General

Function	The speed sensors DSF xx10.xx xHV Ex-atex are suitable for use with a pole wheel to generate speed proportional frequency signals. They exhibit dynamic behavior, whereby pulse generation down to 0.05 Hz is guaranteed. The sensing element is a magnetically biased Hall device, followed by an amplifier having a trigger characteristic and short circuit proof output stage.
Safety Notice	The speed sensors DSF xx10.xx xHV Ex-atex are certified for applications in areas with explosive atmospheres. These types are to be duly used in undamaged and clean condition. Modifications of sensors are prohibited if not expressly listed in these operating instructions.
Conformity to Standards	DSF xx10.xx xHV Ex-atex series sensors are certified according to EN 60079-0:2012 and EN 60079-11:2012 (see 4. supplement): •  Ex II 2 G Ex ia IIC T6 Gb for use in flammable gas atmospheres •  Ex II 2 D Ex ia IIC T155°C Db for use in flammable dust atmospheres Alternatively, the sensors are certified, according to the same standards, for an extended temperature range (see 3rd supplement): •  Ex II 2 G Ex ia IIC T6 Gb for use in flammable gas atmospheres •  Ex II 2 D Ex ia IIC T200°C Db for use in flammable dust atmospheres They have been designed, manufactured and tested according to the state of the art. For their application the restrictions listed in the European Certificate of Conformity ZELM 03 ATEX 0124X, its 1st, 2nd, 3rd and 4th supplement must be observed. Sensors with in built connectors (DSF xx10.yy AHV Ex-atex) are qualified only for flammable gas atmospheres and not for dust.

Technical data

Supply voltage	8 ... 28 VDC, max. superimposed AC ripple of 25mVpp. The voltage drop as a result of the cable impedance and safety barriers resistance must be allowed for. Protected against reverse polarity.
Current consumption	Max. 15 mA (without load)
Signal output	• Square wave from push-pull output stage • DC coupled to the supply (0V = reference voltage) • Load current max. 25 mA • Output voltage: $U_{Hi} > U_{Supply} - 4 \text{ V}$ (at $I_{source} = 25 \text{ mA}$) $U_{Lo} < 2 \text{ V}$ (at $I_{sink} = 25 \text{ mA}$) • The voltage drop as a result of the cable impedance and resistance of safety barriers must be allowed for. • Short circuit proof and protected against reverse polarity.
Frequency range	0.05 Hz ... 20 kHz
Electromagnetic compatibility (EMC):	According to 2014/30/EU, IEC 61000-6-2, IEC 61000-6-2
Housing	Stainless steel X12CrNiS188 (material number 1.4305), front side hermetically sealed, electronic components potted in a chemical and age proof ceramic. Maximum permissible tightening torque:

12 Nm for M12x1

25 Nm for M14x1

35 Nm for M16x1

	40 Nm for M18x1.5	50 Nm for M18x1	75 Nm for M22x1
	Dimensions according to drawing.		
pole wheel	Toothed wheel of a magnetically permeable material (e.g. Steel 1.0036) - Minimum tooth width of 10 mm - Side offset < 0.2 mm - Eccentricity < 0.2 mm - Involute gear wheel preferred (module ≤ 0.5)		
Air gap sensor / pole wheel	Air gap between pole wheel (involute gear) and sensor housing: - Module 1: 0.2...1.0 mm - Module 2: 0.2...2.5 mm - Module 3: 0.2...3.5 mm - Module 4 (and larger): 0.2...4.5 mm		
Insulation	Housing, cable screen (if applicable) and electronics galvanically separated (500 V/50 Hz/ 1 min)		
Protection class	IP68 (head), IP67 (cable connection), IP 54 (where connector used)		
Vibration immunity	5 gn in the range 5...2000Hz		
Shock immunity	20 g during 20 ms, half-sine wave		
Temperature	The temperature and atmosphere limitations for each sensor housing size, as shown in TABLE 1, must be observed and the restrictions given in the EC Type Examination Certificate must be adhered to. The minimum allowable temperature (according to the certificate) is listed in TABLE 2 and TABLE 3.		

