GP2S700HCP

SMT, Detecting Distance : 3mm Phototransistor Output, Compact Reflective Photointerrupter

■ Description

GP2S700HCP is a compact-package, phototransistor output, reflective photointerrupter, with emitter and detector facing the same direction in a molding that provides non-contact sensing. The compact package series is formed by epoxy resin, that also blocks visible light to minimize false detection.

This device has a long focal distance for this family of devices and has a leadless (T&R) package, suitable for reflow soldering.

■Features

1. Reflective with Phototransistor Output
2. Highlights :
   - Compact Size
   - Surface Mount Type (SMT), reflow soldering
   - Tape and Reel (T&R) 1 000 pcs per reel
3. Key Parameters :
   - Optimal Sensing Distance : 3mm
   - Package : 4×3×2mm
   - Visible light cut resin to prevent
4. RoHS directive compliant

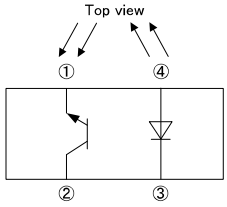
■Agency approvals/Compliance

1. Compliant with RoHS directive

■Applications

1. Detection of object presence or motion.
   Example : printer, optical storage

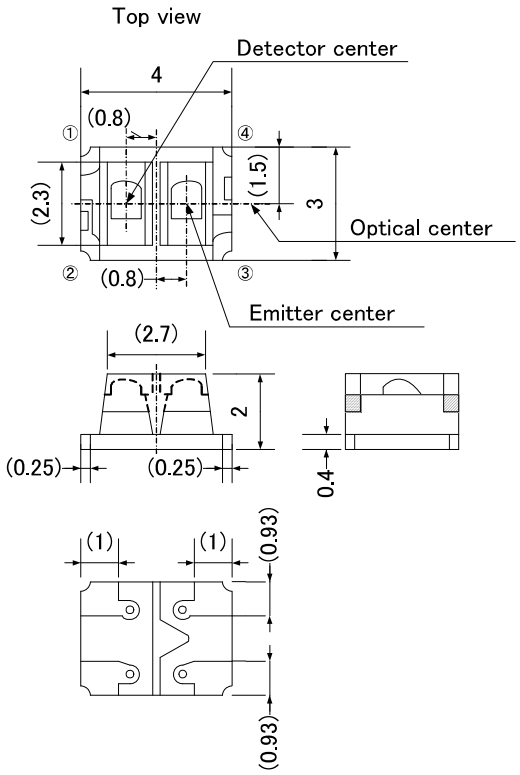
■ Internal Connection Diagram



① Emitter
② Collector
③ Cathode
④ Anode

■ Outline Dimensions

(Unit : mm)



- Unspecified tolerance : ±0.3mm.
- Dimensions in parenthesis are shown for reference.
- Dimensions on the outline drawing is the maximum value excluding burr.
- The dimensions shown do not include burr.
- Burr's dimension : 0.15mm MAX.

Product mass : approx. 0.01g

Plating material : Au

■ Absolute Maximum Ratings

(T_a=25°C)

Parameter		Symbol	Rating	Unit
Input	Forward current	I_F	50	mA
	Reverse voltage	V_R	6	V
	Power dissipation	P_D	75	mW
Output	Collector-emitter voltage	V_{CEO}	35	V
	Emitter-collector voltage	V_{ECO}	6	V
	Collector current	I_C	20	mA
	Collector power dissipation	P_C	75	mW
Total power dissipation		P_{tot}	100	mW
Operating temperature		T_{opr}	–25 to +85	°C
Storage temperature		T_{stg}	–40 to +100	°C
*1Soldering temperature		T_{sol}	260	°C

*1 For 5s or less

■ Electro-optical Characteristics

(T_a=25°C)

Parameter			Symbol	Condition	MIN.	TYP.	MAX.	Unit
Input	Forward voltage		V_F	I_F=20mA	–	1.2	1.4	V
	Reverse current		I_R	V_R=6V	–	–	10	μA
Output	Collector dark current		I_{CEO}	V_{CE}=20V	–	1	100	nA
Transfer characteristics	*2 Collector current		I_C	I_F=4mA, V_{CE}=2V	60	–	410	μA
	*3 Leak current		I_{LEAK}	I_F=4mA, V_{CE}=2V	–	–	700	nA
	Response time	Rise time	t_r	V_{CE}=2V, I_C=100μA,	–	20	100	μs
		Fall time	t_f	R_L=1kΩ, d=4mm	–	20	100	

*2 The condition and arrangement of the reflective object are shown below.
*3 Without reflective object.

