

## ALTA® Wireless Differential Pressure Sensors

### General Description

[ALTA® Wireless Differential Pressure Sensors](#) measure the pressure difference between two input ports.

### Key Features

- ▶ Measurement Range: -500 Pa to 500 Pa
- ▶ Accuracy:  $\pm 3\%$  of reading  $\pm 0.1$  Pa
- ▶ Calibrated
- ▶ Temperature compensated
- ▶ Configurable thresholds for critical condition monitoring

### Principles of Operation

The ALTA Wireless Differential Pressure Sensor measures the pressure difference between two input ports based on a user-configurable time interval or Heartbeat. When viewing the sensor from the top, the right inlet port is the positive or high-side pressure input. When the pressure on this port is greater than the pressure on the left port, the sensor produces a positive pressure reading. When the pressure is greater on the left port the sensor produces a negative pressure reading. On each Heartbeat, the current measurement is sent to the gateway, making the data available in iMonnit or another approved data service.

### Example Applications

- ▶ Building/Room Pressure
- ▶ Air Flow
- ▶ Variable Air Volume Filter Status
- ▶ Duct Pressure
- ▶ Clean Rooms
- ▶ Hospitals
- ▶ Fume Hoods
- ▶ Computer Rooms

## Commercial-Grade Sensors

Monnit commercial-grade sensors are designed for applications in ordinary environments (normal room temperature, humidity, and atmospheric pressure). Do not use these sensors under the following conditions, as these factors can deteriorate the product characteristics and cause failures and burnout.

- Corrosive gas or deoxidizing gas: chlorine gas, hydrogen sulfide gas, ammonia gas, sulfuric acid gas, nitric oxide gas, etc.
- Volatile or flammable gas
- Dusty conditions
- Low-pressure or high-pressure environments
- Wet or excessively humid locations
- Places with salt water, oils, chemical liquids, or organic solvents
- Where there are excessively strong vibrations
- Other places where similar hazardous conditions exist

Use these products within the specified temperature range. Higher temperatures may cause deterioration of the characteristics or the material quality.

## Industrial-Grade Sensors | Type 1, 2, 4, 4X, 12, and 13 NEMA-Rated Enclosure

Monnit's industrial sensors are enclosed in reliable, weatherproof NEMA-rated enclosures. Our NEMA-rated enclosures are constructed for indoor and outdoor use and protect the sensor circuitry against the ingress of solid foreign objects like dust and the damaging effects of water.

- Safe from falling dirt
- Protects against wind-blown dust
- Protects against rain, sleet, snow, splashing water, and hose-directed water
- Increased level of corrosion resistance
- Will remain undamaged by ice formation on the enclosure
