

Wall Adapter Power Supply - 6V DC 2A (Barrel Jack)

TOL-14158 ROHS ✓

DESCRIPTION

DOCUMENTS

This is a high-quality "wall wart" AC to DC 6V 2,000mA Barrel Jack wall power supply manufactured specifically for SparkFun Electronics. These are switch mode power supplies, which means the output is regulated to 6V and the capable output current is much higher (2,000mA).

These wall adapters are perfect for supplying power to many single-board computers like the multitude of Arduino development boards or even our own RedBoard. Please note, this specific supply (6V/2A) is also FCC/CE certified, works with 100–240VAC inputs and has a center-positive 5.5 x 2.1mm barrel connector.

In 2003, CU student Nate Seidle blew a power supply in his dorm room and, in lieu of a way to order easy replacements, decided to start his own company. Since then, SparkFun has been committed to sustainably helping our world achieve electronics literacy from our headquarters in Boulder, Colorado.

No matter your vision, SparkFun's products and resources are designed to make the world of electronics more accessible. In addition to over 2,000 open source components and widgets, SparkFun offers curriculum, training and online tutorials designed to help demystify the wonderful world of embedded electronics. We're here to help you start something.