Remarks : Please be aware that all data in the graph are just for reference and not for guarantee.

■ Design Considerations

● Design guide

1) Regarding to prevation of malfunction
To prevent photointerrupter from faulty operation caused by external light, do not set the detecting face to the external light. Also, if some other electronic components are located close to this device, false operation may occur.
(The light reflection caused by the other components may slip into the photodetecting portion of the device and if may cause false operation.)

2) Distance characteristic
The distance between the photointerrupter and the object to be detected shall be determined the distance by referencing Fig.8 "Relative collector current vs. distance".

3) For wiring on a mounting PCB
To avoid possibility for short, please do not apply pattern wiring on the back side of the device.

4) Regarding to mounting this product
There is a possibility that the opaque molded resin portion may have a crack by force at mounting etc.
Please use this product after well confirmation of conditions in your production line.
And please confirm the mounting workability beforehand when using the automatic mounting machine.

This product is not designed against irradiation and incorporates non-coherent IRED.

● Degradation

In the case of long term operation, please take the general IRED degradation (50% degradation over 5 years) into the design consideration.

● Parts

This product is assembled using the below parts.

• Light detector (qty. : 1)

Category	Material	Maximum Sensitivity wavelength (nm)	Sensitivity wavelength (nm)	Response time (μs)
Phototransister	Silicon (Si)	930	700 to 1 200	20

• Light emitter (qty. : 1)

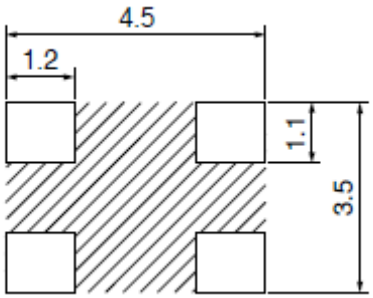
Category	Material	Maximum light emitting wavelength (nm)	I/O Frequency (MHz)
Infrared light emitting diode (non-coherent)	Gallium arsenide (GaAs)	950	0.3

• Material

Case	PCB	Lead frame plating
Black epoxy resin	Glass epoxy resin	Au plating

● Recommended pattern

(Unit : mm)



measure tolerance : ±0.1

area : Please do not apply the pattern wiring to avoid the possibility of short circuit.

Regarding amount of solder, if there is solder leakage in terminal wiring pattern between PCB and housing main body, the reliability will be deteriorated.
Please check the proper amount of solder in advance not to have solder leakage into terminal wiring pattern between PCB and housing main body.

■ Manufacturing Guidelines

● Storage and management after open

Storage condition

Storage temp.: 5 to 30˚C, Storage humidity : 70%RH or less at regular packaging.

Treatment after opening the moisture-proof package

After opening, you should mount the products while keeping them on the condition of 5 to 25˚C and 60%RH or less in humidity within 2 days.

After opening the bag once even if the prolonged storage is necessary, you should mount the products within two weeks.

And when you store the rest of products you should put into a DRY BOX. Otherwise after the rest of products and silicagel are sealed up again, you should keep them under the condition of 5 to 30˚C and 70%RH or less in humidity.

Baking before mounting

When the above-mentioned storage method could not be executed, please process the baking treatment before mounting the products.

However the baking treatment is permitted within one time.