EX-Safety and Marking

For these explosion protected sensors a copy of the European Certificate of Conformity ZELM 03 ATEX 0124X, its 1st, 2nd, 3rd and 4th supplement are attached.

See also below, the Ex related information in this documentation.

As mentioned in the section "Conformity to Standards", these sensors fulfil the standards EN 60079-0:2012+A11:2013 and EN 60079-11:2012.

Notified body for the certification of the Jaquet quality management system to the requirements of the ATEX directive 2014/34/EU and the IECEx system is PRIMARA Test- und Zertifizier-GmbH.

On ATEX products the CE-marking is accompanied by PRIMARA's certification identification number 2572. The previous identification number 0820 (Zelm Ex) is no longer valid, but might still appear on older drawings.

Connection

The sensors must be connected according to the sensor drawing. Sensor wires are susceptible to radiated noise. Hence, the sensor wires must be laid as far as possible from large electrical machines. They must not run parallel in the vicinity of power cables. The permissible cable length is limited from a safety point of view according to the 1. Supplement of the Certificate of Conformity ZELM 03 ATEX 0124X.

Installation

For installation, the CE directives for the installation of apparatus in explosive environments must be taken into account.

The housing has to be aligned to the pole wheel according to the sensor drawing:

Deviations in positioning may affect the functioning and decrease the noise immunity of the sensor.

The sensor should be mounted with the middle of the face side over the middle of the pole wheel. Where the pole wheel has teeth or slots and with radial sensor location, the sensor would normally be mounted over the centre. Dependent upon the wheel width, a certain degree of axial movement is permissible. However, the middle of the sensor must be at minimum in a distance of 3mm from the edge of the pole wheel under all operating conditions.

A solid and vibration free mounting of the sensor is important.

Eventual sensor vibration relative to the pole wheel can induce additional output pulses.

The sensors are insensitive to oil, grease etc and can be installed in arduous conditions. During installation, the smallest possible pole wheel to sensor gap should be set. The gap should however be set to prevent the face of the sensor

ever touching the pole wheel. Within the air gap specified the amplitude of the output signals is not influenced by the air gap.

Maintenance

No maintenance required. The sensors cannot be repaired.

*The maximum permissible operating temperature depends upon the following parameters, as shown in TABLE 1:

- Sensor housing size
- Maximum available electrical power from the intrinsically safe sensor power supply and from the intrinsically safe input circuit of the attached instrumentation and any Zener barriers.
- Ex temperature class (T1-T6)

Operating temperature for II 2 D Ex ia IIC T155°C/T200°C Db:

-20 ... +100°C / -65 ... +100°C (see 3rd supplement)

Where dust clouds are present, the surface temperature of the sensor must not exceed 2/3 of the ignition temperature of the corresponding dust / air mixture.

In the event of dust coatings being present, the surface temperature of the sensor must not exceed the limits defined in the corresponding standards.

Operating temperature for II 2 G Ex ia IIC T6 Gb per table:

Sensor Type or Housing size	maximum available electrical power [mW]	maximum permissible operating Temperature [°C] Ex hazardous areas: Temperature class						Examples for safety Zener barriers from STAHL (PTB 01 ATEX 2088)

EU Declaration of Conformity
(in accordance with ISO/IEC 17050-1)

We,

JAQUET Technology Group AG Thannerstrasse 15 CH-4009 Basel	As of 01.01.2018 our new address will be: JAQUET Technology Group AG Kunimattweg 14 CH-4133 Pratteln
---	---

certify and declare under our sole responsibility that the following product(s)

Hall Effect Single Channel Speed Sensor
DSF xx10.xx xHV Ex-atex

as delivered, are in conformity with the essential requirements of the following directives:

2014/30/EU	Electromagnetic Compatibility Directive
2014/34/EU	ATEX Directive

Conformity to the directives is assured through the application of the following harmonized standards:

EN 60079-0:2012 + A11:2013 (IEC 60079-0:2011) EN 60079-11:2012 (IEC 60079-11:2011)	Explosive atmospheres – Part 0: Equipment – General requirements Explosive atmospheres – Part 11: Equipment protection by intrinsic safety "i"
EN 61000-6-2:2005/AC:2005 (IEC 61000-6-2:2005)	Immunity standard for industrial environments
EN 61000-6-4:2007/A1:2011 (IEC 61000-6-4:2006)	Emission standard for industrial environments

