Revision History

| Rev A | 04/03/2012 | Initial Release |
|-------|------------|--|
| Rev B | 07/30/2012 | Added IDAN Photos. Corrected Pin out of IDAN power input connector. Added heat sink photo. |
| Rev C | 05/01/2014 | Referenced mating connectors. |
| Rev D | 02/20/2015 | Added 3.3V to the design |
| Rev E | 05/31/2016 | Added new IDAN measured drawing (Figure 5) with the connector locations clearly displayed |
| Rev F | 10/06/2016 | Corrected Figure 3 and added information about the IDAN- XKCM44 |
| Rev G | 01/24/2017 | Adjusting images for clarity. |
| Rev H | 08/08/2019 | Corrected block diagram. |
| Rev I | 04/19/2024 | Enhanced IDAN power cable connector description |
| | | |

1 Introduction

1.1 **Product Overview**

The ATX3510HR is a 190 Watt embedded power supply with a PCle/104 stackable bus structure. With 5V standby, 5V main, 3.3V, and 12V, this module is also input protected against over-voltage, over-current, and reverse voltage. This rugged power supply is synchronized to reduce noise and system stress. The small footprint and high power capabilities of the ATX3510HR-190W make it suitable for many technology-rich, high-reliability military, industrial, and research applications.

The ATX3510HR-190W was designed to meet the power requirements of the PCle/104 Specification Version 2.01.

1.2 **Board Features**

- PCle pass through bus
- 16.8 Amps of 5V
- 2.0 Amps of 3.3V
- 8.4 Amps of 12V
- 2.0 Amps of 5VSB
- Remote ON/OFF control
- Reverse voltage protection
- Input over voltage protection
- Input over current protection
- ATX functionality

The ATX3510HR-190W is available with the following options:

Table 1: Ordering Options

| Part Number | Description |
|-----------------------|--|
| ATX3510HR-190W | Standard Configuration as pictured on cover |
| IDAN-ATX3510HR-190W | Board Mounted in IDAN frame |
| ID-ATX3510HR-190W | Board with screw terminals for power connections |
| ATX3510HR-190W-XNS | Standard Configuration as pictured on cover, except without downward |
| | express connector installed. |
| ID-ATX3510HR-190W-XNS | Board with screw terminals for power connections, except without |
| | downward express connector installed. |
| AC/DC-PS-190W | Recommended 24 V 220.8 Watt AC adapter |
| IDAN-AC/DC-PS-190W | Recommended 24 V 220.8 Watt AC adapter (for IDAN) |

AC/DC-PS-190W ,Pictured above, recommended for powering the ATX3510HR-190W

The Intelligent Data Acquisition Node (IDAN™) building block can be used in just about any combination with other IDAN building blocks to create a simple but rugged 104™ stack. This module can also be incorporated in a custom-built RTD HiDAN™ or HiDANplus High Reliability Intelligent Data Acquisition Node. Contact RTD sales for more information on our high reliability systems.

1.3 **Contact Information**

1.3.1 SALES SUPPORT

For sales inquiries, you can contact RTD Embedded Technologies sales via the following methods:

Phone: 1-814-234-8087 Monday through Friday, 8:00am to 5:00pm (EST).

E-Mail: sales@rtd.com

1.3.2 TECHNICAL SUPPORT

If you are having problems with you system, please try the steps in the Troubleshooting section of this manual.

For help with this product, or any other product made by RTD, you can contact RTD Embedded Technologies technical support via the following methods:

Phone: 1-814-234-8087 Monday through Friday, 8:00am to 5:00pm (EST).

E-Mail: techsupport@rtd.com

2 Specifications

2.1 **Operating Conditions**

Table 2: Operating Conditions

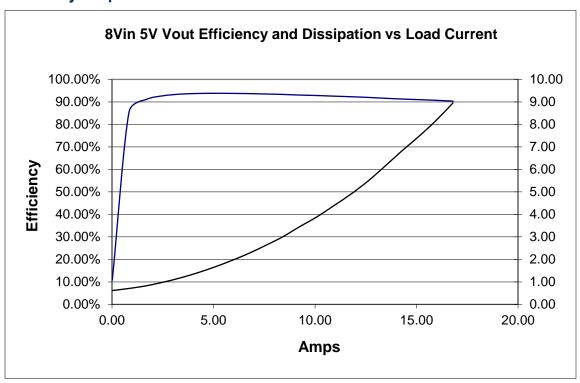

| Symbol | Parameter | Test Condition | Min | Max | Unit |
|--------|--------------------------|--|------|-------|-------|
| Vin | Supply Voltage | | 8.00 | 36.00 | V |
| Ta | Operating Temperature | | -40 | +85 | С |
| Ts | Storage Temperature | | -55 | +125 | С |
| RH | Relative Humidity | Non-Condensing | 0 | 90% | % |
| MTBF | Mean Time Before Failure | Telcordia Issue 2 30°C, Ground benign, controlled | | TBD | Hours |