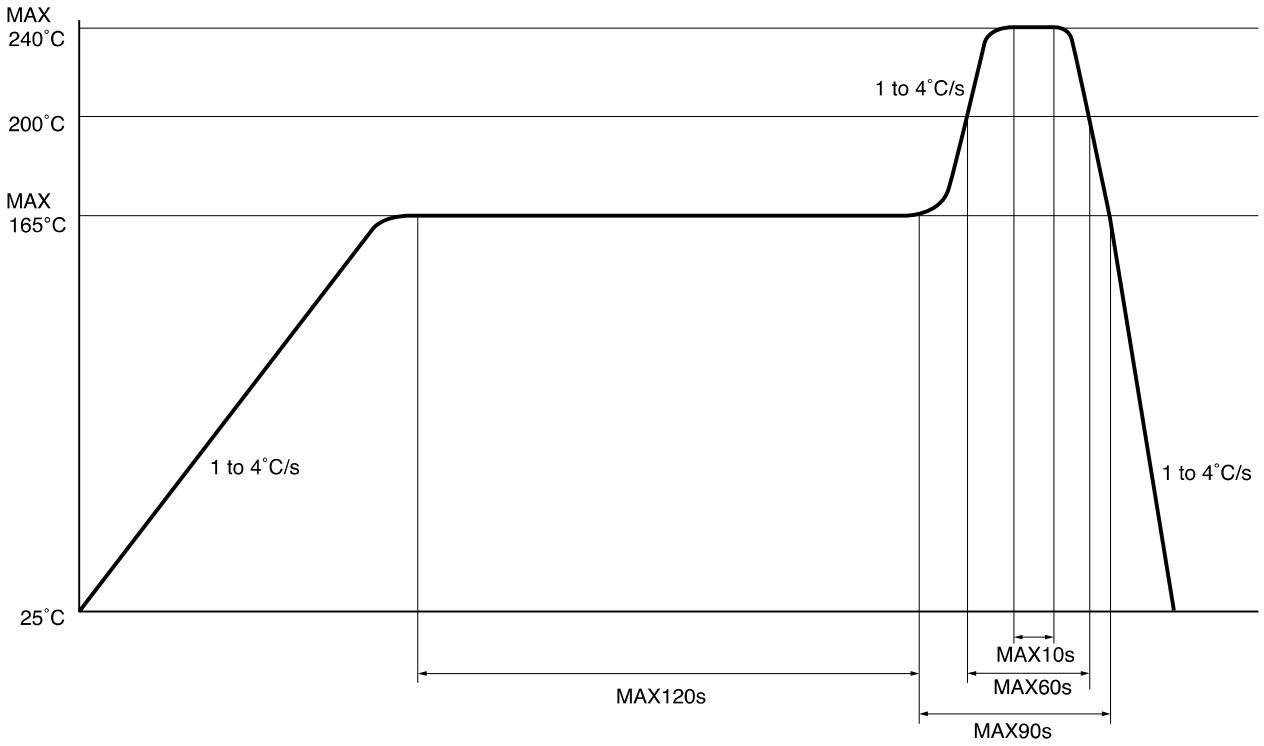
Recommended condition : 125˚C, 16 to 24 hours

*Do not process the baking treatment with the product wrapped. When the baking treatment processing, you should move the products to a metallic tray or fix temporarily the products to substrate.

● Soldering Method

Reflow Soldering:

Reflow soldering should follow the temperature profile shown below.
Soldering should not exceed the curve of temperature profile and time.
Please solder within one time.



Other notice

Please take care not to let any external force exert on lead pins.
Please test the soldering method in actual condition and make sure the soldering works fine, since the impact on the junction between the device and PCB varies depending on the cooling and soldering conditions.

● Cleaning instructions

Solvent cleaning :

Solvent temperature should be 45˚C or below. Immersion time should be 3 minutes or less.

Ultrasonic cleaning :

Do not execute ultrasonic cleaning.

Recommended solvent materials :

Ethyl alcohol, Methyl alcohol and Isopropyl alcohol.

● Presence of ODC

This product shall not contain the following materials.
And they are not used in the production process for this product.
Regulation substances : CFCs, Halon, Carbon tetrachloride, 1.1.1-Trichloroethane (Methylchloroform)

Specific brominated flame retardants such as the PBBOs and PBBs are not used in this product at all.

