## POWER PLUG 10W-5V

### POWER PLUG DESCRIPTION

The Power Plug is a high efficiency AC/DC switch mode constant voltage generator. Designed for a variety of residential applications, this wall plug-in power supply performs up to 10W output power.

Typical reference value for the off shelf solution is 5V 1.5 A.

Coming into a compact housing, the power plug can be assembled with EU or UK plugs identified by specific ordering numbers. Output DC power is ensured via a 2 wires cord with strain relief, terminated with a barrel connector. Typical weight is 52 grams only, without cable.