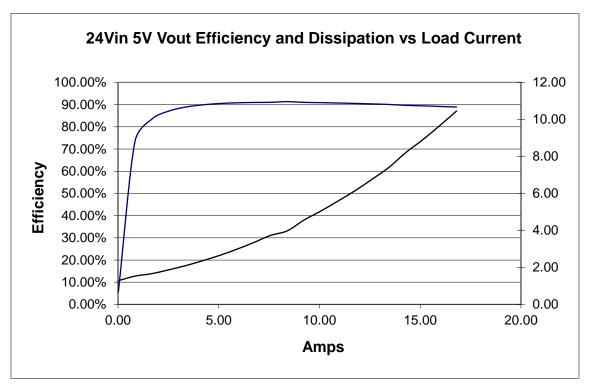

2.2 Electrical Characteristics

| Parameter | Test Condition | Max | Unit |
|-----------------------------|----------------------|-------|---------|
| Power Dissipation | 23°C 36.00V Vin four | 21.9 | W |
| | Hour Soak no Airflow | | |
| | no Heat Sink | | |
| Combined Efficiency 8Vin | 23°C Max load | 89.76 | % |
| Combined Efficiency 24Vin | 23°C Max load | 91.04 | % |
| Combined Efficiency 36Vin | 23°C Max load | 89.66 | % |

| 5V Efficiency with 24Vin | 23°C 16.8 Amp load | 88.91 | % |
| 5V Efficiency with 36Vin | 23°C 16.8 Amp load | 87.08 | % |
| 3.3V Efficiency with5Vin | 23°C 2.0 Amp load | 82.66 | % |
| 5VSB Efficiency with 8Vin | 23°C 2 Amp load | 94.54 | % |
| 5VSB Efficiency with 24Vin | 23°C 2 Amp load | 91.21 | % |
| 5VSB Efficiency with 36Vin | 23°C 2 Amp load | 88.77 | % |
| 12V Efficiency with 8Vin | 23°C 8.4 Amp load | 90.40 | % |
| 12V Efficiency with 24Vin | 23°C 8.4 Amp load | 94.55 | % |
| 12V Efficiency with 36Vin | 23°C 8.4 Amp load | 93.63 | % |
| 5V DC Load Regulation | 23°C | 22.00 | mV |
| 3.3V DC Load Regulation | 23°C | 20.00 | mV |
| 5VSB DC Load Regulation | 23°C | 4.00 | mV |
| 12V DC Load Regulation | 23°C | 40.00 | mV |
| 5VSB P-P voltage ripple | 23°C 2.0 Amp load | 22.00 | mV |
| 5V P-P voltage ripple | 23°C 16.8 Amp load | 50.80 | mV |
| 3.3V P-P voltage ripple | 23°C 2.0 Amp load | 78.40 | mV |
| 12V P-P voltage ripple | 23°C 8.4 Amp load | 47.60 | mV |
| Switching Frequency of 5V | 23°C | 400 | KHz+-2% |
| STBY, 5V, and 12V | | | |
| Switching Frequency of 3.3V | 23°C | 4.23 | MHz+- |
| | | | 10% |
| Reverse Voltage Protection | 23°C | -36 | V |

