

AC Input

Multi Output, General-Purpose

Conformity to RoHS Directive

F Series FCP/FCP-B

The F series FCP/FCP-B products are 2-output power supplies with a combination of +12V/–12V and +15V/–15V output voltages. With the aim of thin-type products, this series has realized a thickness of 20mm max. with development using the TDK original technology including a transformer and a filter. The FCP-B is supported anew as an onboard type.

FEATURES

- AC.100V input thin-type 2-output power supply.
- Compact plastic package type.
- Low price.
- Low-noise (FCC class B compliant).
- It is a product conforming to RoHS directive.

PART NUMBERS AND RATINGS

FCP

Part No.	Maximum output power(W)	Output1[V ₁]		Output2[V ₂]	
		Voltage(V)	Current(A)	Voltage(V)	Current(A)
FCP-031	2.9	+12	0.01 to 0.12	–12	0.01 to 0.12
FCP-032	3	+15	0.01 to 0.1	–15	0.01 to 0.1
FCP-101	9.6	+12	0.04 to 0.4	–12	0.04 to 0.4
FCP-102	9.6	+15	0.03 to 0.32	–15	0.03 to 0.32

FCP-B

Part No.	Maximum output power(W)	Output1[V ₁]		Output2[V ₂]	
		Voltage(V)	Current(A)	Voltage(V)	Current(A)
FCP-031B	2.9	+12	0.01 to 0.12	–12	0.01 to 0.12
FCP-032B	3	+15	0.01 to 0.1	–15	0.01 to 0.1
FCP-101B	9.6	+12	0.04 to 0.4	–12	0.04 to 0.4
FCP-102B	9.6	+15	0.03 to 0.32	–15	0.03 to 0.32

- The above products are only produced upon receipt of order. Please check a delivery date.

- Conformity to RoHS Directive: This means that, in conformity with EU Directive 2002/95/EC, lead, cadmium, mercury, hexavalent chromium, and specific bromine-based flame retardants, PBB and PBDE, have not been used, except for exempted applications.

- All specifications are subject to change without notice.

*1 Current rating(maximum output current) is determined for 0 to +50°C. Derating is required when used outside this temperature range.

*2 The output load variation is determined within the range set by the minimum output current and the maximum output current. Nominal values might possibly not be satisfied when output is below the minimum output current.

*3 Although there is no built-in overvoltage protection circuit, the overvoltage prevention method is used for circuit design, thereby preventing overvoltage.

- Three numeric values in the above data indicate output voltages exceed 90% of the rated output voltage at the input voltage AC.85/100/132V.

OUTPUT CHARACTERISTICS(25°C) 3W TYPE

10W TYPE

Respective characteristics are variable for a single channel and the other is fixed to a rated value. Both of the + and – output voltages have almost the same characteristics.

INPUT FUSE

Since the F series FCP contains a mounted circuit protection element, it does not have a built-in input fuse (a glass-tube fuse). It is recommended to mount a fuse at an AC input terminal (L terminal) in order to further improve safety of the FCP-incorporated device. Ratings of recommended external fuse

Characteristics, Functions, and Applications

INPUT/OUTPUT TERMINAL

For input/output terminals, 187-type Faston® tabs are used. These terminals are commercially available from various terminal manufacturers. Two manufacturing companies among them will be introduced below. These terminals can be soldered, though it is undesirable to heat them for a long time.

187 TAB PRODUCT INTRODUCTION A

4.8 mm series tab connection terminal (187 tab-on connector)