This product shall not contain the following materials banned in the RoHS Directive (2002/95/EC).

•Lead, Mercury, Cadmium, Hexavalent chromium, Polybrominated biphenyls (PBB), Polybrominated diphenyl ethers (PBDE).

Content of six substances specified in Management Methods for Control of Pollution Caused by Electronic Information Products Regulation (Chinese : 电子信息产品污染控制管理办法).

Category	Toxic and hazardous substances					
	Lead (Pb)	Mercury (Hg)	Cadmium (Cd)	Hexavalent chromium (Cr^{6+})	Polybrominated biphenyls (PBB)	Polybrominated diphenyl ethers (PBDE)
Photointerrupter	✔	✔	✔	✔	✔	✔

✔ : indicates that the content of the toxic and hazardous substance in all the homogeneous materials of the part is below the concentration limit requirement as described in SJ/T 11363-2006 standard.

■ Package specification

● Tape and Reel package

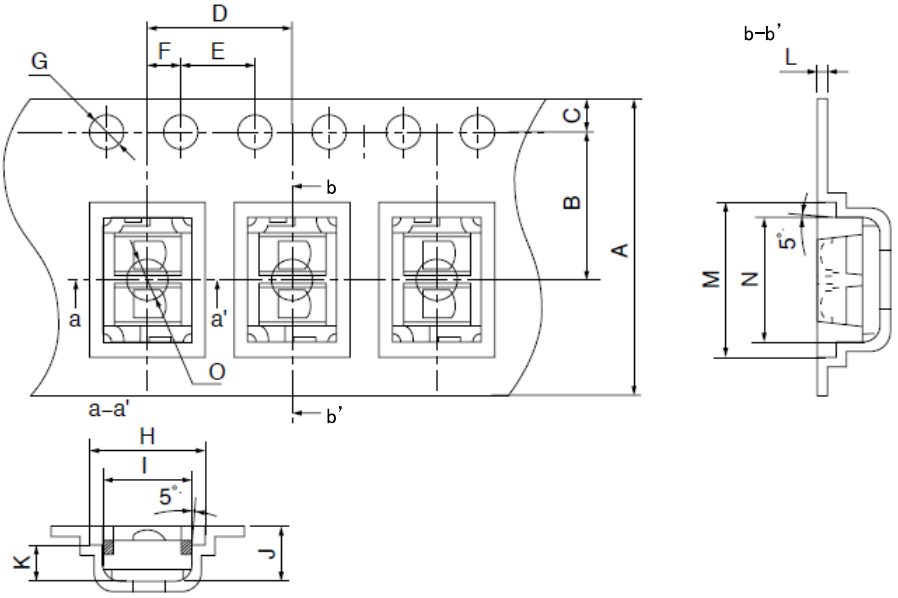
Package materials

Reel : PS

Package method

1 000 pcs of products shall be packaged in a reel. One reed is endased in aluminum laminated bag.
After sealing up the bag, it encased in one case (5 bags/case).

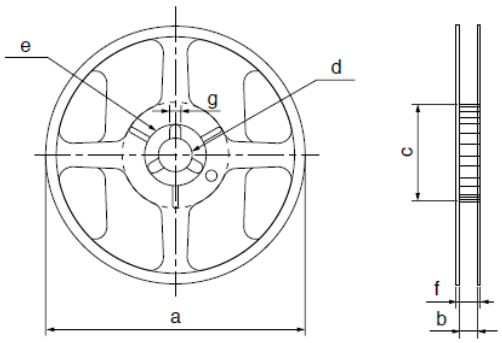
Carrier tape structure and Dimensions



Dimension List (Unit : mm)