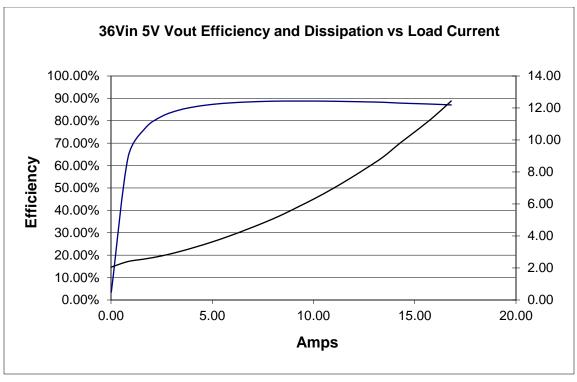

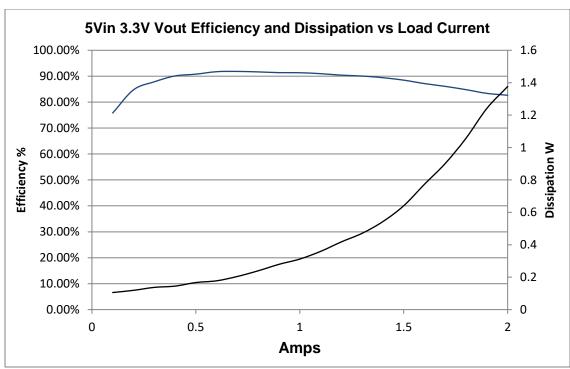

2.3 Efficiency Graphs

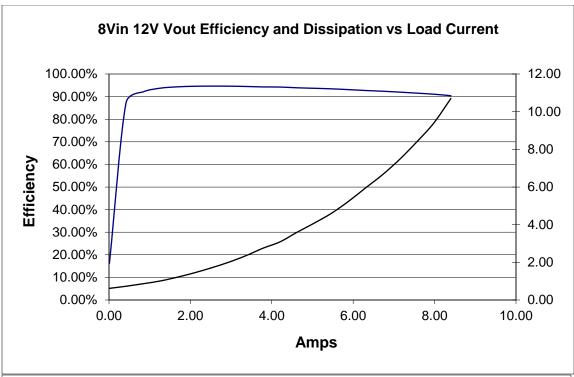

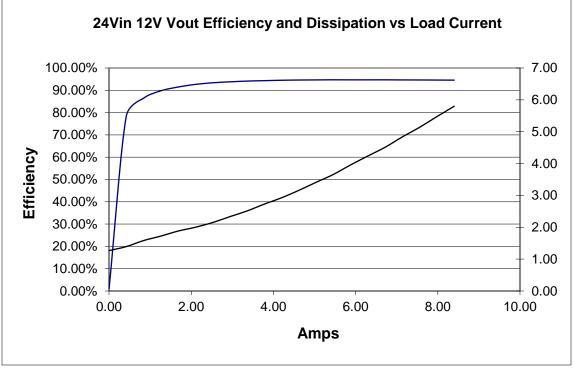

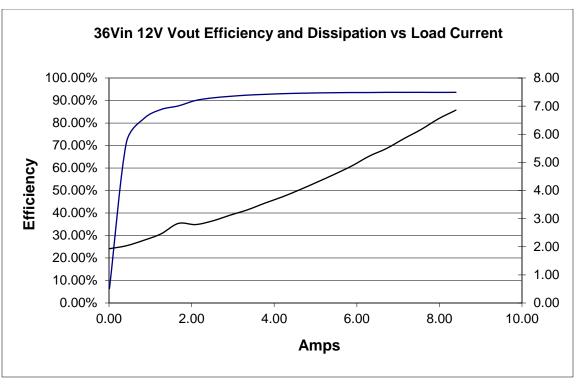

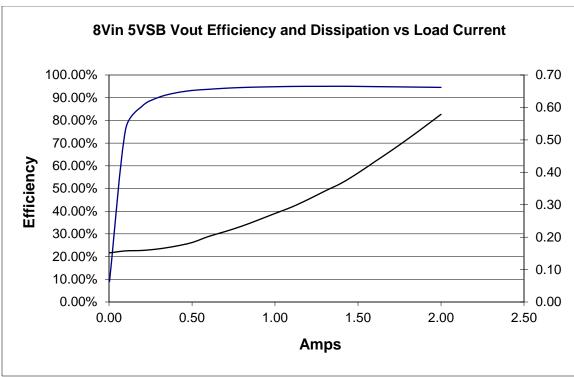

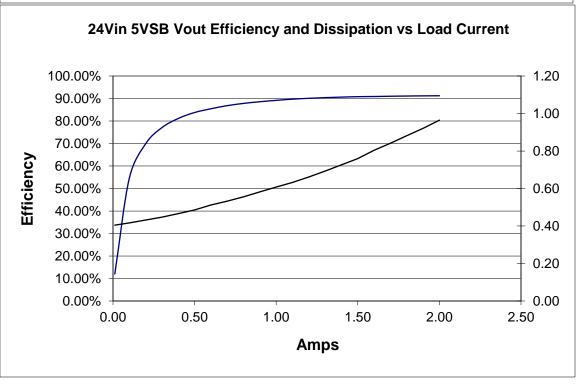

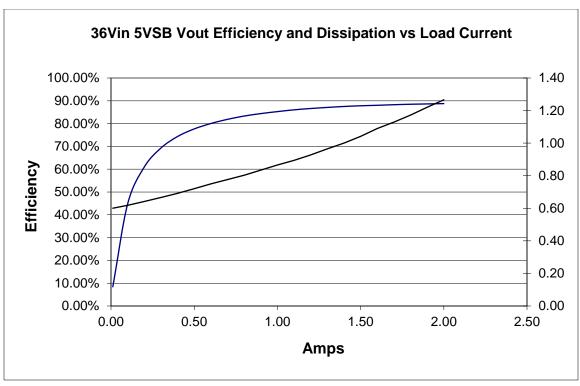

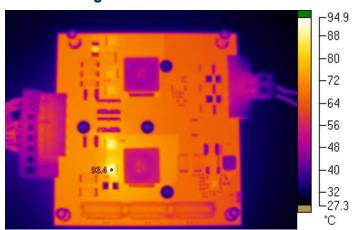

