| Manageability                             |                                                                                                                                                         |                   |
| Intuitive monitoring                      | Step by step navigation and menu screens for critical system information and data. Information is easy to access and presented in a very intuitive way. |                   |
| Availability                              |                                                                                                                                                         |                   |
| High availability architecture            | Different running modes : hot stand-by, integrated parallel, or centralized static switch for multi-modules leading to availability architectures       |                   |
| Compatibility                             |                                                                                                                                                         |                   |
| Output synchronization to external source | UPS systems can be synchronized with any other independent source for use with downstream static transfer switches.                                     |                   |
| Parallel capability                       | Multiple units can be placed in parallel to meet power capacity and redundancy requirements                                                             |                   |