A	B	C	D	E	F	G	H
$12^{\pm0.3}$	$5.5^{\pm0.05}$	$1.75^{\pm0.1}$	$8^{\pm0.1}$	$4^{\pm0.1}$	$2^{\pm0.1}$	$\Phi1.55^{\pm0.05}$	$5.2^{\pm0.1}$
I	J	K	L	M	N	O	
$3.2^{+0.2}_{-0}$	$2.2^{\pm0.1}$	$1.2^{\pm0.1}$	$0.3^{\pm0.05}$	$6.3^{\pm0.1}$	$4.2^{+0.2}_{-0}$	$\Phi1.6^{\pm0.1}$	

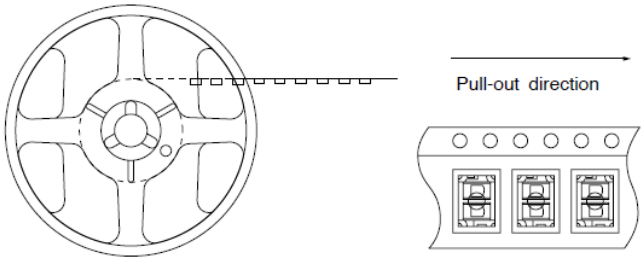
Reel structure and Dimensions



Dimension List (Unit : mm)

a	b	c	d
$180^{\pm1.5}$	$13^{\pm1.0}$	$60^{+0.5}_{-0}$	$\Phi13^{\pm0.2}$
e	f	g	
$\Phi21^{\pm0.8}$	$15.4^{\pm1.0}$	$2^{+0.3}_{-0}$	

Direction of product insertion



[Packing : 1 000pcs/reel]

Storage method

Storage conditions should follow the condition shown below.

Storage temperature : 5 to 30°C

Storage hunidity : 70%RH or less

■ Important Notices

· The circuit application examples in this publication are provided to explain representative applications of SHARP devices and are not intended to guarantee any circuit design or license any intellectual property rights. SHARP takes no responsibility for any problems related to any intellectual property right of a third party resulting from the use of SHARP's devices.

· Contact SHARP in order to obtain the latest device specification sheets before using any SHARP device. SHARP reserves the right to make changes in the specifications, characteristics, data, materials, structure, and other contents described herein at any time without notice in order to improve design or reliability. Manufacturing locations are also subject to change without notice.

· These specification sheets include materials protected under copyright of Sharp Corporation ("Sharp"). Please do not reproduce or cause anyone to reproduce them without Sharp's consent.

· When using this product, please observe the absolute maximum ratings and the instructions for use outlined in these specification sheets, as well as the precautions mentioned below. Sharp assumes no responsibility for any damage resulting from use of the product which does not comply with the absolute maximum ratings and the instructions included in these specification sheets, and the precautions mentioned below.

Please do verify the validity of this part after assembling it in customer's products, when customer wants to make catalogue and instruction manual based on the specification sheet of this part.

(Precautions)

(1) This product is designed for use in the following application areas ;

· OA equipment · Audio visual equipment
· Home appliances
· Telecommunication equipment (Terminal)
· Measuring equipment
· Tooling machines · Computers

If the use of the product in the above application areas is for equipment listed in paragraphs (2) or (3), please be sure to observe the precautions given in those respective paragraphs.

(2) Appropriate measures, such as fail-safe design and redundant design considering the safety design of the overall system and equipment, should be taken to ensure reliability and safety when this product is used for equipment which demands high reliability and safety in function and precision, such as ;

· Transportation control and safety equipment (aircraft, train, automobile etc.)
· Traffic signals · Gas leakage sensor breakers
· Rescue and security equipment
· Other safety equipment

(3) Please do not use this product for equipment which require extremely high reliability and safety in function and precision, such as ;

· Space equipment
· Telecommunication equipment (for trunk lines)
· Nuclear power control equipment · Medical equipment
· Power generation and power transmission control system (Key system)

(4) Please contact and consult with a Sharp sales representative if there are any questions regarding interpretation of the above four paragraphs.

· Please contact and consult with a Sharp sales representative for any questions about this product.

· If the SHARP devices listed in this publication fall within the scope of strategic products described in the Foreign Exchange and Foreign Trade Law of Japan, it is necessary to obtain approval to export such SHARP devices.