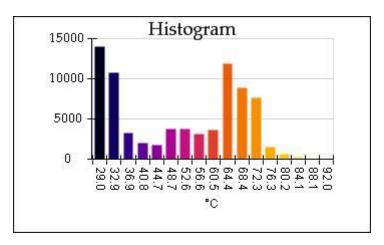

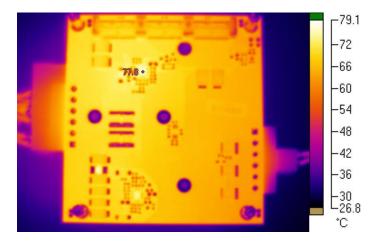

2.4 Thermal Image

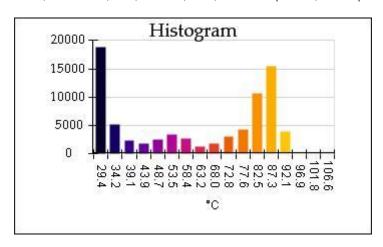

Top; No Heat Sink, 23°C, Max Load, 24Vin, At thermal equilibrium, Max temperature is 93.4C

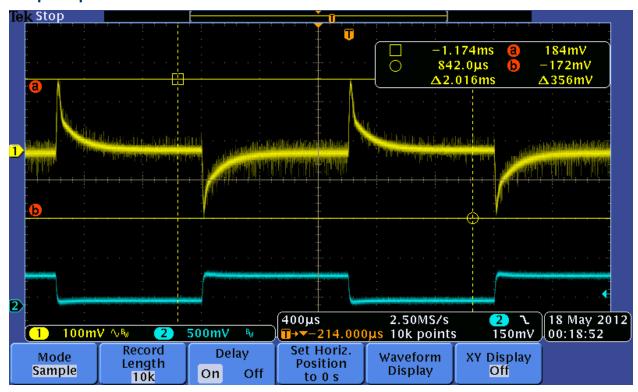

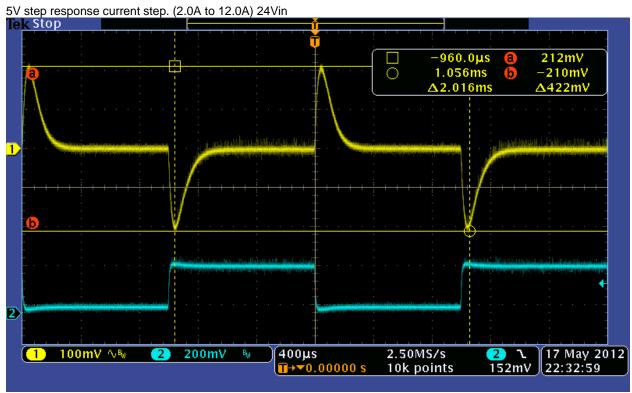

Bottom; No Heat Sink, 23°C, Max Load, 24Vin, At thermal equilibrium, Max temperature is 77.8C

