| Product Overview                                | Ratings & Reviews                                                                                                                                                                                                                                       |
|-------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Galaxy 5000 Features & Benefits                 |                                                                                                                                                                                                                                                         |
| Serviceability                                  |                                                                                                                                                                                                                                                         |
| Front-access servicing                          | Simplifies installation and UPS maintenance while minimizing space requirements.                                                                                                                                                                        |
| Multiple levels of service                      | With the option of packages or individual service components, our services are structured to allow you to pick and choose what you would like APC to do for you.                                                                                        |
| 7x24 telephone technical support                | Our experienced technical support engineers are available to answer your questions, giving you peace of mind knowing the help you need is there when you need it.                                                                                       |
| Manageability                                   |                                                                                                                                                                                                                                                         |
| Network manageable                              | Provides remote power management of the UPS over the network.                                                                                                                                                                                           |
| Integrates with StruxureWare Data Center Expert | An IT-ready, scalable access monitoring system that collects, organizes, and distributes critical alerts, surveillance video and key information, providing a unified view of complex physical infrastructure environments from anywhere on the network |
| Multiple distribution options                   | Superior design flexibility enables a wide range of customer requirements to be addressed.                                                                                                                                                              |
| LCD graphics display                            | Text and mimic diagrams that display modes of operation, system parameters and alarms.                                                                                                                                                                  |
| LED status indicators                           | Quickly understand unit and power status with visual indicators.                                                                                                                                                                                        |
| Total Cost of Ownership                         |                                                                                                                                                                                                                                                         |
| ECO Mode                                        | Operating mode that by-passes unused electrical components in good power conditions to achieve high operating efficiency without sacrificing protection                                                                                                 |
| Input power factor correction                   | Minimizes installation costs by enabling the use of smaller generators and cabling.                                                                                                                                                                     |
| Predictive failure notification                 | Provides early-warning fault analysis ensuring proactive component replacement.                                                                                                                                                                         |
| Wide input voltage range                        | Designed for harsh electrical environments to save battery life.                                                                                                                                                                                        |
| Sustainability                                  |                                                                                                                                                                                                                                                         |
| EU CoC for UPS                                  | Ensures that UPSs sold in the EU are highly efficient                                                                                                                                                                                                   |
| Availability                                    |                                                                                                                                                                                                                                                         |
| Parallel-redundant capable                      | Power the connected equipment with multiple uninterruptible power supplies to increase system redundancy                                                                                                                                                |
| Generator compatible                            | Ensures clean, uninterrupted power to protected equipment when generator power is used.                                                                                                                                                                 |

|                                  |                                                                                                                         |
|----------------------------------|-------------------------------------------------------------------------------------------------------------------------|
| Parallel-capacity capable        | Increases total power capacity by using multiple uninterruptible power supplies simultaneously.                         |
| Adjustable voltage sensitivity   | Provides the ability to adapt the UPS for optimal performance in specific power environments or generator applications. |
| Frequency and voltage regulation | Gives higher application availability by correcting poor frequency and voltage conditions without using the battery.    |
| Dual mains input                 | Increases availability by allowing the UPS to be connected to two separate power sources.                               |
