What a coincidence, I was just looking for pressure sensors for a project I'm currently designing when I noticed the new product email. It's cheaper than most of the alternatives, so I might have to order it. Thanks for your perfect timing Sparkfun!

What are the export restrictions though? I'm in Canada if that matters

In 2003, CU student Nate Seidle blew a power supply in his dorm room and, in lieu of a way to order easy replacements, decided to start his own company. Since then, SparkFun has been committed to sustainably helping our world achieve electronics literacy from our headquarters in Boulder, Colorado.

No matter your vision, SparkFun's products and resources are designed to make the world of electronics more accessible. In addition to over 2,000 open source components and widgets, SparkFun offers curriculum, training and online tutorials designed to help demystify the wonderful world of embedded electronics. We're here to help you start something.