2.5 Step Response

12V step response current step. (2.0A to 12.0A) 24Vin

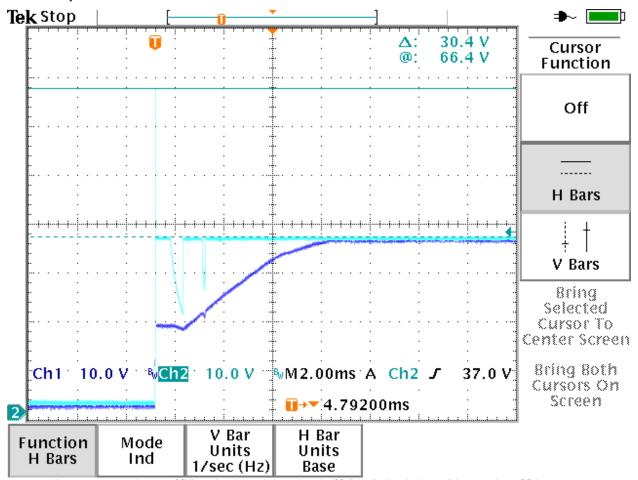

3.3V step response current step. (0.2A to 1.8A) 5Vin

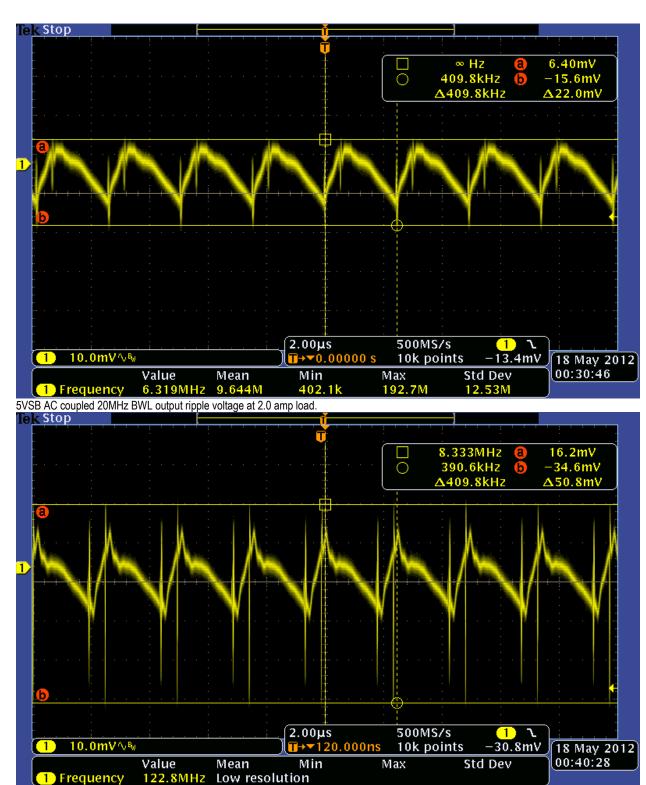

2.6 **Input Protection**

Input surge protection test. 36Vin and rocker switch produced a 66.4V spike but the input did not go above 36V

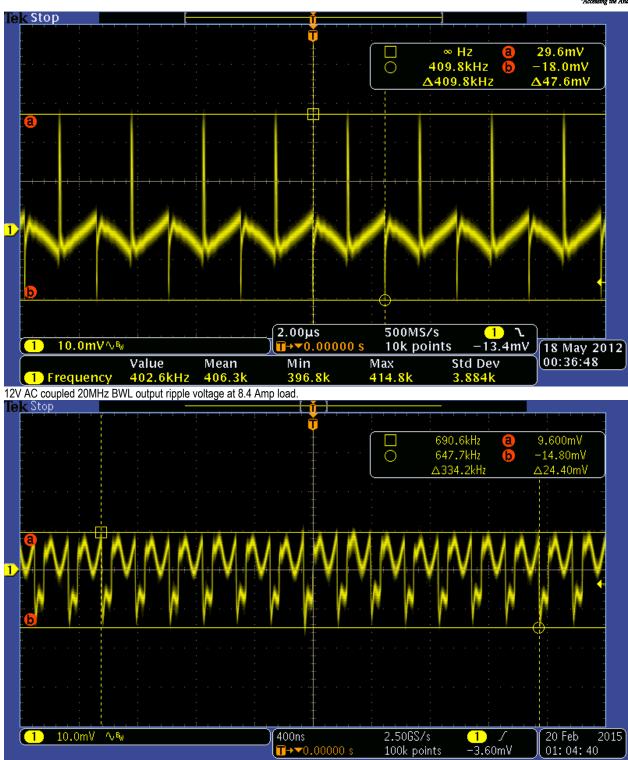

2.7 Ripple Voltage

5V AC coupled 20MHz BWL output ripple voltage at 16.8 Amp load.

