SU2200XLNET Features

APC Smart-UPS XL 2200VA 208V

Intelligent and efficient network power protection from entry level to scaleable runtime. Ideal UPS for servers, point-of-sale, routers, switches, hubs and other network devices.

Includes : CD with software , Smart UPS signalling RS-232 cable , User Manual

Smart-UPS Features & Benefits

Manageability

LED status indicators	Quickly understand unit and power status with visual indicators.
Serial connectivity	Provides management of the UPS via a serial port.
USB connectivity	Provides management of the UPS via a USB port (not available on all models).
Disconnected battery notification	Warns when a battery is not available to provide backup power.
Network manageable	Provides remote power management of the UPS over the network.
Audible alarms	Actively let you know if the unit is on battery, if the battery is low or if there is an overload condition.

Adaptability

Adjustable voltage-transfer points	Maximizes useful battery life by widening the input voltage window or tightening the output voltage regulation.
Adjustable voltage sensitivity	Provides the ability to adapt the UPS for optimal performance in specific power environments or generator applications.

Serviceability

Resettable circuit breakers	Enables a quick recovery from overload events.
Battery failure notification	Provides early-warning fault analysis on batteries enabling timely preventive maintenance
Predictive failure notification	Provides early-warning fault analysis ensuring proactive component replacement.
Hot-swappable batteries	Ensures clean, uninterrupted power to protected equipment while batteries are being replaced
User-replaceable batteries	Increases availability by allowing a trained user to perform upgrades and replacements of the batteries reducing Mean Time to Repair (MTTR)

Safety

Safety-agency approved	Ensures the product has been tested and approved to work safely with the connected service provider equipment and within the specified environment.
------------------------	---

Availability

Boost and Trim Automatic Voltage Regulation (AVR)	Gives higher application availability by correcting low and high voltage conditions without using the battery (not available on all models).
Intelligent battery management	Maximizes battery performance, life, and reliability through intelligent, precision charging.
Automatic restart of loads after UPS shutdown	Automatically starts up the connected equipment upon the return of utility power.
Temperature-compensated battery charging	Prolongs battery life by regulating the charge voltage according to battery temperature.
Automatic self-test	Periodic battery self-test ensures early detection of a battery that needs to be replaced.
Disconnected battery notification	Warns when a battery is not available to provide backup power.
Power conditioning	Protects connected loads from surges, spikes, lightning, and other power disturbances.

Marketing Features

Smarter productivity with ability to tailor to your specific application needs	Intuitive LCD interface provides clear information with the ability to configure the UPS locally with easy to use navigation keys. Over 15 different programmable settings including switched outlet group control allow for application specific settings, thresholds and notifications.
Low operating and maintenance costs with high efficiency, proven reliability and intelligent battery management	Patented green operating mode achieves efficiencies over 97%. Smart-ups was the first network UPS to be Energy Star certified. Intelligent battery management, pioneered by APC, maximizes battery performance and life through intelligent, precision temperature compensated charging. Dynamic battery replacement date indicator and automatic self tests insure battery reliability and warn in advance of needing replacement. Convenient, easy to connect, hot-swappable battery modules provide battery replacement without powering down. Designed and manufactured by APC for over 23 years, Smart-UPS is the world's most trusted network UPS with over 25 million units sold.
Save time with easy and convenient remote accessibility	Network manageable via serial, USB or optional ethernet. Includes Powerchute® Business Edition Software for convenient monitoring and control, safe operating system shutdown and innovative energy management capabilities.
Peace of mind that comes with full equipment compatibility and reliability of a leader	Provides pure sine wave output which is recommended by server manufacturers using active power factor corrected (PFC) power supplies. Safety agency tested and approved means that you can deploy Smart-UPS with confidence that they meet or exceed the industry's most rigorous standards.

Avoids costly power problems by keeping your IT equipment and data safe and available

Network grade power conditioning protects from damaging surges and disruptive noise. Solid state automatic voltage regulation boosts low input voltage up to 30% and trims high voltage up to 12% without battery operation. Reliable battery back-up capacity to power through outages or gracefully shutdown systems
