Product Overview	Technical Specifications	Ratings & Reviews
MGE Galaxy Features & Benefits		
Marketing Features		
Parallel-redundant capable	Power the connected equipment with multiple uninterruptible power supplies to increase system redundancy	
LCD display	Alpha-Numeric Display which displays system parameters and alarms.	
Parallel-capacity capable	Increases total power capacity by using multiple uninterruptible power supplies simultaneously.	
Manageability		
LED status indicators	Quickly understand unit and power status with visual indicators.	
LCD graphics display	Text and mimic diagrams that display modes of operation, system parameters and alarms.	
Audible alarms	Provides notification of changing utility power and UPS power conditions	
Network manageable	Provides remote power management of the UPS over the network.	
Protection		
Safety-agency approved	Ensures the product has been tested and approved to work safely with the connected service provider equipment and within the specified environment.	
Frequency and voltage regulation	Gives higher application availability by correcting poor frequency and voltage conditions without using the battery.	
Serviceability		
Front-access servicing	Simplifies installation and UPS maintenance while minimizing space requirements.	
Total Cost of Ownership		
Input power factor correction	Minimizes installation costs by enabling the use of smaller generators and cabling.	
Manual maintenance bypass	Reduces installation costs by eliminating the need for an external mechanical bypass.	
Intelligent battery management	Maximizes battery performance, life, and reliability through intelligent, precision charging.	
Availability		
Automatic internal bypass	Supplies utility power to the connected loads in the event of a UPS power overload or fault.	
Generator compatible	Ensures clean, uninterrupted power to protected equipment when generator power is used.