3.3V, AC coupled, 20MHz BWL, output ripple voltage at 1.5 Amp load.

100k points

3 Board Connection

3.1 **Board Handling Precautions**

To prevent damage due to Electrostatic Discharge (ESD), keep your board in its antistatic bag until you are ready to install it into your system. When removing it from the bag, hold the board at the edges, and do not touch the components or connectors. Handle the board in an antistatic environment, and use a grounded workbench for testing and handling of your hardware.

3.2 Physical Characteristics

- Weight: Approximately 220g (0.48 lbs.) with heat sink
- Weight: Approximately 130g (0.28 lbs.) board only
- Dimensions: 90.17 mm L x 95.89 mm W (3.550 in L x 3.775 in W)

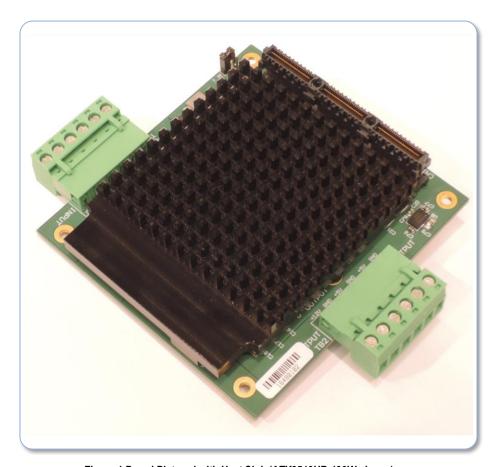

Figure 1 Board Pictured with Heat Sink (ATX3510HR-190W shown)

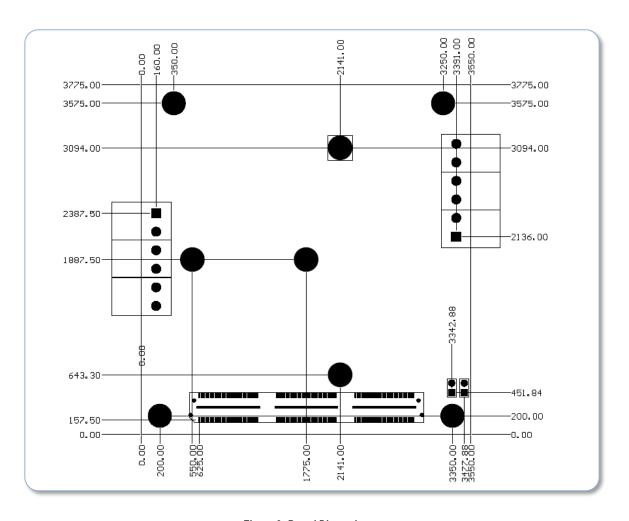

Figure 2: Board Dimensions

3.3 Connectors, Jumpers, and LEDs

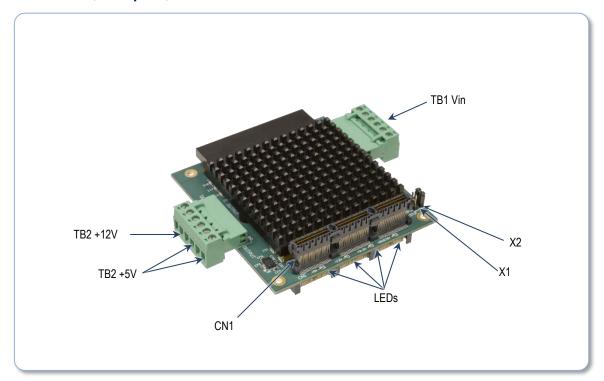

Figure 3: Board Connections, Jumpers, and LEDs

3.3.1 CONNECTORS AND JUMPERS

All I/O connectors have Pin 1 designated by a thick white silkscreen line, and/or a square pad on the PCB.

Power Connectors

TB1 is a six pin input power connector. Each pin is labeled on the PCB. Mating connector is a Phoenix contact 1781027 (www.Phoenixcontact.com)

Facing the connector, from left to right, the pin out is:

Table 3 TB1 Vin Connector

| TB1 Pin | Pin Name | Function | IDAN JBX |
|---------|----------|-------------------|-------------|
| 1 | Vin | 8V to 36V input | 1, 2, and 3 |
| 2 | GND | Ground connection | 4, 5, and 6 |
| 3 | Vin | 8V to 36V input | 1, 2, and 3 |
| 4 | GND | Ground connection | 4, 5, and 6 |
| 5 | Vin | 8V to 36V input | 1, 2, and 3 |
| 6 | GND | Ground connection | 4, 5, and 6 |