Additional European and international standards are applicable:

EN 61000-4-2/3/4/5/6/8/11	EMC standards
EN ISO 9001:2008	Quality Management Systems

Prüf- und Zertifizierungsstelle

ZELM Ex

(1) **EC-TYPE-EXAMINATION CERTIFICATE**

(2) Equipment and Protective Systems Intended for Use in Potentially Explosive Atmospheres - **Directive 94/9/EC**

(3) EC-TYPE-EXAMINATION CERTIFICATE Number:

ZELM 03 ATEX 0124X

(4) Equipment: **Rotation speed sensor type DSF ..10.**.HV Ex**

(5) Manufacturer: **JAQUET AG**

(6) Address: **Thannerstrasse 15, CH-4009 Basel**

(7) This equipment and any acceptable variation thereto are specified in the schedule to this certificate and the documents therein referred to.

(8) The Prüf- und Zertifizierungsstelle ZELM Ex, notified body No. 0820 in accordance with Article 9 of the Council Directive 94/9/EC of 23 March 1994, certifies that this equipment has been found to comply with the Essential Health and Safety Requirements relating to the design and construction of equipment and protective systems intended for use in potentially explosive atmospheres, given in Annex II to the Directive.

The examination and test results are recorded in the confidential report ZELM Ex 0370215173.

(9) Compliance with the Essential Health and Safety Requirements has been assured by compliance with:

EN 50 014: 1997+A1+A2

EN 50020: 1994

EN 50 281-1-1: 1998

(10) If the sign "X" is placed after the certificate number, it indicates that the equipment is subject to special conditions for safe use specified in the schedule to this certificate.

(11) This EC-type-examination Certificate relates only to the design, examination and tests of the specified equipment or protective system in accordance to the Directive 94/9/EC. Further requirements of the Directive apply to the manufacturing process and supply of this equipment or protective system. These are not covered by this Certificate.

(12) The marking of the equipment shall include the following:

II 2 G EEx ia IIC T6 and II 2 D T 147°C IP 65

SCHEDULE

(14)

EC-TYPE-EXAMINATION CERTIFICATE ZELM 03 ATEX 0124X

(15) Description of equipment

The rotation speed sensors are used for the recording of the rotation speed for the touchless scanning of rotating ferromagnetic rotating magnetic poles, gears, camshafts and the like.

Model key:

Rotation speed sensor type DSF ..10.**..HV Ex

Electrical data

Supply- and signal circuit type of protection Intrinsic Safety EEx ia IIC resp. IIB or iaD for use according to category 2D

only for the connection to certified intrinsically safe circuits

maximum values: $U_i = 28 \text{ V}$
 $I_i = 150 \text{ mA}$
 $P_i = 900 \text{ mW}$ (at category 2D) and/or
 $P_i \leq 900 \text{ mW}$ (in accordance with table 1 at category 2 G)

Maximum effective inner capacity $C_i = 36 \text{ nF}$

The maximum effective inner inductance is negligibly small

For use according to category 2D the maximum permissible ambient temperature conducts to 100°C .

The lower temperature boundary is for all versions and applications -20°C .

The temperature class, the maximum permissible ambient temperature and the maximum permissible power of the connected, certified, intrinsically safe circuit (P_i) for the different versions are for the usage according to category 2G are to be determined with the following table.

Sheet 2/4

EC-type-examination Certificates without signature and stamp are not valid. The certificates may only be circulated without alteration. 1. Supplement

(Supplement according to EC-Directive 94/9 Annex III letter 6)

to EC-type-examination Certificate

ZELM 03 ATEX 0124 X

Equipment: **Rotation speed sensor type DSF ..10.**.HV Ex**
Manufacturer: **JAQUET AG**
Address: **Thannerstrasse 15, CH-4009 Basel**

Description of supplement

The 1. Supplement considers application different length of the connecting cables for different types of sensors.

