 $\bigstar \bigstar \bigstar \bigstar \bigstar$ With the right libraries, it's easy to use.

about 4 months ago by Brad10 verified purchaser There are Arduino libraries that make this almost trivial to talk to (see my note in the Comments section for links). So far, it's working great for my work-in-progress water tank depth project.

I like this part because it's designed for situations where there is a long cable between the processor and the temperature sensor. Think home temperature monitoring and control, gardening, monitoring equipment for overheating, etc.