TB2 is a six pin auxiliary power connector. Both +5V pins are sourced from the same 5V supply. Each pin is labeled on the PCB. Mating connector is a Phoenix contact 1781027 (www.Phoenixcontact.com)

Facing the connector, from left to right, the pin out is:

Table 4 TB2 Vout Connector

| TB2 Pin | Pin Name | Function | IDAN 9-pin "D" |
|---------|----------|----------------------|----------------|
| 1 | +12V | 12V auxiliary output | 3 |
| 2 | GND | Ground connection | 2, 4, and 7 |
| 3 | +5V | 5V auxiliary output | 1 and 6 |
| 4 | GND | Ground connection | 2, 4, and 7 |
| 5 | +5V | 5V auxiliary output | 1 and 6 |
| 6 | GND | Ground connection | 2, 4, and 7 |

IDAN connector shown above. Phoenix Contact 1729160. Screw terminal for AWG 26-16 wire gauges.

CN1 and CN2 PCle Bus

CN1 and CN2 are the PCle connectors. All pins stack through with no lane shifting.

Table 5 CN1 and CN2 PCle Bus

X1 Jumper

The X1 jumper is the enable for the entire board. Default is open or attached to the power switch in IDAN. Board is labeled with settings. When set to OFF, all supplies on the board are disabled. When set to ON, The board is controlled via PS_ON#.

Table 6 X1 Board Enable Jumper

| X1 Pin | Signal | Function | IDAN | |

3.3.2 LEDs

Voltage indicator LEDs

3.4 Steps for Installing

- 1. Always work at an ESD protected workstation, and wear a grounded wrist-strap.
- 2. Turn off power to the PC/104 system or stack.
- 3. Select and install stand-offs to properly position the module on the stack.
- 4. Remove the module from its anti-static bag.
- 5. Check that pins of the bus connector are properly positioned.
- 6. Check the stacking order; make sure all of the busses used by the peripheral cards are connected to the cpuModule.
- 7. Hold the module by its edges and orient it so the bus connector pins line up with the matching connector on the stack.
- 8. Gently and evenly press the module onto the PC/104 stack.
- 9. If any boards are to be stacked above this module, install them.
- 10. Attach any necessary cables to the PC/104 stack.
- 11. Re-connect the power cord and apply power to the stack.
- 12. Boot the system and verify that all of the hardware is working properly.
- 13. Any wires into or out of the board should be twisted to reduce inductance.
- 14. Wires are to be kept as short as possible to reduce unnecessary voltage drops.
- 15. Power wires should be able to carry at least 10 Amps of current.

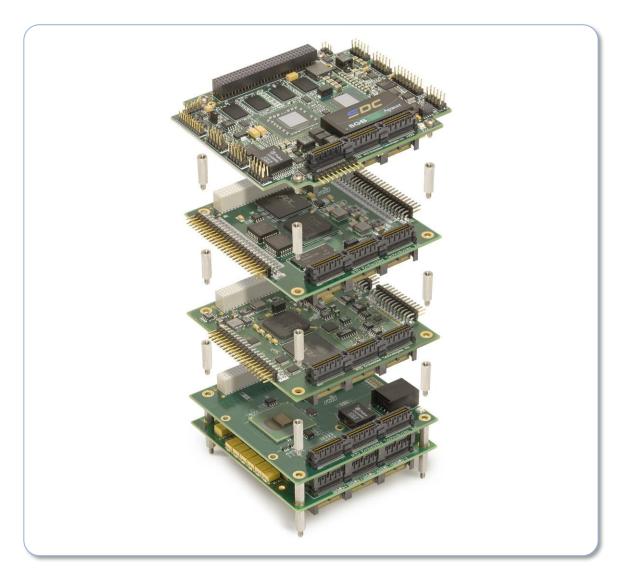

Figure 4: Example 104™ Stack

4 IDAN Connections

4.1 **Module Handling Precautions**

To prevent damage due to Electrostatic Discharge (ESD), keep your module in its antistatic bag until you are ready to install it into your system. When removing it from the bag, hold the module by the aluminum enclosure, and do not touch the components or connectors. Handle the module in an antistatic environment, and use a grounded workbench for testing and handling of your hardware.

4.2 Connectors

4.2.1 EXTERNAL I/O CONNECTORS

The power ON/OFF switch with LED is located on the front of the frame. The 6-pin push-pull power input connector and the 9-pin "D" power output connector are brought out of the back of the frame.

