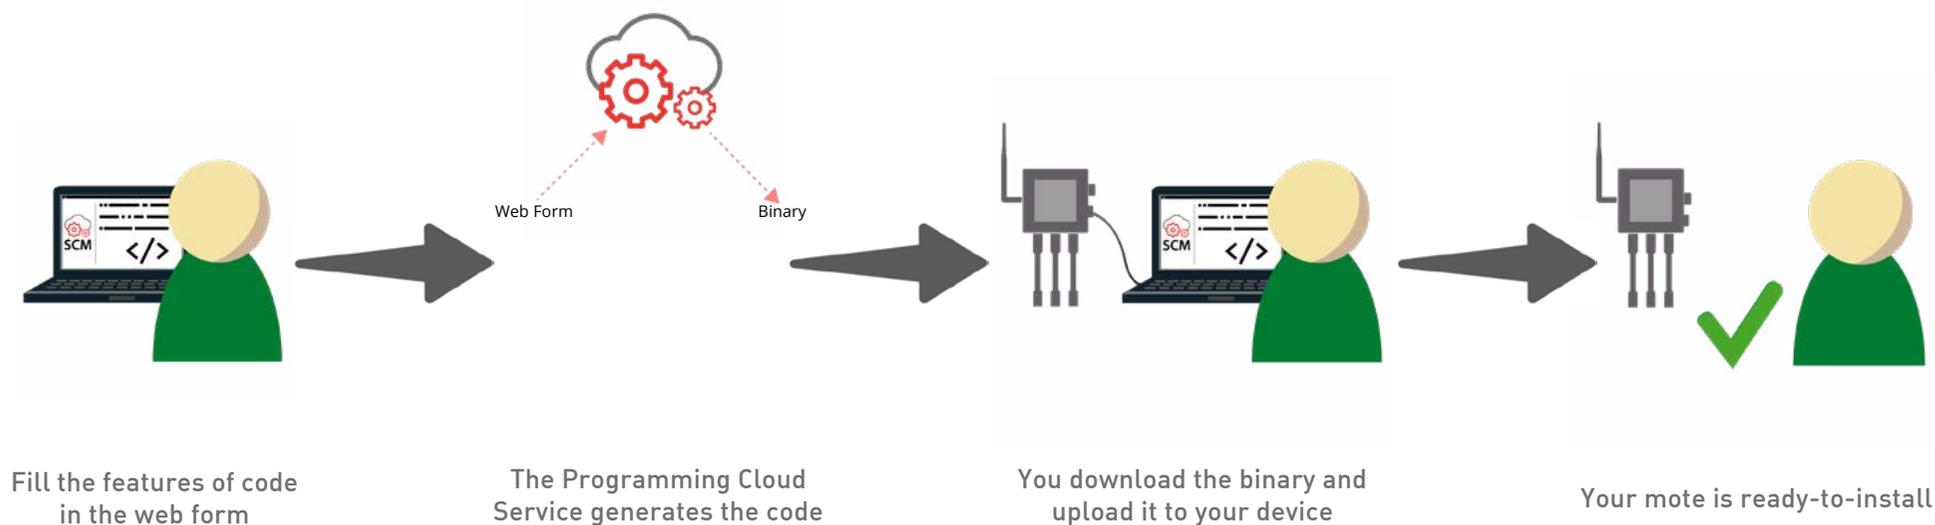

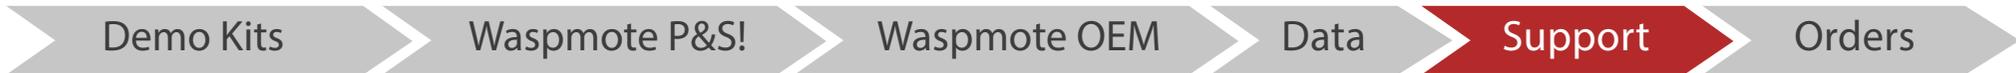

You receive ready-to-install notes

## Waspnote Plug & Sense! programmer on the cloud

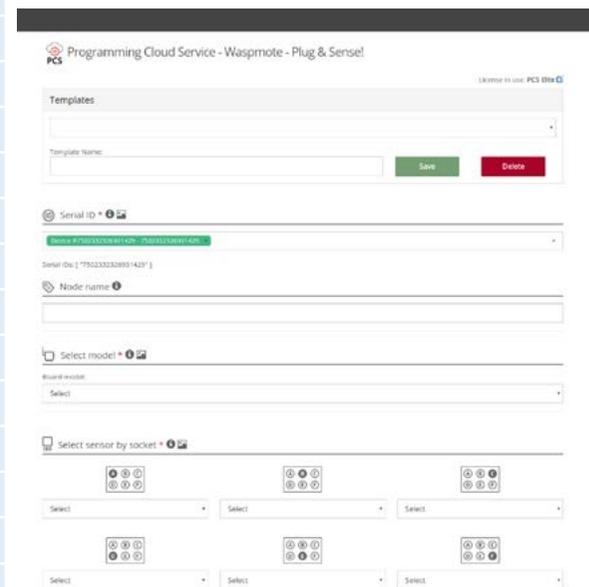

The **Programming Cloud Service** is an intuitive graphic interface which creates code automatically. The user just needs to fill a web form to obtain binaries for Plug & Sense!.

Advanced programming options are available, depending on the license selected:

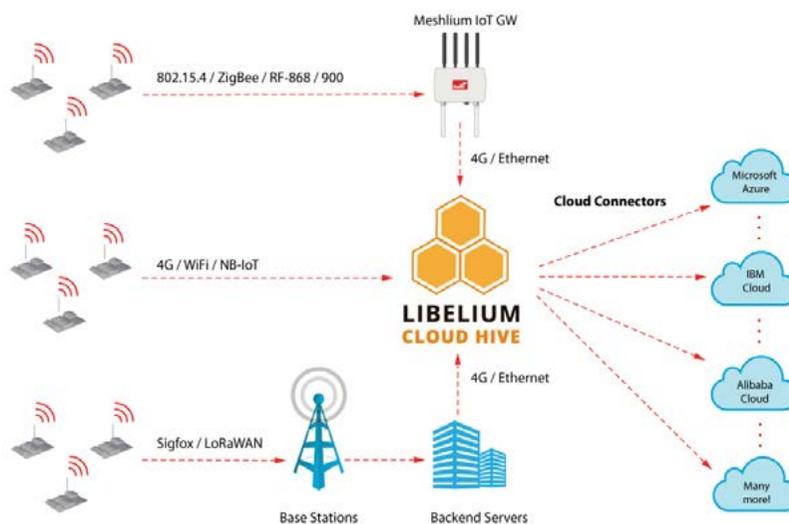

|  | Basic | PRO   | Elite   |
|--|-------|-------|---------|
| Nodes to program   | 6     | 20    | 100     |
| Plug & Sense! models supported                                   | All   | All   | All     |
| Sensors supported  | All   | All   | All     |
