

Thermistor Probes and Assemblies

NPSS Series - Straight

NTC Straight Thermistor Probe With Stainless Steel Housing

REACH RoHS

Description

The NPSS series straight, stainless-steel NTC thermistor probe assemblies are suitable for a broad range of temperature sensing applications. The standard probe housings range in size from less than 1.066 mm to 11.125 mm in diameter with various lengths and a wide selection of lead wire materials and terminations. The high stability, precision, cost, and inherent ruggedness of these probe assemblies makes them an excellent temperature standard for medical, consumer, and industrial electronics applications.

If off-the-shelf solutions are not applicable, Littelfuse can customize the probe assemblies per customer specifications.

Features

- 300 series stainless steel
- Standard and moisture resistant
- Wide range of resistance and tolerances
- Fast and simple design
- Max operating temperature is 300 °C
- Highly stable electrical characteristics

Benefits

- High reliability
- Efficient
- Wide selection of probe diameters
- Assembled with terminal ends or without

Applications

- Food handling and processing
- Medical equipment
- Consumer electronics
- HVAC
- Aerospace
- Communication and instrumentation
- Industrial electronics