4.3 Steps for Installing

- 1. Always work at an ESD protected workstation, and wear a grounded wrist-strap.
- 2. Turn off power to the IDAN system.
- 3. Remove the module from its anti-static bag.
- 4. Check that pins of the bus connector are properly positioned.
- 5. Check the stacking order; make sure all of the busses used by the peripheral cards are connected to the cpuModule.
- 6. Hold the module by its edges and orient it so the bus connector pins line up with the matching connector on the stack.
- 7. Gently and evenly press the module onto the IDAN system.
- 8. If any boards are to be stacked above this module, install them.
- 9. Finish assembling the IDAN stack by installing screws of an appropriate length.
- 10. Attach any necessary cables to the IDAN system.
- 11. Re-connect the power cord and apply power to the stack.
- 12. Boot the system and verify that all of the hardware is working properly.

5 Functional Description

5.1 **Block Diagram**

The Figure below shows the functional block diagram of the ATX35110HR-190W. The various parts of the block diagram are discussed in the following sections.

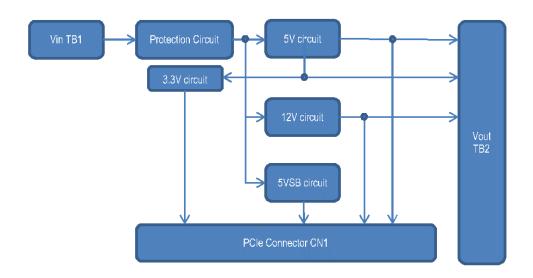

Figure 14: ATX3510HR-190W Block Diagram

5.2 Synchronization

The board is designed that all three supplies are synchronized 120 degrees out of phase. This characteristic results in less input ripple current.

Note: 3.3V is not synchronized and runs at 4.0 MHz

6 Troubleshooting

If you are having problems with your system, please try the following initial steps:

- Simplify the System Remove modules one at a time from your system to see if there is a specific module that is causing a problem. Perform you troubleshooting with the least number of modules in the system possible.
- Swap Components Try replacing parts in the system one at a time with similar parts to determine if a part is faulty or if a type of part is configured incorrectly.

If problems persist, or you have questions about configuring this product, contact RTD Embedded Technologies via the following methods:

Phone: +1-814-234-8087 E-Mail: techsupport@rtd.com

Be sure to check the RTD web site (http://www.rtd.com) frequently for product updates, including newer versions of the board manual and application software.

7 Additional Information

7.1 PC/104 Specifications

8 Limited Warranty

RTD Embedded Technologies, Inc. warrants the hardware and software products it manufactures and produces to be free from defects in materials and workmanship for one year following the date of shipment from RTD Embedded Technologies, Inc. This warranty is limited to the original purchaser of product and is not transferable.

During the one year warranty period, RTD Embedded Technologies will repair or replace, at its option, any defective products or parts at no additional charge, provided that the product is returned, shipping prepaid, to RTD Embedded Technologies. All replaced parts and products become the property of RTD Embedded Technologies. Before returning any product for repair, customers are required to contact the factory for a Return Material Authorization (RMA) number.

This limited warranty does not extend to any products which have been damaged as a result of accident, misuse, abuse (such as: use of incorrect input voltages, improper or insufficient ventilation, failure to follow the operating instructions that are provided by RTD Embedded Technologies, "acts of God" or other contingencies beyond the control of RTD Embedded Technologies), or as a result of service or modification by anyone other than RTD Embedded Technologies. Except as expressly set forth above, no other warranties are expressed or implied, including, but not limited to, any implied warranties of merchantability and fitness for a particular purpose, and RTD Embedded Technologies expressly disclaims all warranties not stated herein. All implied warranties, including implied warranties for merchantability and fitness for a particular purpose, are limited to the duration of this warranty. In the event the product is not free from defects as warranted above, the purchaser's sole remedy shall be repair or replacement as provided above. Under no circumstances will RTD Embedded Technologies be liable to the purchaser or any user for any damages, including any incidental or consequential damages, expenses, lost profits, lost savings, or other damages arising out of the use or inability to use the product.

Some states do not allow the exclusion or limitation of incidental or consequential damages for consumer products, and some states do not allow limitations on how long an implied warranty lasts, so the above limitations or exclusions may not apply to you.

This warranty gives you specific legal rights, and you may also have other rights which vary from state to state.
