

10 MILLION CYCLES, CONTACTLESS HALL EFFECT TECHNOLOGY

The HP7C Hall effect momentary action pushbutton series shares similar characteristics to the HP7 series but is a lower cost version made with a thermoplastic case and a nylon button. With a 10 million cycle life, the HP7C works well in industrial joystick controls, remote controls and other applications requiring high reliability and high rates of actuation. PC pins or wire leads are standard with value-added connectors available to specification.

Features:

- 10 million cycles
- Hall effect technology for long life
- Stylish dome-shaped buttons in 9 colors
- Momentary action
- PC pin or wire lead termination styles
- RoHS compliant
