

COM-09447 ROHS ✓

This is a low-power dual axis (pitch and yaw) MEMS gyro with a $\pm 30^\circ/\text{s}$ maximum range. Options include integrated low pass filters and embedded power down and self-test features. Both x and z outputs are analog, and a 4x amplified output signal is also available for both axes. Comes in an LGA-16 package.

SKILLS NEEDED

This skill defines how difficult the soldering is on a particular product. It might be a couple simple solder joints, or require special reflow tools.

[See all skill levels](#)

If a board needs code or communicates somehow, you're going to need to know how to program or interface with it. The programming skill is all about communication and code.

[See all skill levels](#)

If it requires power, you need to know how much, what all the pins do, and how to hook it up. You may need to reference datasheets, schematics, and know the ins and outs of electronics.
