## PHOENIX INVERTER 24/5000 230V

PIN245020000

SOLD OUT

*Shipping, taxes, and discounts will be calculated at checkout.*

Wall Mounted, VE Bus Enabled, Parallel Connectable

Developed for professional duty, the Victron Energy Phoenix range of inverters is suitable for the widest range of applications. The design criteria have been to produce a true sine wave inverter with optimised efficiency but without compromise in performance. Employing hybrid HF technology, the result is a top quality product with compact dimensions, light in weight and capable of supplying power, problem free, to any load.

Up to 6 Victron Phoenix Inverters can operate in parallel to achieve higher power output. Six 24 V 5000 VA units, for example, will provide 24 kW / 30 kVA output power. Operation in 3-phase configuration is also possible.