Additional to the maximum values of the effective inner capacitance and inductance mentioned in the EC-Type Examination Certificate following maximal values of the capacitance and inductance are to be considered by using connecting cables with the length of more than 5 m:

$$C_l = 240 \text{ pF/m}$$
$$L_l = 1,5 \text{ µH/m}$$

The explosion protection of the equipment is not affected by these changes.

The equipment may be used in future also in consideration of this Supplement.

The type of protection, all further data as well as the special conditions remain unchanged and also apply to this 1. Supplement.

References:

The instruction manual has to be observed.

Report No.

ZELM Ex 1120617487

Essential Health and Safety Requirements

The Essential Health and Safety Requirements are still fulfilled under consideration of the Standards mentioned in the EC-type-examination Certificate.

3. Supplement

(Supplement according to EC-Directive 94/9 Annex III letter 6)

ZELM ex

to EC-type-examination Certificate

ZELM 03 ATEX 0124 X

Equipment: **Rotation speed sensor type DSF ..10.**.HV Ex**

Manufacturer: **JAQUET AG**

Address: **Thannerstrasse 15, CH-4009 Basel**

Description of supplement

The 3. Supplement concerns the alternative type with a modified marking of the Rotation speed sensors, this supplement is characterized by the changing of the permissible temperature range and the decrease of input power in dust explosive atmosphere.

The marking of the Rotation speed sensors is alternative in future:

II 2 G Ex ia IIC T6 and II 2 D Ex iaD 21 T 200°C IP 65

The electrical data for this alternative type is as follows:

Electrical data

Supply- and
signal circuit

type of protection Intrinsic Safety Ex ia IIC resp. IIB or iaD for
use according to category 2D

only for the connection to certified intrinsically safe circuits

maximum values: $U_i = 28 \text{ V}$
 $I_i = 150 \text{ mA}$
 $P_i = 550 \text{ mW}$ (at category 2D) resp.
 $P_i \leq 900 \text{ mW}$ (at category 2 G)

Maximum effective inner capacity $C_i = 36 \text{ nF}$

The maximum effective inner inductance is negligibly small

Additional to the maximum values of the effective inner capacitance and
inductance following maximal values of the capacitance and inductance are to
be considered by using connecting cables with the length of more than 5 m:

$C_l = 240 \text{ pF/m}$
 $L_l = 1,5 \text{ µH/m}$

For use according to category 2D the maximum permissible ambient temperature is 100°C, the lower
temperature margin is -65°C for this alternative type.

The temperature class, the maximum permissible ambient temperature and the maximum permissible
power of the connected, certified, intrinsically safe circuit (P_i) for the different versions for the usage
according to category 2G aren't to be changed and furthermore valid, only the lower temperature margin
is -65°C for the alternative type.

Sheet 1 of 2

4. Supplement

(Supplement according to EC-Directive 94/9 Annex III letter 6)

to EC-type examination Certificate

ZELM 03 ATEX 0124 X

Equipment: **Rotation speed sensor type DSF ..10.**.HV Ex**
Manufacturer: **JAQUET AG**
Address: **Thannerstrasse 15, CH-4009 Basel**

Description of supplement

The 4. Supplement concerns a minor change of the internal design. Moreover the name of the manufacturer is changed and the equipment is examined for compliance to the current Standards. The name of the manufacturer is in future:

JAQUET Technology Group Ltd

The marking is adapted and is in future:

 **II 2 G Ex ia IIC T6 Gb**
II 2 D Ex ia IIIC T155°C Db

resp. alternatively

 **II 2 G Ex ia IIC T6 Gb**
II 2 D Ex ia IIIC T200°C Db

The electrical and all other technical data as well as the Special conditions for safe use according to the EC-type-examination Certificate ZELM 03 ATEX 0124 X including the 1., 2. and 3. Supplement remain unchanged and are also valid for this 4. Supplement.

The Special conditions for safe use are extended by the Special condition for safe use No. 5:

5. Rotation speed sensors, which have a free surface of casting compound, shall be installed in a way that the free surface of the casting compound is protected from mechanical impacts. This can be achieved by installing the sensor into a wall of an enclosure with a degree of protection IP20 in a way that the connection side ensures a degree of protection IP20 or if the installation ensures in another suitable way, that mechanical impacts on the surface of the casting compound or the edge of the sensor enclosure are not possible.
