

PanView iQ™ (PViQ™) 12V Power Supply

specifications

The PViQ™ Power Supply shall provide 12V DC power to a single PViQ™ System, consisting of one panel manager and three expansion modules. The power supply shall connect to the Panel Manager, which then branches the power to the expansion modules. Geographic-specific models of the Power Supply are available, provided with an AC power cord specific to each region.

technical information

Dimensions:	1.32"H x 4.33"W x 2.13"D (34mm x 110mm x 54mm)
Weight:	0.924 lbs. (0.42 kg)
Input voltage:	100 to 250V AC
Input frequency:	47 to 63 Hz
Output voltage:	12V DC +/- 0.6V
DC output power:	30W Max
DC output connector:	2.1mm (inside diameter) x 5.5mm (outside diameter) barrel plug right angle (center = positive)
DC output current:	2.5A Max
DC power cord length:	60" (1524mm) Nominal
AC power cord:	Determined by power supply part number (see page 2)
Packaging:	Includes power supply with attached DC output cord and removable region-specific AC power cord

key features and benefits

Regional power conversion	Five models available with AC power connectors specific to geographic regions
Flexibility	Compact size allows for placement in a variety of zero-RU locations within the cabinet

applications

Panduit's PViQ™ System Hardware, which includes intelligent patch panels, modules, and cabling, seamlessly feeds information directly into the Physical Infrastructure Manager™ (PIM™) Software Platform to provide continuous real-time patch field monitoring and visibility of physical infrastructure connectivity, for enhanced system reliability and security, and capacity management.

The PViQ™ Power Supply converts local AC power to 12V DC electricity to provide regulated power to a PViQ™ Panel Manager and up to three expansion modules.
