

9600 SERIES

Spring Return Linear Position Sensor

Introduction

The 9600 Series Linear Position Sensor, is designed for a variety of space-limited feedback applications that require high accuracy. It is ideally suited for Industrial, vehicular, appliance, machine tool and robotic applications due to the unit's high temperature stability. The solderable terminal tabs, suitable for use with .110" (2.8mm) PDQ styled crimped wiring lugs, and durable spring-loaded plunger, make installation and operation easy.

The 9600 Series is available in three standard sizes and provides excellent life at 1,000,000 full cycles (5 million dither cycles), which means high reliability in demanding installations.
