

A large, stylized yellow 'C' shape is positioned in the upper left. Below it, a smaller yellow 'L' shape is partially visible. To the left of the 'Photo Link' text, there is a yellow square and a yellow 'L' shape, both partially cut off by the left edge of the page.

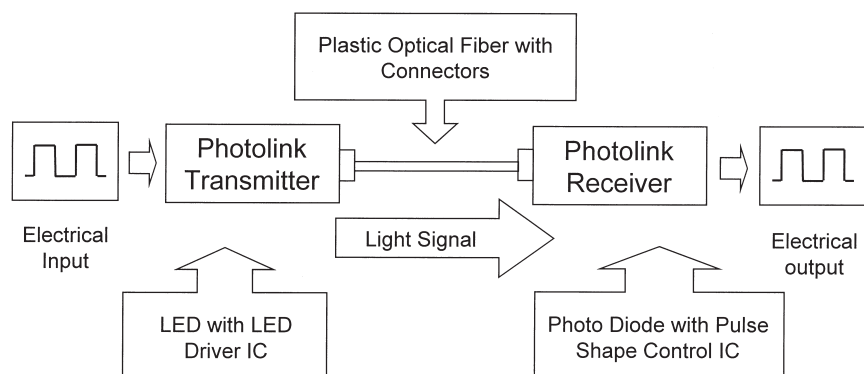

Photo Link

PhotoLink : Digital Audio Signal Transmission by Plastic Optical Fiber.

Plastic Optical Fiber, abbreviated POF, typically uses PMMA (acrylic), a general purpose resin as the core material, and fluorinated polymers for the clad material. In large-diameter fibers, 96% of the cross section is the core that allows the transmission of light. POF had been called the “consumer” optical fiber, It has fiber diameter of 1000 μm , with a core diameter of 980 μm .

POF has been used for transmission due to the fact that costs of POF, associated optical links, connectors and installation costs are low.

Construction of Photolink (Transmitter and Receiver)

Photolink Transmitter (TA/TX)

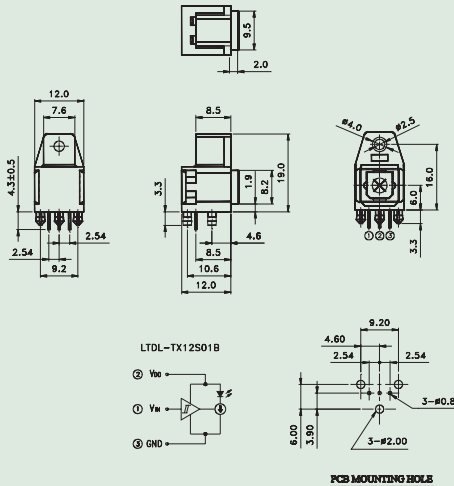

- Constructed by **red-light LED** and **LED driver**
- Converting electrical signal into optical one
- Transmitting optical signal into optical fiber

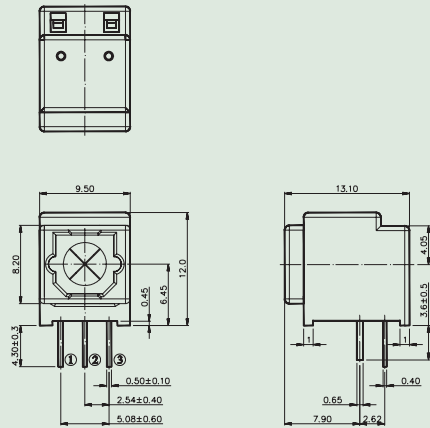

Photolink Receiver (RA/RX)

- Constructed by **photo diode** and **pulse shape control IC**
- Receiving the optical signal from optical fiber
- Converting optical signal into electrical one

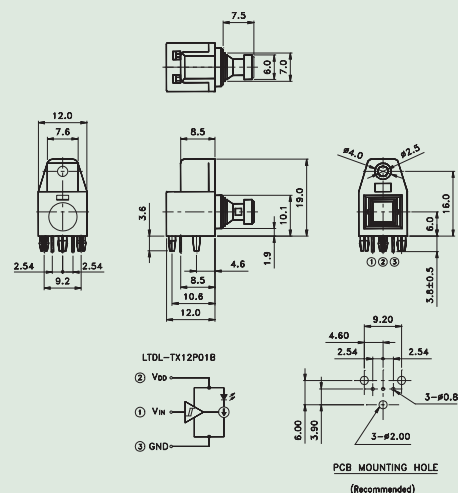

Photolink Product Family

	Component	Component + Housing = Connector
Photolink Transmitter (TA/TX)	Transmitter Component LTDL-TA12A LTDL-TA12B	Transmitter Connector LTDL-TX12P series (Cap Housing) LTDL-TX12S series (Shutter Housing)
Photolink Receiver (RA/RX)	Receiver Component LTDL-RA12A LTDL-RA12B	Receiver Connector LTDL-RX16P series (Cap Housing) LTDL-RX16S series (Shutter Housing)
Customers	Connector Marks	Consumer Field DVD Player, DVR, MD (Mini Disk), Stereo System, Game Console, STB (Set-Top Box) Consumer Field Mother Board, NB, Sound Card
